

LAMAX DRIVE C7

LAMAX DRIVE C7 Dashcam Car Camera User Manual

Model: LAMAX DRIVE C7

Image: Front and rear view of the LAMAX DRIVE C7 Dashcam, showcasing its compact design and lens.

INTRODUCTION

This manual provides comprehensive instructions for the proper installation, operation, and maintenance of your LAMAX DRIVE C7 Dashcam. Please read this manual thoroughly before using the device to ensure optimal performance and longevity. The LAMAX DRIVE C7 is designed to record your journeys in Full HD 1080p, offering crucial evidence in case of incidents and enhancing your driving safety.

PACKAGE CONTENTS

- LAMAX DRIVE C7 Dashcam
- Car charger
- Suction cup mount
- Adhesive mount
- USB cable
- Memory Card (as per product specifications)
- User Manual (this document)

DEVICE OVERVIEW

Familiarize yourself with the various components and controls of your LAMAX DRIVE C7 Dashcam.

Image: Side view of the dashcam, highlighting the power button, memory card slot, and USB port.

Image: Front view of the dashcam with the 2.4-inch LCD display and control buttons below.

1. **Lens:** High-resolution camera lens.
2. **Display:** 2.4-inch LCD screen for viewing recordings and menu.
3. **Power Button:** Turns the device on/off.
4. **Menu Button:** Accesses settings and options.
5. **Up/Down Buttons:** Navigate through menu options.
6. **OK Button:** Confirms selections.
7. **MicroSD Card Slot:** Insert memory card here.
8. **USB Port:** For power supply and data transfer.
9. **Reset Button:** Resets the device (use a thin object).

SETUP

1. Inserting the Memory Card

Ensure the dashcam is powered off before inserting or removing the microSD card. Insert the card into the slot until it clicks into place. Use a Class 10 or higher microSD card, up to 32GB capacity, for optimal performance. It is recommended to format the memory card within the dashcam settings before first use and periodically thereafter.

2. Mounting the Dashcam

Choose a location on your windshield that does not obstruct your view of the road. Clean the windshield surface thoroughly before applying the mount.

Image: The dashcam attached to its suction cup mount, ready for windshield installation.

Image: Rear view of the dashcam with the suction cup mount attached, showing the screen and buttons.

- Attach the chosen mount (suction cup or adhesive) to the dashcam.
- Press the mount firmly against the windshield and secure it.
- Adjust the camera angle to ensure a clear view of the road ahead.

3. Connecting to Power

Connect the car charger to the dashcam's USB port and plug the other end into your vehicle's 12V power outlet (cigarette lighter socket). The dashcam will automatically power on and begin recording when the vehicle's ignition is turned on.

OPERATING INSTRUCTIONS

Power On/Off

- **Automatic:** The dashcam powers on/off automatically with the vehicle's ignition.
- **Manual:** Press and hold the Power button to manually turn the device on or off.

Recording Modes

- **Loop Recording:** The dashcam records video in continuous loops (e.g., 1, 3, or 5 minutes). When the memory card is full, the oldest unlocked files are overwritten.
- **G-Sensor:** In the event of a sudden impact or collision, the G-Sensor automatically locks the current recording, preventing it from being overwritten. The sensitivity of the G-Sensor can be adjusted in the settings.
- **Parking Mode:** When enabled, the dashcam will automatically start recording if it detects motion or an impact while the vehicle is parked. This feature provides 24-hour surveillance for your vehicle.

- **Time-Lapse Video:** This feature allows the camera to record at a lower frame rate (e.g., 1 frame per second), compressing long periods of time into short videos. This can significantly extend the recording capacity of your memory card.

Menu Navigation

Press the *Menu* button to access the settings. Use the *Up/Down* buttons to navigate through options and the *OK* button to confirm selections. Press *Menu* again to exit the settings.

Playback

To view recorded videos, stop recording (if active), then press the *Mode* button to switch to playback mode. Use the *Up/Down* buttons to select a file and *OK* to play it. You can also connect the dashcam to a computer via USB to access files directly.

MAINTENANCE

Memory Card Management

- **Formatting:** Regularly format your microSD card (at least once a month) using the dashcam's format function to prevent data corruption and ensure smooth recording.
- **Capacity:** Ensure sufficient free space on the memory card. Locked files from G-Sensor events can accumulate and fill the card. Periodically review and delete unnecessary locked files.

Cleaning

Wipe the camera lens with a soft, lint-free cloth to ensure clear video quality. Use a slightly damp cloth to clean the body of the dashcam. Do not use harsh chemicals or abrasive cleaners.

Firmware Updates

Check the official LAMAX website periodically for available firmware updates. Updates can improve performance, add new features, or fix bugs. Follow the instructions provided with the firmware update carefully.

TROUBLESHOOTING

Problem	Possible Cause / Solution
Dashcam does not power on.	Ensure the car charger is properly connected and the vehicle's 12V outlet is functioning. Check the power cable for damage. The internal battery might be fully discharged. Charge it for a few hours. Press the reset button with a thin object.
Recording stops unexpectedly.	The memory card may be full. Format the card. The memory card may be too slow or corrupted. Use a Class 10 or higher card and replace if necessary. G-Sensor sensitivity might be too high, causing too many files to be locked. Adjust G-Sensor settings.
Video quality is poor or blurry.	Clean the camera lens. Ensure the protective film has been removed from the lens. Check video resolution settings; ensure it's set to 1080p.
Dashcam freezes or becomes unresponsive.	Press the reset button. Format the memory card. Update firmware if available.

SPECIFICATIONS

Feature	Detail
Video Resolution	Full HD 1080p
Viewing Angle	150°
Display Size	2.4 inches (6.1 cm) LCD
Loop Recording	Yes
G-Sensor	Yes
Parking Mode	Yes (24h)
Night Vision	Yes
Built-in GPS	Optional (via external module)
Storage	MicroSD card (Class 10+, up to 32GB recommended)
Dimensions	3.3 x 6.1 x 7.2 cm
Weight	60 g
Included Components	Memory Card (as per product details)

WARRANTY AND SUPPORT

Warranty Information

The LAMAX DRIVE C7 Dashcam comes with a standard manufacturer's warranty. Please refer to the warranty card included in your package or visit the official LAMAX website for detailed warranty terms and conditions specific to your region. Keep your proof of purchase for warranty claims.

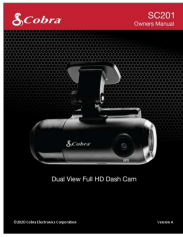

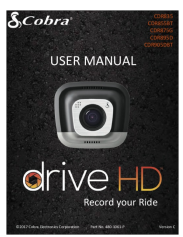

Customer Support

For technical assistance, troubleshooting, or product inquiries, please visit the official LAMAX support website or contact their customer service department. Contact details can typically be found on the brand's official website or on the product packaging. Official LAMAX Store: [Visit LAMAX Store on Amazon](#)
