Beadalon JMHBT-1ZLG

Beadalon Remembrance Stainless Steel Memory Wire

Heavy Duty Round, Bracelet, Large

1. Product Overview

The Beadalon Remembrance Stainless Steel Memory Wire is a pre-formed, hard-tempered wire designed for easy jewelry making. Its unique coiled shape eliminates the need for a clasp, allowing for flexible sizing that can fit various wrist dimensions. This heavy-duty wire is made from durable stainless steel, ensuring longevity and a bright, natural finish for your creations.

Image 1.2: Key features of Beadalon Memory Wire, highlighting its pre-coiled shape, ease of use for jewelry making, and its origin as a product made in the USA.

2. Setup and Preparation

Before beginning your jewelry project, it is important to properly prepare the memory wire. Due to its hard-tempered nature, specific tools are required for cutting and finishing to ensure clean results and prevent damage to your tools.

2.1 Cutting the Memory Wire

Only use heavy-duty wire shears, specifically designed for memory wire, to cut the wire. Standard wire cutters may be damaged by the hard temper of the memory wire.

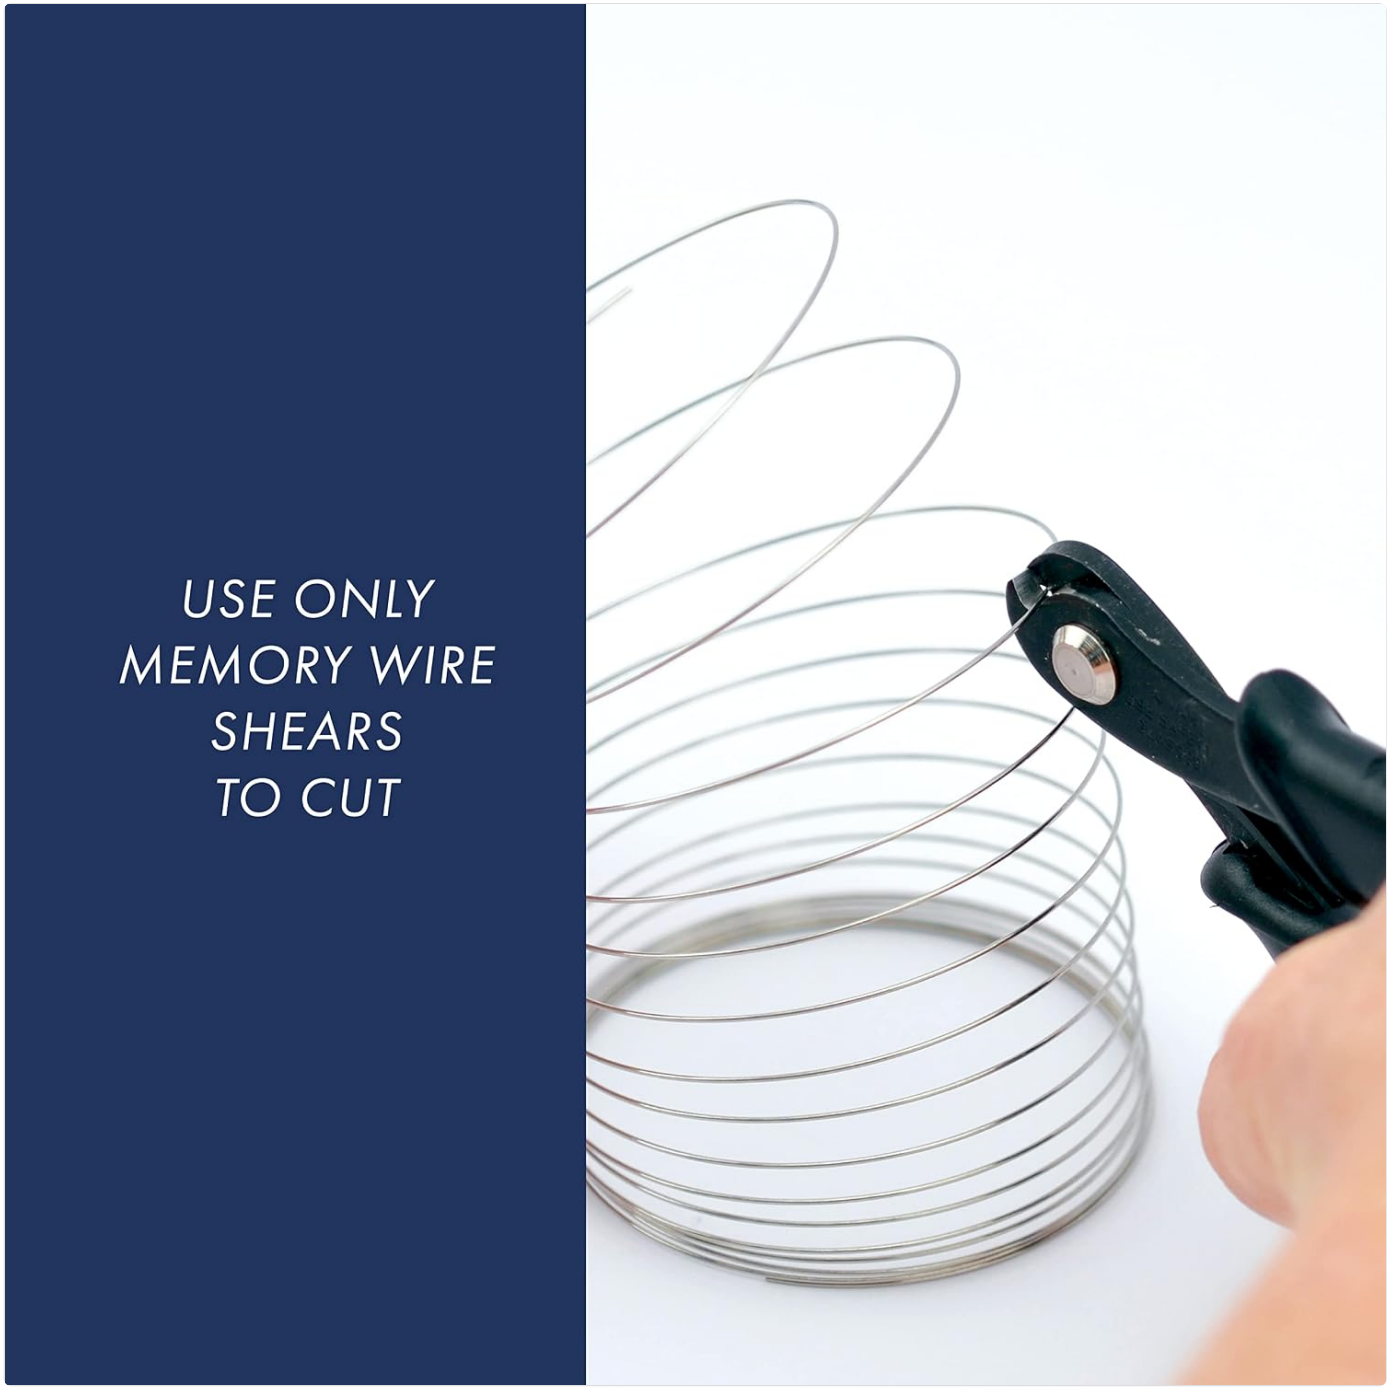

Image 2.1: Demonstrates the correct method of cutting memory wire using specialized heavy-duty shears to ensure a clean cut and protect tools.

2.2 Finishing the Wire Ends

To prevent beads from falling off and to create a professional finish, the ends of the memory wire must be secured. There are several recommended methods:

- **Looping with Pliers:** Use Round Nose Pliers or Memory Wire Finishing Pliers to create a small loop at each end of the wire. This loop will hold beads in place and can also serve as an attachment point for charms or other findings.
- **Using End Caps:** For a clean, seamless look, one-hole beads or specialized Memory Wire End Caps can be glued onto the ends of the wire.

Image 2.2: Visual guide illustrating three common techniques for finishing memory wire ends: creating loops with specialized pliers and attaching end caps with adhesive.

3. Operating and Usage

Beadalon Remembrance Memory Wire is ideal for creating bracelets, necklaces, and rings due to its inherent coiled shape. Simply string beads onto the wire, and its natural spring will hold them securely in place.

3.1 Stringing Beads

Once the wire ends are prepared, slide your chosen beads onto the wire. The pre-coiled shape will naturally form the jewelry piece. Ensure the beads fit comfortably over the wire diameter.

3.2 Coil Diameter and Sizing

This specific product is a Large Bracelet size, with a coil diameter range of 2.25" - 2.63". The heavy-duty wire has a diameter of .036" for sturdier designs. Understanding the coil diameter is crucial for selecting the appropriate wire for your project.

3.3 Project Examples

Memory wire is versatile and can be used with a wide variety of beads and styles to create unique jewelry pieces.

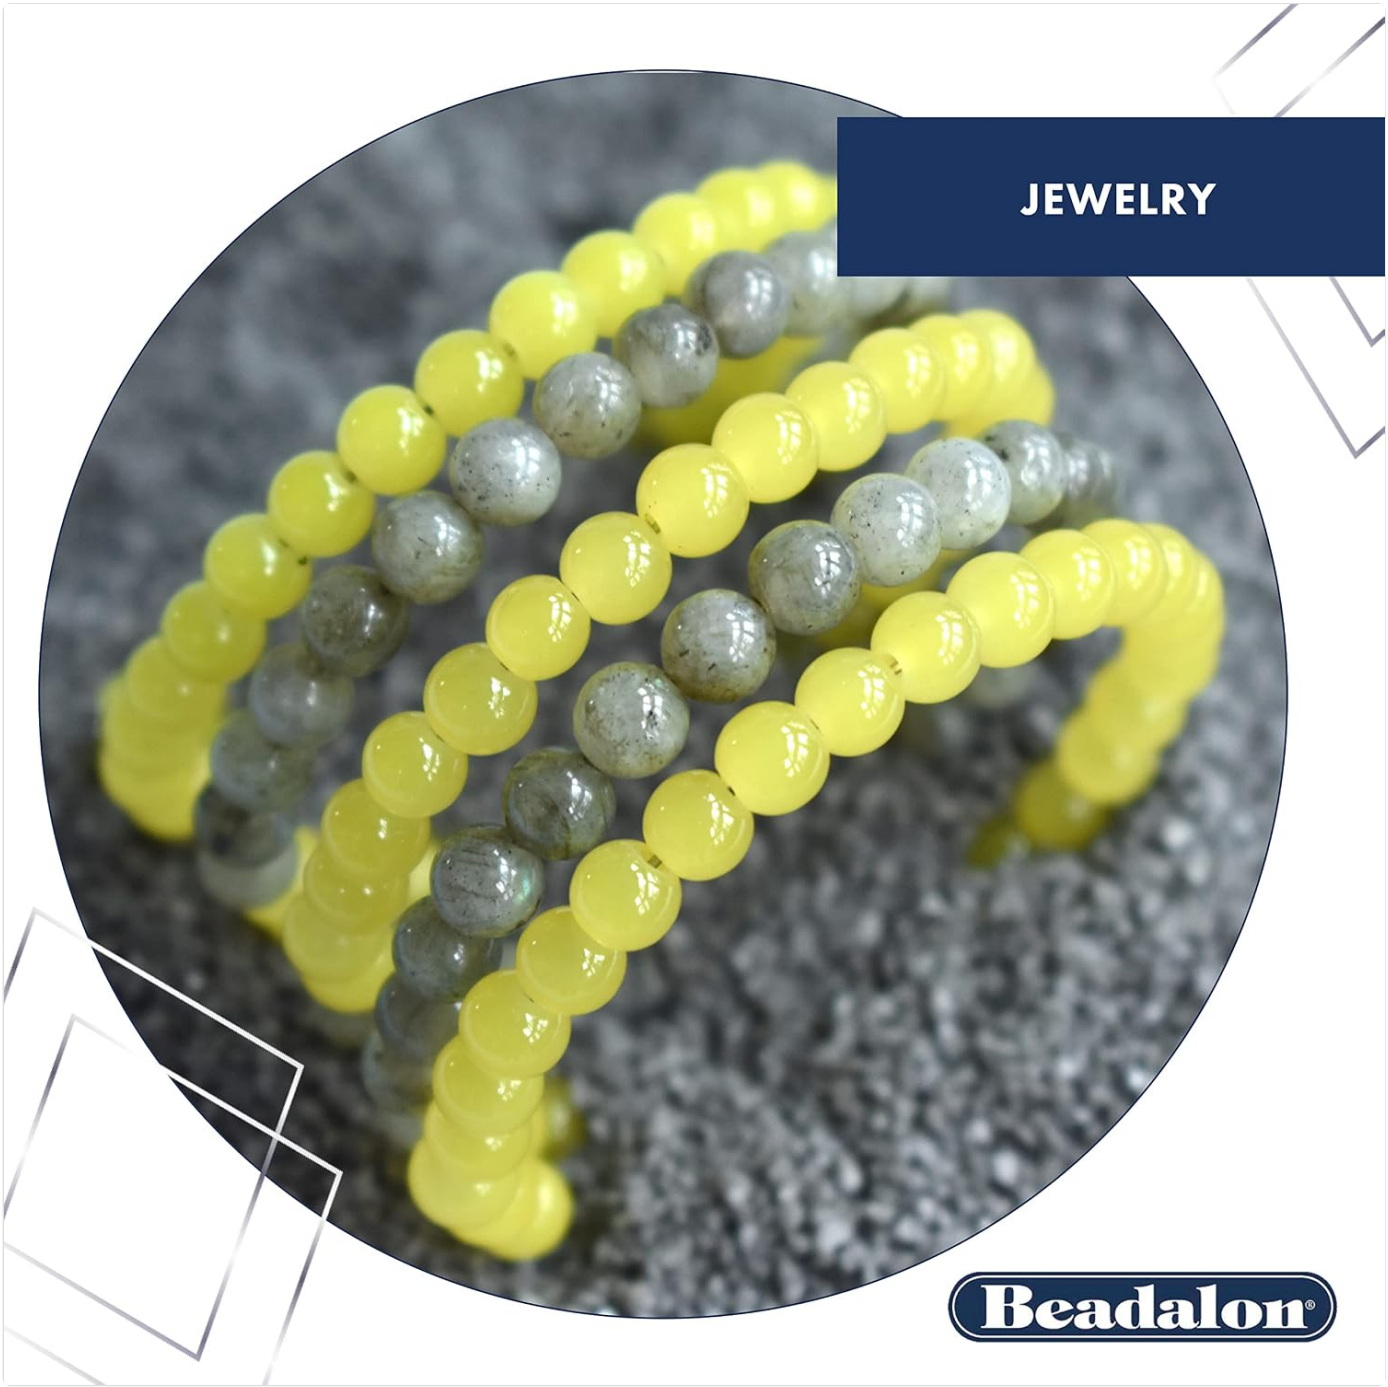

Image 3.3: Another example of a finished bracelet made with Beadalon Memory Wire, showcasing yellow and grey beads.

4. Maintenance and Care

Beadalon Remembrance Stainless Steel Memory Wire is designed for durability. To maintain its quality and ensure longevity of your creations:

- Store unused wire in its original packaging or a dry, cool place to prevent tangling and maintain its shape.
- Avoid using harsh chemicals or abrasive cleaners on finished jewelry, as this may affect the wire's finish or attached beads.
- Always use the correct tools (memory wire shears, appropriate pliers) to work with the wire to prevent damage to both the wire and your tools.

5. Troubleshooting

While memory wire is generally easy to use, here are some common considerations:

- **Wire not cutting cleanly:** Ensure you are using heavy-duty memory wire shears. Standard cutters are not strong enough and can result in frayed ends or damage to the cutters.
- **Beads slipping off:** Verify that the loops at the ends of the wire are securely closed or that end caps are properly glued and cured.
- **Wire losing its shape:** Memory wire is hard-tempered to retain its shape. Excessive force or bending against its natural coil can deform it. Handle with care.

6. Specifications

Attribute	Detail
Product Name	Remembrance Stainless Steel Memory Wire
Type	Heavy Duty Round Bracelet Wire
Size (Coil Diameter)	Large Bracelet (2.25" - 2.63")
Wire Diameter	.036 inches
Material	Stainless Steel
Color	Bright (Natural Stainless Steel)
Quantity	1 oz, approx. 30 coils
Model Number	JMHBT-1ZLG
Manufacturer	Beadalon
Product Dimensions	0.75 x 2.25 x 2.25 inches
Item Weight	0.992 ounces (0.06 Pounds)

7. Warranty and Support

Beadalon is committed to providing high-quality products for jewelry making. While specific warranty details are not provided, Beadalon products are known for their reliability and are proudly made in the USA.
