

Panasonic NI-P250T

Panasonic NI-P250T 1550W Steam Iron User Manual

Model: NI-P250T

IMPORTANT SAFETY INSTRUCTIONS

Please read all instructions carefully before using the Panasonic NI-P250T Steam Iron. Keep this manual for future reference.

- **Voltage Requirement:** This iron is designed for **220-240V~50-60Hz power sources only**. It will **NOT** work in regions with 100-120V power, such as the USA, Canada, Japan, or Taiwan, without a suitable voltage converter. Using it with an incorrect voltage supply can cause damage to the appliance and pose a safety risk.
- Always unplug the iron from the electrical outlet when filling with water, emptying, or when not in use.
- Do not operate the iron with a damaged cord or if the iron has been dropped or damaged. Contact authorized service personnel for repair.
- Do not immerse the iron, cord, or plug in water or other liquids.
- Keep the iron and its cord out of reach of children.
- Never leave the iron unattended while it is switched on or connected to power.
- Use the iron only for its intended purpose: ironing garments.
- Exercise caution when turning the iron upside down, as there may be hot water in the reservoir.

PRODUCT OVERVIEW

The Panasonic NI-P250T is a powerful 1550W steam iron designed for efficient garment care. It features a titanium-coated curved soleplate for smooth gliding and crease-free ironing.

Key Features:

- **Powerful Performance:** 1300-1550W for quick heating and effective ironing.
- **Titanium Coated Curved Soleplate:** Ensures smooth gliding over fabrics and helps prevent creases.
- **Adjustable Steam and Spray Mist Functions:** Provides versatility for different fabric types and stubborn wrinkles.
- **Large Water Tank:** 200ml capacity reduces the need for frequent refills.
- **360-Degree Rotating Cord:** Offers flexibility and ease of movement during ironing.
- **Auto Anti-Calcium System:** Helps prevent mineral buildup in steam vents, prolonging the iron's lifespan.

SETUP

1. Filling the Water Tank

1. Ensure the iron is unplugged from the power outlet and has cooled down.
2. Open the water inlet cover, usually located on the top front of the iron.
3. Using a measuring cup, carefully pour clean tap water into the water tank up to the "MAX" fill line. Do not

overflow.

4. Close the water inlet cover securely to prevent leakage.

2. Power Connection

- Verify that your electrical outlet provides **220-240V~50-60Hz power**. This iron is not compatible with 100-120V power systems.
- Plug the iron's power cord into a grounded 220-240V electrical outlet.

OPERATING INSTRUCTIONS

1. Setting the Temperature

1. Refer to the fabric care label on your garment to determine the appropriate ironing temperature.
2. Turn the temperature control dial to the desired setting (e.g., synthetic, silk, wool, cotton, linen).
3. Allow the iron to heat up. The indicator light will turn off when the set temperature is reached.

2. Using the Steam Function

- Ensure the water tank is filled.
- Set the temperature dial to a steam-appropriate setting (usually cotton or linen, indicated on the dial). Steam will not be generated at lower temperatures.
- Once the iron reaches the set temperature, slide the steam selector switch to the desired steam level.
- For a burst of steam, press the steam shot button.

3. Using the Spray Mist Function

- The spray mist function is useful for dampening stubborn wrinkles.
- Press the spray mist button to release a fine mist of water onto the fabric.

4. Dry Ironing

- For dry ironing, ensure the water tank is empty or the steam selector is set to the "dry" position.
- Set the temperature dial according to the fabric type.
- Proceed with ironing as usual.

MAINTENANCE

Regular maintenance ensures optimal performance and extends the life of your iron.

1. Cleaning the Soleplate

- Ensure the iron is unplugged and completely cool.
- Wipe the titanium-coated soleplate with a damp cloth and a mild, non-abrasive cleaner if necessary.
- Do not use abrasive scouring pads or harsh chemicals, as these can damage the soleplate.

2. Draining the Water Tank

- After each use, or before storing, ensure the iron is unplugged and cool.
- Open the water inlet cover and invert the iron over a sink to drain any remaining water.
- Close the water inlet cover.

3. Auto Anti-Calcium System

- The iron is equipped with an auto anti-calcium system to minimize mineral buildup.
- While this system reduces maintenance, using distilled or demineralized water can further prevent scale formation, especially in areas with hard water.

4. Storage

- Store the iron upright on its heel rest to protect the soleplate.
- Ensure the cord is neatly wrapped and not tightly coiled around the hot soleplate.
- Store in a dry, safe place out of reach of children.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Iron does not heat up.	Not plugged in; power outlet issue; temperature dial set to minimum; incorrect voltage.	Check power connection; test outlet with another appliance; turn temperature dial to desired setting; ensure 220-240V power supply.
No steam or insufficient steam.	Water tank empty; temperature too low for steam; steam selector set to dry; steam vents clogged.	Fill water tank; set temperature to steam-appropriate level (e.g., cotton/linen); move steam selector to steam position; clean steam vents if necessary.
Water leakage from soleplate.	Temperature too low for steam; water tank overfilled; iron tilted excessively; water inlet cover not closed properly.	Increase temperature to steam setting; do not overfill water tank; keep iron level during use; ensure water inlet cover is sealed.
Iron sticks to fabric.	Temperature too high for fabric type; soleplate is dirty.	Adjust temperature according to fabric care label; clean the soleplate.

SPECIFICATIONS

- **Model Number:** NI-P250T
- **Brand:** Panasonic
- **Wattage:** 1300-1550W
- **Voltage:** 220-240V
- **Frequency:** 50-60Hz
- **Water Tank Capacity:** 200ml
- **Soleplate Material:** Titanium Coated
- **Special Features:** Curved Soleplate, Adjustable Steam, Spray Mist, Auto Anti-Calcium System, 360-Degree Rotating Cord
- **Item Weight:** Approximately 2 Pounds (0.9 kg)
- **Color:** Green (Note: Product images may show an orange variant, but specifications list Green.)

WARRANTY AND SUPPORT

For warranty information, technical support, or service inquiries, please refer to the warranty card included with your purchase or visit the official Panasonic website for your region. Keep your proof of purchase for warranty claims.

Note: This product is designed for 220-240V electrical systems and is not intended for use in countries with 100-120V systems without a proper voltage converter.
