NICKSTON Universal Maintenance and Care Set for Rexton BTE

Instruction Manual: NICKSTON Maintenance and Care Set for Rexton BTE Hearing Aids

Extend the life and comfort of your hearing aids with proper care.

1. Introduction

This manual provides detailed instructions for the NICKSTON Maintenance and Care Set, designed to help users maintain their Rexton Behind-The-Ear (BTE) hearing aids. Regular cleaning and proper handling are crucial for optimal performance and longevity of your devices. This set includes essential tools to assist with daily care and minor troubleshooting.

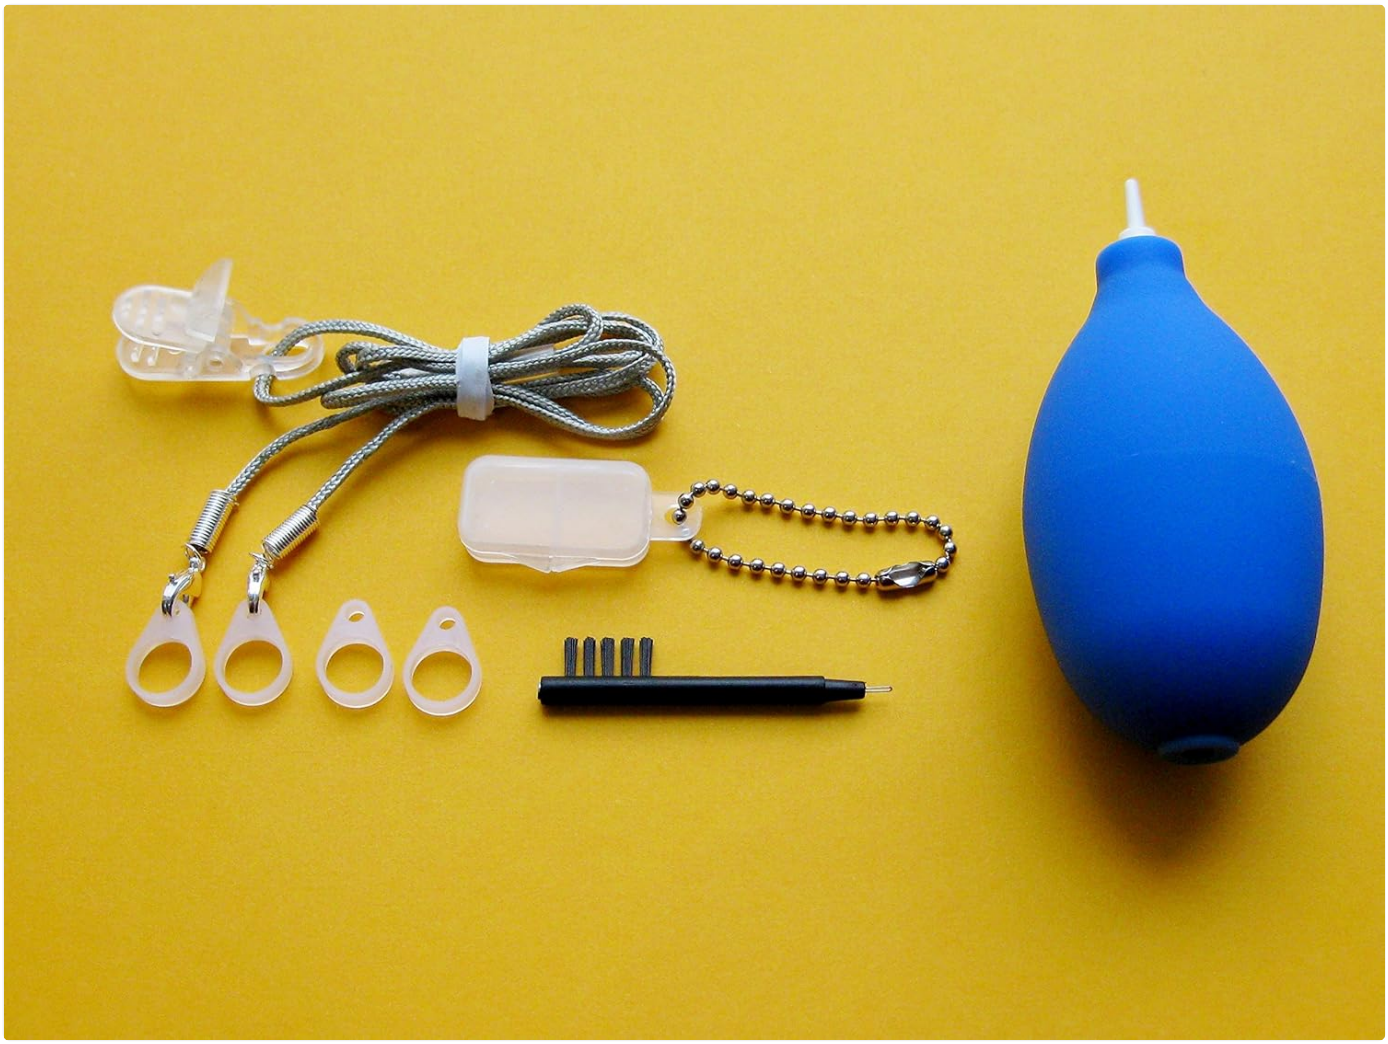

Figure 1.1: Overview of the NICKSTON Maintenance and Care Set components.

2. Product Components

The NICKSTON Maintenance and Care Set includes the following items:

- **Rubber Behind the Ear Dual Hearing Aid Holder:** A lanyard-style holder with rubber rings designed to secure two BTE hearing aids, preventing loss during activities. It features a clip for attachment to clothing.
- **Multi-Purpose Cleaning Brush with Wax Remover and Battery Magnet:** A versatile 3-in-1 tool for cleaning hearing aids, acoustic tubes, and eartip domes. It includes a brush, a wax removal loop, and a magnet for easier battery handling.
- **Battery Safe 2-Pack Holder with Key Chain Attachment:** A compact case designed to safely store two hearing aid batteries, protecting them from moisture and ensuring they are readily accessible.
- **Acoustic Tube and Mold Blower Cleaner:** A blue rubber bulb with a narrow nozzle, used to blow air through acoustic tubes and molds to remove earwax, debris, and moisture.

3. Setup and Usage

3.1. Hearing Aid Holder

The hearing aid holder is designed to prevent loss of your BTE hearing aids, especially during physical activities. It is particularly useful for children.

1. Gently slide the rubber rings of the holder around the body of each BTE hearing aid. Ensure the hearing aid is securely seated within the ring.
2. Position the lanyard behind your neck.
3. Attach the clip to the back of your collar or clothing. Ensure the clip is firmly secured to prevent accidental detachment.

Figure 3.1: Proper method for wearing the hearing aid holder.

3.2. Multi-Purpose Cleaning Brush

This tool combines a brush, wax remover, and battery magnet for comprehensive cleaning and handling.

- **Brush:** Use the brush bristles to gently sweep away debris and earwax from the surface of your hearing aid, microphone ports, and speaker openings.
- **Wax Remover Loop:** Carefully use the small loop end to dislodge and remove stubborn wax buildup from the eartip, sound outlet, or vent. Exercise caution to avoid pushing wax further into the device.
- **Battery Magnet:** The magnet on the end of the tool can be used to easily pick up and insert small hearing aid batteries into the battery compartment.

3.3. Battery Safe Holder

This holder keeps spare batteries secure and protected.

- Open the small plastic case.
- Insert up to two hearing aid batteries, ensuring they fit snugly.
- Close the case securely. The attached keychain allows for convenient carrying.

3.4. Acoustic Tube and Mold Blower Cleaner

This blower is essential for clearing moisture and debris from the tubing and earmolds.

1. Detach the acoustic tube and earmold from the hearing aid.
2. Insert the narrow nozzle of the blower firmly into one end of the acoustic tube or the opening of the earmold.
3. Squeeze the rubber bulb repeatedly and firmly to force air through the tube/mold. This will expel any trapped moisture, earwax, or foreign matter.
4. Repeat as necessary until the tube/mold is clear.

4. Maintenance and Care of Hearing Aids

Regular maintenance using this kit will significantly extend the life and improve the performance of your Rexton BTE hearing aids. It is recommended to perform daily cleaning.

- **Daily Cleaning:** After each use, especially at the end of the day, use the cleaning brush to remove any visible earwax or debris from the hearing aid casing, microphone ports, and eartip.
- **Tube and Mold Cleaning:** If you notice reduced sound quality or blockages, use the acoustic tube blower to clear the tubing and earmold. This is especially important if moisture has accumulated.
- **Battery Care:** Always store spare batteries in the provided battery holder to protect them from short-circuiting or moisture. Remove batteries from hearing aids if they will not be used for an extended period.
- **Protection from Loss:** Utilize the hearing aid holder during activities where there is a risk of the hearing aids falling out or being misplaced.

5. Troubleshooting Common Issues

This kit helps address several common issues experienced by BTE hearing aid users:

- **No Sound or Weak Sound:** Often caused by earwax or debris blocking the sound outlet or acoustic tube. Use the cleaning brush and acoustic tube blower to clear blockages.
- **Intermittent Sound:** Could be due to moisture in the tubing. Use the blower to remove moisture.
- **Lost or Damaged Hearing Aids:** The hearing aid holder is designed to prevent accidental loss, especially during

active use.

- **Difficulty Handling Batteries:** The battery magnet on the cleaning brush simplifies the process of inserting and removing small hearing aid batteries.

6. Specifications

Feature	Detail
Product Type	Hearing Aid Maintenance and Care Set
Brand	NICKSTON
Compatible Devices	Rexton BTE (Behind The Ear) Hearing Aids (Joy 2c, Accord 2c, Finesse 2c, Strata 2c, Day+, Arena, Onyx+, Charismo 2c, Calibra)
Material	Rubber (holder, blower), Plastic (brush, battery case), Metal (clip, magnet, keychain)
Item Weight	Approximately 1.1 Pounds (entire set)
UPC	702380904878

7. Compatibility

This maintenance and care set is specifically designed for compatibility with various Rexton Behind-The-Ear (BTE) hearing aid models. Compatible Rexton devices include:

- Rexton Joy 2c
- Rexton Accord 2c
- Rexton Finesse 2c
- Rexton Strata 2c
- Rexton Day+
- Rexton Arena
- Rexton Onyx+
- Rexton Charismo 2c
- Rexton Calibra

Please ensure your Rexton hearing aid model is listed above for optimal compatibility.
