IMPORTANT SAFETY INFORMATION

- Read all instructions before using the appliance.
- Do not immerse the coffee maker, cord, or plug in water or other liquids.
- Ensure the appliance's voltage (12V) matches your vehicle's power supply.
- Exercise extreme caution when handling hot liquids and surfaces.
- Keep the appliance out of reach of children.

- Unplug the coffee maker from the power outlet when not in use and before cleaning.
- Do not operate the appliance with a damaged cord or plug, or if it malfunctions or has been damaged in any manner.
- Only use accessories and attachments recommended by the manufacturer.

INITIAL SETUP

1. Unpack all components and remove any packaging materials.
2. Clean the glass pot and reusable filter basket with warm, soapy water. Rinse thoroughly and allow to air dry.
3. Place the coffee maker on a stable, flat surface in your vehicle or desired location.
4. **Mounting (Optional):** The unit includes a fixing kit for permanent wall or desk mounting. Refer to the separate mounting instructions provided with the kit for detailed steps.

Figure 2: The coffee maker can be mounted for stability in a vehicle.

OPERATING INSTRUCTIONS: BREWING COFFEE

1. **Fill Water Reservoir:** Open the lid of the coffee maker. Use the included glass pot to measure the desired amount of water (up to 5 cups). Pour the water into the water reservoir. Do not exceed the MAX fill line indicated inside the reservoir.

Figure 3: Glass pot with clear water level markings.

2. **Add Coffee Grounds:** Place the reusable swing filter into its designated position. Add your preferred coffee grounds to the filter. Close the lid securely.

Figure 4: The reusable swing filter for adding coffee grounds.

3. **Connect Power:** Insert the 12V power plug into your vehicle's cigarette lighter socket or a compatible 12V power outlet.

Figure 5: The 12V power plug for vehicle use.

4. **Start Brewing:** Press the "ON" button. The indicator light will illuminate, signaling that the brewing process has started.

Figure 6: The ON/OFF button with an illuminated indicator.

5. **Wait for Brewing:** The coffee maker will automatically brew the coffee. The brewing time may vary depending on the amount of water and the vehicle's power output.
6. **Serving:** Once brewing is complete, the coffee will be kept warm by the integrated warming plate. Carefully remove the glass pot and serve.

CLEANING AND CARE

Regular cleaning ensures optimal performance and longevity of your coffee maker.

- **Daily Cleaning:** After each use, unplug the coffee maker and allow it to cool completely. Remove the glass pot and reusable filter basket. Wash them with warm, soapy water and rinse thoroughly.
- **Exterior Cleaning:** Wipe the exterior of the coffee maker with a damp cloth. Do not use abrasive cleaners or immerse the unit in water.
- **Descaling:** Over time, mineral deposits may build up, especially with hard water. Descale the coffee maker periodically (e.g., every 1-3 months) using a commercial descaling solution or a mixture of white vinegar and water (1:2 ratio). Follow the descaling product's instructions or run a brewing cycle with the vinegar solution, followed by several cycles with clean water to rinse.

COMMON ISSUES

Problem	Possible Cause	Solution
Coffee not brewing.	Appliance not plugged in; Power button not pressed; No water in reservoir.	Check power connection; Press the ON button; Ensure water reservoir is filled.
Coffee brews slowly.	Mineral buildup (needs descaling); Coffee grounds too fine.	Descalc the unit as per maintenance instructions; Use medium or coarse ground coffee.
Coffee tastes weak.	Insufficient coffee grounds; Too much water.	Adjust coffee-to-water ratio to your preference.
Coffee tastes bitter.	Too many coffee grounds; Over-extraction.	Reduce the amount of coffee grounds used.
