1. **Preparation:** Unpack all components and lay them out on a clean, flat surface. Sort the building blocks by color or type if desired, to facilitate easier assembly.

MAINTENANCE

To ensure the longevity and cleanliness of your building set, follow these simple maintenance tips:

- **Cleaning:** Wipe the blocks and assembled model with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the plastic.
- **Drying:** Allow all parts to air dry completely before storing to prevent moisture damage.
- **Storage:** Store the building blocks and assembled model in a cool, dry place away from direct sunlight and extreme temperatures. Keeping them in their original box or a dedicated storage container will help prevent loss of pieces.

TROUBLESHOOTING

If you encounter any issues during assembly or play, consider the following:

- **Missing Pieces:** Double-check the packaging and surrounding area. If a piece is genuinely missing, please contact Sluban customer support for assistance.
- **Difficulty Connecting Blocks:** Ensure the blocks are correctly oriented and aligned. Apply firm, even pressure. If a block seems ill-fitting, verify it is the correct piece for that step according to the manual.
- **Unstable Structure:** Re-examine the connections of the base and supporting elements. Ensure all blocks are fully pressed together. Building on a flat, stable surface is crucial for structural integrity.
- **Instructions Unclear:** Review the visual diagrams carefully. If a step remains unclear, try to visualize the next few steps to understand the overall construction flow.
