OXO 11140100

OXO Good Grips GreenSaver Produce Keeper - Large User Manual

Model: 11140100

INTRODUCTION

The OXO Good Grips GreenSaver Produce Keeper is designed to extend the freshness of your fruits and vegetables. It utilizes an activated carbon filter to absorb ethylene gas, an elevated basket for airflow, and an adjustable vent to optimize humidity levels. This manual provides instructions for proper setup, operation, maintenance, and troubleshooting to ensure optimal performance of your Produce Keeper.

Image: The OXO Good Grips GreenSaver Produce Keeper, showing its clear container, green elevated basket, and white lid with a carbon filter compartment.

PRODUCT COMPONENTS

- **Outer Container:** The main clear body of the keeper.
- **Elevated Basket/Colander:** A green, perforated basket that fits inside the outer container, designed to promote airflow and can be used for rinsing produce.
- **Lid:** The top cover with an integrated vent and a compartment for the carbon filter.
- **Activated Carbon Filter:** A small packet containing natural activated carbon, designed to absorb ethylene gas.

Carbon filter absorbs ethylene gas

Image: An exploded view of the OXO GreenSaver Produce Keeper, showing the outer container, the elevated green basket, the lid, and the small activated carbon filter packet.

SETUP

1. **Unpack:** Carefully remove all components from the packaging.
2. **Wash:** Before first use, wash all parts (outer container, elevated basket, and lid) with warm, soapy water. Rinse thoroughly and dry completely. All components are dishwasher safe.
3. **Insert Carbon Filter:** Locate the small compartment on the underside of the lid. Open the compartment and insert one activated carbon filter packet. Close the compartment securely. The carbon filter is designed to last approximately 90 days.

OPERATING INSTRUCTIONS

The GreenSaver Produce Keeper works by managing three key factors for produce freshness: ethylene gas, humidity,

and airflow.

1. **Prepare Produce:** Wash and dry your fruits or vegetables as you normally would. Ensure produce is as dry as possible before placing it in the keeper to prevent excess moisture buildup.
2. **Place in Basket:** Place the produce inside the elevated green basket. The basket lifts produce away from the bottom and sides of the container, preventing moisture accumulation and promoting airflow. This basket can also be used as a colander to rinse fruits and vegetables directly.
3. **Adjust Vent:** The lid features an adjustable vent. Slide the vent open or closed to maintain optimal humidity levels for different types of produce.
 - **Open Vent:** For produce that thrives in lower humidity (e.g., carrots, broccoli, leafy greens).
 - **Closed Vent:** For produce that prefers higher humidity (e.g., berries, mushrooms).

Image: A close-up view of the OXO GreenSaver lid, highlighting the adjustable vent mechanism.

4. **Close Lid:** Place the lid securely on top of the outer container. Note that the lid does not snap shut but rests firmly to create the necessary environment.
5. **Storage:** Store the filled Produce Keeper in your refrigerator.

Extends the life of fresh produce

Image: The OXO GreenSaver Produce Keeper filled with carrots, demonstrating its capacity and how produce is stored within.

MAINTENANCE

- **Cleaning:** All parts of the OXO Good Grips GreenSaver Produce Keeper are dishwasher safe. For best results, wash regularly with warm, soapy water or place on the top rack of your dishwasher. Ensure all parts are completely dry before reassembly and storage.
- **Carbon Filter Replacement:** The activated carbon filter should be replaced approximately every 90 days (3 months) for optimal performance. Replacement filters are available separately.
- **Condensation Management:** Periodically check the lid for condensation buildup. If condensation is present, wipe it dry to prevent moisture from dripping onto your produce, which can accelerate spoilage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Produce spoiling quickly.	Carbon filter needs replacement. Vent setting is incorrect for the produce type. Produce was not dry before storage. Container is overstuffed, limiting airflow.	Replace the carbon filter (every 90 days). Adjust the vent according to the produce's humidity needs (open for low humidity, closed for high humidity). Ensure produce is thoroughly dry before placing it in the keeper. Do not overfill the basket; allow for adequate air circulation.
Condensation buildup inside the lid.	High moisture content from produce. Vent may be closed when it should be open.	Wipe the lid dry periodically. Ensure the vent is set correctly for the produce type.
Lid does not seal tightly.	This product is designed with a resting lid, not a snap-tight seal. Produce is too tall, preventing the lid from sitting flush.	Ensure the lid is properly aligned and resting flat. Adjust produce arrangement to allow the lid to sit flush.

SPECIFICATIONS

Feature	Detail
Model Number	11140100
Capacity	4.7 Liters (5 Quart)
Dimensions (L x W x H)	30.48 cm x 15.24 cm x 16.76 cm (12.0 in x 6.0 in x 6.6 in)
Weight	141 g (0.31 lbs)
Material	Plastic (BPA Free)
Care Instructions	Dishwasher Safe
Microwave Safe	No
Special Features	Activated carbon filter, Elevated basket for airflow, Adjustable vent for humidity control
Filter Lifespan	Approximately 90 days
