OPERATING INSTRUCTIONS

Using the Net Shooter

The Jurassic One helicopter features a functional net shooter. To operate:

1. Load the net into the designated launcher on the side of the helicopter.
2. Position the helicopter to aim at the target (e.g., the Pteranodon).
3. Press the trigger mechanism to launch the net and capture the dinosaur.

Using the Stud Blaster

A small stud blaster is integrated into the helicopter's design. Load the small green studs into the blaster and press the firing mechanism to launch them.

Pteranodon Features

The Pteranodon figure has articulated wings and claws. You can manually adjust the wings to simulate flight and use the claws to 'grab' minifigures or other small objects for dynamic play.
