

Alcatel SM02-2AALUS5

Alcatel One Touch Watch SM02-2AALUS5 User Manual

Your comprehensive guide to the Alcatel One Touch Watch

1. INTRODUCTION

Welcome to the user manual for your Alcatel One Touch Watch. This guide provides essential information to help you set up, operate, and maintain your smartwatch, ensuring you get the most out of its features. The Alcatel One Touch Watch is designed to seamlessly integrate with your Android or iOS smartphone, offering a range of functionalities from health tracking to phone control.

2. WHAT'S IN THE BOX

Upon opening your Alcatel One Touch Watch package, please ensure all the following items are present:

- Alcatel One Touch Watch (SM02-2AALUS5)
- Quick Guide
- Charging Cable (optional, integrated into the watch strap)

3. SETUP GUIDE

3.1. Initial Charging

Before first use, fully charge your Alcatel One Touch Watch. The watch features a built-in USB charging connector within its strap, eliminating the need for a separate charging dangle.

1. Locate the USB connector at the end of the watch strap.
2. Plug the USB connector into any standard USB power source (e.g., computer USB port, USB wall adapter).
3. The watch display will indicate charging status. A full charge typically takes approximately one hour.

Figure 2: The Alcatel One Touch Watch strap revealing the integrated USB charging connector.

3.2. Pairing with Your Smartphone

The Alcatel One Touch Watch is compatible with both Android and iOS smartphones. To unlock its full functionality, you must pair it with your device.

1. **Download the Companion App:** Search for the "Alcatel Move" app (or similar official Alcatel smartwatch app) on your smartphone's app store (Google Play Store for Android, Apple App Store for iOS) and install it.
2. **Enable Bluetooth:** Ensure Bluetooth is enabled on your smartphone.
3. **Open the App:** Launch the Alcatel Move app on your smartphone.
4. **Follow On-Screen Instructions:** The app will guide you through the pairing process. This typically involves selecting your watch from a list of available Bluetooth devices and confirming a pairing code on both your watch and phone.
5. **NFC Pairing (Optional):** The watch may support NFC for easier initial pairing. If your phone has NFC, you might be prompted to tap the watch to your phone to initiate the connection. The watch will remain connected via Bluetooth after the initial NFC pairing.

Note: Maintain your watch and phone within Bluetooth range for a stable connection. If connection issues occur, try "forgetting" the watch in your phone's Bluetooth settings and re-pairing through the Alcatel Move app.

4. OPERATING YOUR WATCH

4.1. Basic Navigation

The Alcatel One Touch Watch features a touch-sensitive display and physical buttons for navigation.

- **Touch Screen:** Swipe left, right, up, or down to navigate through menus and notifications. Tap to select items.
- **Side Button:** Typically used to wake the screen, return to the home screen, or access the app menu.
- **"Back" Spot:** A specific area on the watch (often unmarked) functions as a 'back' button. Be precise when tapping to avoid unintended actions like activating "Find Phone."

Figure 3: Side view of the watch, highlighting the physical button on the right side of the casing.

4.2. Activity Tracking

Monitor your health and fitness with the built-in activity tracker.

- **Steps:** Tracks your daily step count.
- **Calories:** Estimates calories burned based on your activity.
- **Sleep:** Monitors your sleep patterns. Ensure the sleep tracking feature is activated, often through the companion app.
- **Heart Rate:** Measures your heart rate.

Detailed activity data and historical trends can be viewed within the Alcatel Move companion app on your smartphone.

4.3. Phone Control and Notifications

Stay connected and control your phone directly from your wrist.

- **Notifications:** Receive alerts for calls, texts, emails, and other app notifications. You can decline incoming calls directly from the watch.
- **Music Control:** Play, pause, skip tracks, and adjust volume for music playing on your smartphone.
- **Camera Control:** Remotely trigger your smartphone's camera shutter.
- **Phone Finder:** Use your watch to make your paired smartphone ring, helping you locate it.

4.4. Customization

Personalize your watch face to match your style.

- **Watch Faces:** The Alcatel Move app offers a variety of pre-designed watch faces.
- **Custom Watch Faces:** You can often create your own watch faces using personal photos or graphics through the companion app.

5. MAINTENANCE AND CARE

To ensure the longevity and optimal performance of your Alcatel One Touch Watch, follow these care guidelines:

- **Cleaning:** Wipe the watch screen and strap with a soft, damp cloth. Avoid harsh chemicals or abrasive materials.
- **Water and Dust Resistance:** The watch is designed to be water and dust resistant, making it suitable for daily wear and activities like running. However, it is not intended for swimming or diving. Avoid exposing it to high-pressure water or prolonged submersion.
- **Temperature:** Avoid exposing the watch to extreme temperatures (very hot or very cold) as this can affect battery life and internal components.
- **Storage:** When not in use for extended periods, store the watch in a cool, dry place.

6. TROUBLESHOOTING

If you encounter issues with your Alcatel One Touch Watch, refer to the following common problems and

solutions:

Watch not connecting to phone:

- Ensure Bluetooth is enabled on both your watch and phone.
- Verify the Alcatel Move app is running on your phone.
- Try restarting both your watch and phone.
- In your phone's Bluetooth settings, "forget" the watch and then re-pair it through the Alcatel Move app.
- Ensure the watch battery is not critically low.

Notifications not appearing:

- Check app notification settings on your phone to ensure they are enabled for the Alcatel Move app.
- Confirm the watch is successfully paired and connected to your phone.
- Ensure the watch is not in "Do Not Disturb" mode.

Weather app not updating or finding location:

- Ensure your phone has an active internet connection and location services are enabled.
- Verify that the Alcatel Move app has permission to access your location.
- Sometimes, a brief delay is normal for the weather app to synchronize.

Sleep tracking not working:

- Confirm that sleep tracking is activated within the Alcatel Move app settings.
- Ensure the watch is worn correctly and comfortably during sleep.

Accidental "Find Phone" activation:

- Be precise when interacting with the watch's touch screen, especially near the "back" function area.
- Familiarize yourself with the exact location of the "back" function to avoid accidental taps.

For further assistance, refer to the official Alcatel support resources or the full PDF user manual available online.
