Petrainer PET998DRB1 Dog Training Collar User Manual

Rechargeable and Rainproof Remote Dog Training Collar with Beep, Vibration, and Static Modes

1. INTRODUCTION

The Petrainer PET998DRB1 Dog Training Collar is designed to assist in effective dog training by providing three types of safe corrective stimulation: beep, vibration, and static. This remote training system offers a range of up to 330 yards, making it suitable for training in various environments. The collar and remote are rechargeable and the collar is rainproof, ensuring durability and convenience for outdoor use.

2. PRODUCT COMPONENTS

The package includes the following items:

- Remote Transmitter
- Receiver Collar
- Adjustable Nylon Strap
- USB Charging Cable
- Power Adapter
- Test Light Tool
- Long and Short Contact Points (for different coat lengths)
- User Manual (this document)

3. SETUP

3.1 Charging the Devices

Before first use, fully charge both the remote transmitter and the receiver collar for approximately 2 hours. Use the provided USB charging cable and power adapter. Both devices can be charged simultaneously.

Fast & Simple Charging

Fast 2 Hour Charging and Long Battery Life

Simply charge via your PC, laptop, phone charger or power bank

3.2 Fitting the Collar

Proper fit of the receiver collar is crucial for effective and safe operation. The collar should be snug enough to allow the contact points to touch the dog's skin, but not so tight as to restrict breathing or cause discomfort. You should be able to fit one finger snugly under the collar strap.

- Select the appropriate contact points (long or short) based on your dog's coat length.
- Attach the receiver to the adjustable nylon strap.
- Place the collar on your dog's neck, ensuring the contact points are centered beneath the neck.
- Adjust the strap for a snug fit. The collar is adjustable from 14 to 25 inches, suitable for small, medium, and large dogs.

ADJUSTABLE COLLAR FOR ALL SIZE OF DOGS

4. OPERATING THE COLLAR

The Pettrainer PET998DRB1 offers three training modes: Beep, Vibration, and Static. Each mode has adjustable intensity levels (0-100) for vibration and static, allowing for customized training based on your dog's temperament and response.

4.1 Remote Transmitter Overview

The remote transmitter features buttons for each mode and intensity adjustment. Ensure the remote is within the 330-yard range for optimal communication with the receiver collar.

Figure 4.1: Remote Range up to 330 Yards.

4.2 Training Modes

- **Beep Mode:** Produces an audible tone. This mode is suitable for initial training and gaining your dog's attention.
- **Vibration Mode:** Delivers a non-harmful vibration. Use this mode to restrain unwanted behaviors. Intensity levels can be adjusted from 0 to 100.
- **Static Mode:** Provides a static stimulation. This mode is recommended only in emergency situations or for persistent behaviors that do not respond to beep or vibration. Intensity levels can be adjusted from 0 to 100.

Figure 4.2: Overview of Training Modes.

5. TRAINING TIPS AND USAGE GUIDELINES

- Start with the lowest intensity level and gradually increase it until your dog responds.
- Use the collar for short training sessions initially, typically 10-15 minutes.
- Always pair the correction with a verbal command.
- Reward positive behavior immediately after the desired action.
- Do not leave the collar on your dog for more than 12 hours a day.
- Regularly check your dog's skin for any signs of irritation from the contact points.

6. MAINTENANCE

- Clean the receiver collar and contact points regularly with a damp cloth.

- Ensure the charging ports are dry before charging.
- Store the device in a cool, dry place when not in use.
- The receiver collar is rainproof, but it is not designed for submersion. Avoid prolonged exposure to heavy rain or water.

Figure 6.1: Rainproof Collar for Outdoor Use.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Collar not responding to remote	Low battery on either device; Out of range; Not paired correctly.	Charge both devices; Move closer to the dog; Re-pair the remote and receiver.
Dog not responding to stimulation	Collar too loose; Contact points not touching skin; Intensity level too low.	Tighten collar; Ensure contact points are appropriate for coat length; Increase intensity gradually.

Problem	Possible Cause	Solution
Short battery life	Frequent use; Old battery.	Reduce frequency of use; Contact customer support for battery replacement if needed.

8. SPECIFICATIONS

- **Model:** PET998DRU
- **Range:** Up to 330 yards
- **Modes:** Beep, Vibration (0-100 levels), Static (0-100 levels)
- **Collar Material:** Nylon
- **Collar Adjustability:** 14 to 25 inches
- **Water Resistance:** Rainproof (Receiver Collar)
- **Battery:** Rechargeable Lithium Polymer (included)
- **Item Weight:** 9.6 ounces
- **Product Dimensions:** 7.6 x 1.8 x 6 inches
