

## Coleman QuickPump 120V

# Coleman QuickPump 120V Instruction Manual

Model: QuickPump 120V | Brand: Coleman

## 1. OVERVIEW

---

The Coleman QuickPump 120V is an electric air pump designed for rapid inflation and deflation of various inflatables, including airbeds, pools, and other recreational items. It features a fast inflate and fast deflate design, making it efficient for both setting up and packing away your gear. The pump operates by plugging into a standard 120V AC outlet and comes with multiple adapters to accommodate different valve types.

## 2. SETUP

---

### 2.1 Unboxing and Initial Inspection

Carefully remove the Coleman QuickPump 120V and all accessories from its packaging. Inspect the pump and power cord for any signs of damage. Ensure all included adapters are present.

### 2.2 Attaching Adapters

The QuickPump comes with various adapters to fit different valve sizes, including Boston and pinch valves. Select the appropriate adapter for your inflatable. The adapters slide onto the inflation or deflation port of the pump.

- For inflation, attach the adapter to the 'FAST INFLATE' port.
- For deflation, attach the adapter to the 'FAST DEFLATE' port.

### 2.3 Power Connection

Plug the pump's 6-foot power cord into a standard 120V AC electrical outlet. If the outlet is too far, use a suitable extension cord.

## 3. OPERATING INSTRUCTIONS

---

### 3.1 Inflation

1. Ensure the correct adapter is securely attached to the 'FAST INFLATE' port of the pump.
2. Insert the adapter firmly into the valve of the inflatable item.
3. Turn the pump ON using the switch. The inflatable will begin to fill with air.
4. Monitor the inflation process to prevent over-inflation. Once the item is firm, turn the pump OFF and remove the adapter.
5. Close the inflatable's valve immediately to prevent air loss.

### 3.2 Deflation

1. Ensure the correct adapter is securely attached to the 'FAST DEFLATE' port of the pump.
2. Open the valve of the inflatable item.
3. Insert the adapter firmly into the valve.
4. Turn the pump ON using the switch. The pump will begin to draw air out of the inflatable.
5. Continue until the inflatable is fully deflated for compact storage. Turn the pump OFF and remove the adapter.
6. Close the inflatable's valve.

## 4. MAINTENANCE

---

### 4.1 Cleaning

To clean the pump, wipe the exterior with a damp cloth. Do not immerse the pump in water or use harsh chemicals. Ensure the air intake and exhaust vents are free from dust and debris.

### 4.2 Storage

Store the QuickPump in a dry, cool place away from direct sunlight and extreme temperatures. Wrap the power cord neatly around the pump or use the integrated cord holder if available. Keep all adapters with the pump to avoid misplacement.

## 5. TROUBLESHOOTING

---

- **Pump does not turn on:** Check if the power cord is securely plugged into a working 120V AC outlet. Ensure the ON/OFF switch is in the 'ON' position.
- **Slow inflation/deflation:** Verify that the correct adapter is used and is securely inserted into the inflatable's valve and the pump's port. Check for any obstructions in the pump's air intake or exhaust vents.
- **Inflatable not holding air:** This is typically an issue with the inflatable itself, not the pump. Check the inflatable for leaks or ensure its valve is properly sealed after inflation.

## 6. SPECIFICATIONS

---

|                             |   |
