Educator EZ-900

Educator EZ 1/2 Mile Dog Training Collar User Manual

Model: EZ-900

INTRODUCTION

The Educator EZ-900 is a dog training collar designed for small to medium-sized dogs weighing 10 pounds and up, with neck sizes ranging from 5 to 22.5 inches. This system offers a 1/2-mile range and incorporates features aimed at humane and effective training, including adjustable stimulation levels, vibration, and tone settings. It utilizes COS (Control of Stimulation) technology for precise control and includes a patented Instant Stimulation Mode.

PRODUCT COMPONENTS

The Educator EZ-900 system includes the following components:

- 1 Miniature Collar Receiver
- 1 Waterproof Ergonomic Transmitter with Lanyard
- 1 Biothane Collar (3/4" x 30", waterproof and odorproof)
- 2 Sets of Contact Points (5/8" and 3/4")
- 1 Contact Removal Tool
- 1 Dual Battery Charger (120V/220V)
- 1 Belt Clip
- User Manual with Training Tips

SETUP

Charging the Devices

Both the transmitter and receiver are powered by rechargeable Lithium Polymer batteries. Use the included dual charger to charge both units simultaneously. Connect the charger to a standard electrical outlet and plug the charging cables into the respective charging ports on the transmitter and receiver. A full charge typically takes approximately 2 hours.

Collar Fitting and Contact Points

Proper collar fit is crucial for effective and humane operation. The collar should be snug enough to allow the contact points to make consistent skin contact, but not so tight as to cause discomfort or restrict breathing. You should be able to fit one finger

snugly between the contact point and your dog's skin.

Select the appropriate contact points (5/8" or 3/4") based on your dog's coat length. Longer contact points are generally used for dogs with thicker coats to ensure proper contact. Use the provided contact removal tool to install or change the contact points.

Figure 2: Various contact point sizes (3/8", 5/8", 3/4") in stainless steel and titanium for different coat lengths.

OPERATING INSTRUCTIONS

Transmitter Overview

Innovative ergonomic transmitter

Figure 4: Labeled diagram of the EZ-900 ergonomic remote transmitter, highlighting key controls and features.

- **Volume Dial (Stimulation Level):** Adjusts the stimulation intensity from 0-100.
- **Programming Button:** Used for various programming functions.
- **On/Off Button:** Powers the transmitter on or off.
- **Programmable Buttons (S and Red Button):** Can be configured for stimulation, tone, or vibration.
- **Indicator Light (LED Display):** Shows current settings and battery status.
- **USB Battery Charging and Programming Port:** For charging and connecting to a computer for advanced settings.
- **Metal Belt Clip:** For convenient carrying.

Stimulation Levels and Lock-and-Set

The EZ-900 offers 256 levels of "blunt" stimulation, with 100 levels displayed on the LCD. The "lock-and-set" feature allows you to set a maximum stimulation level to prevent accidental overstimulation. Stimulation can only be applied from zero and gradually increased by turning the dial until the desired response is achieved.

Lowest levels of ‘blunt’ stimulus provide safe and humane training for improved effectiveness and reduced stress.

The “Lock and set” feature allows the user to set the best stimulation level.

Figure 5: Illustration of the remote transmitting a signal to the collar, demonstrating the range of selectable stimulus levels.

Tone and Vibration Settings

In addition to stimulation, the EZ-900 provides 7 vibration settings and 4 tone settings. These can be used as alternative or supplementary training cues. Dogs can quickly learn to associate the tone or vibration with desired behaviors or as a precursor to stimulation.

Educator products include Pavlovian tone and/or vibration as alternate stimulation options.

Pavlovian tone

Vibration tone

Dogs quickly learn to associate the tone or vibration with stimulation and soon respond accordingly.

Figure 6: Visual representation of Pavlovian tone and vibration as alternative training options.

Night Light Feature

The collar receiver includes a tracking light that can be activated to flash or continuously illuminate. This feature is useful for locating your dog in low-light conditions or after dark, enhancing visibility and safety.

The LED light feature makes your dog visible at night. Safe, humane and effective.

Figure 7: The collar's LED light feature, providing visibility for your dog at night.

Instant Stimulation Mode

A patented Instant Stimulation Mode is available to eliminate the surprise of stimulation when applying levels above 30. This mode ensures a smoother transition for the dog, as stimulation is initiated from zero and gradually increased.

MAINTENANCE

Collar Care

The included Biothane collar is designed for durability and ease of cleaning. It is waterproof and odorproof, making it suitable for outdoor and active dogs. To clean, simply use soap and water. Ensure the collar is dry before re-fitting to your dog.

Durable Biothane collar cleans easily, will not fray and is waterproof and odorproof. Perfect for outdoors and active dogs.

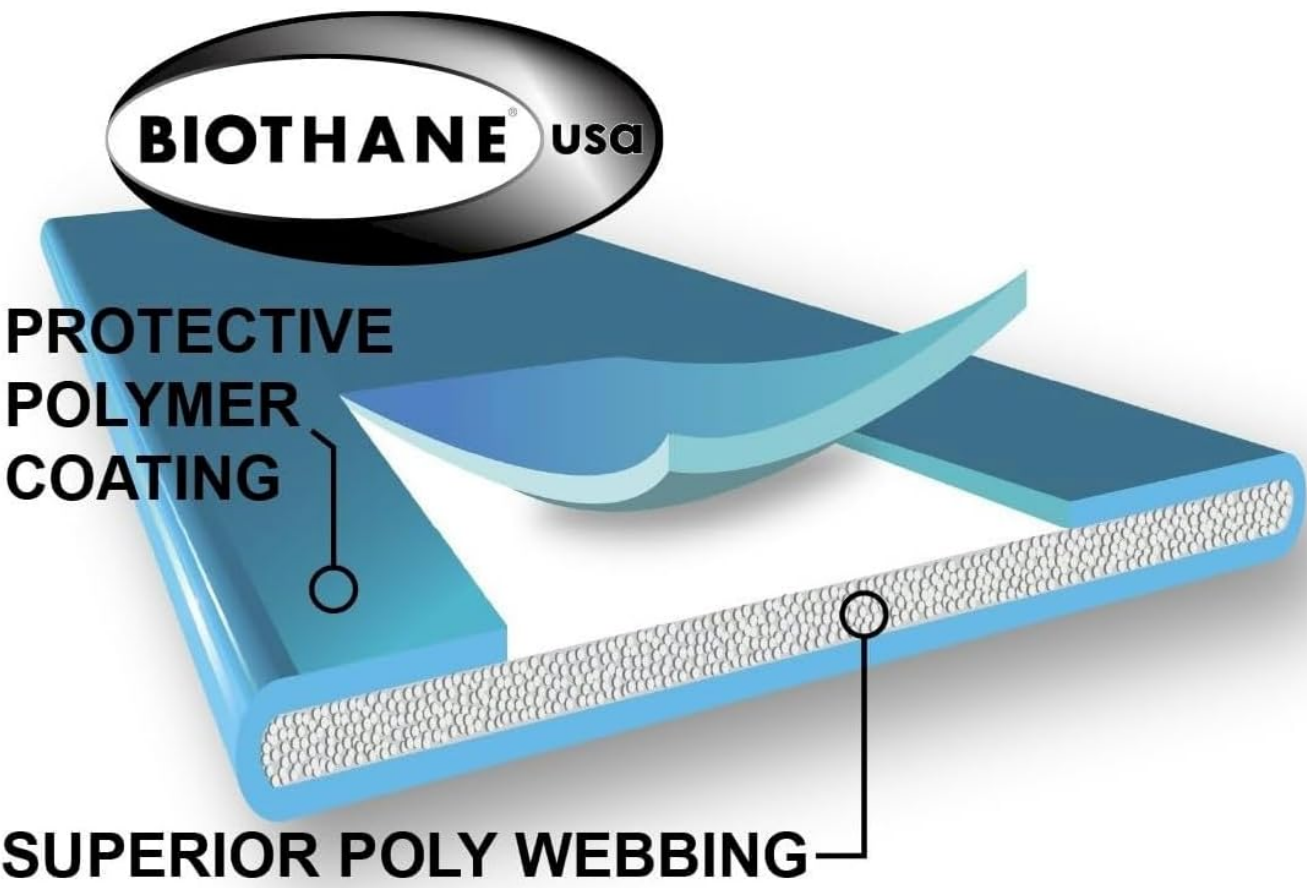

Figure 8: Construction of the durable Biothane material, highlighting its protective coating and poly webbing.

Battery Care

Handle the Lithium Polymer batteries with care. Avoid extreme temperatures and physical damage. Always use the provided charger. If the device will not be used for an extended period, it is recommended to store it with a partial charge (around 50%) in a cool, dry place.

TROUBLESHOOTING

For comprehensive troubleshooting steps, please refer to the detailed owner's manual provided with your product. Common issues and their resolutions are typically covered there. If you encounter persistent problems, contact customer support.

SPECIFICATIONS

| Feature | Detail |
