OPERATING INSTRUCTIONS

Recording Modes

The device supports three primary recording modes:

- **Continuous Recording:** Records continuously in 1-minute segments. The LED indicator blinks during recording.
- **Event Recording (Automatic):** When an external impact or event occurs during continuous recording, the device automatically saves the footage before and after the event (typically 20 seconds before and 20 seconds after). The LED blinks rapidly during event recording.
- **Quick Recording:** Allows for manual recording of an event by user action.

常時録画モード… LEDが点滅し、1分単位で録画し続けます。

イベント録画モード(自動)

常時録画中にイベント(走行中の外部衝撃や事故)が発生した場合、常時録画を中断して、効果音とLEDが点滅(速い)し、前後のイベント録画ファイル(1回最大2ファイル)を生成します。イベント録画モード後、常時録画モードに戻ります。

Bの区間の録画時間が20秒未満の場合、Aの常時録画(60秒)を含めた録画時間がイベント録画となります。

クイック録画機能… イベントを手動で録画する機能です。
