TOOLPORT PRO Smart

TOOLPORT 4x10 m Reception Marquee User Manual

Model: PRO Smart | Color: Grey-White

1. Product Overview

The TOOLPORT ECONOMY 4x10m PVC Reception Marquee is designed for quick assembly and durability, providing a versatile shelter solution for various events. It features a robust galvanized steel frame and high-quality PVC tarpaulins.

The frame components consist of galvanized steel tubes (approx. 38mm diameter, 1.1mm wall thickness) connected by galvanized steel fittings (approx. 42mm diameter, 1.3mm wall thickness). These connections are bolted for enhanced stability and ease of assembly.

The 700 N PVC tarpaulins are 100% waterproof and offer high UV protection (UV 80+), comparable in strength to truck tarpaulins. The modular 2m high side panels allow for flexible configurations, adapting to your specific needs.

This marquee is ideal for a wide range of uses, including private parties, community events, club gatherings, market stalls, trade fairs, weddings, and birthdays.

Safety Warning:

This tent must be assembled and disassembled with care to prevent damage or injury. Please follow the provided assembly instructions diligently. Ensure the tent is securely anchored to the ground to prevent it from blowing away in strong winds. Avoid leaving the tent exposed to severe weather conditions or direct sunlight for extended periods to prolong its lifespan.

2. Setup Instructions

Careful and correct assembly is crucial for the stability and longevity of your TOOLPORT reception marquee. It is recommended that at least two people undertake the assembly process.

2.1 Unpacking and Part Identification

1. Carefully unpack all components and lay them out.
2. Verify that all parts listed in the packing list are present. The tubes are typically numbered for easy identification.
3. Familiarize yourself with the different types of tubes (e.g., uprights, ridge poles) and connectors.

2.2 Frame Assembly

1. Begin by assembling the base frame on a flat, level surface. Connect the horizontal base tubes using the appropriate connectors.
2. Attach the vertical upright poles to the base frame connectors.
3. Connect the roof ridge poles and eaves poles to the top of the uprights using the roof connectors. Ensure all bolted connections are tightened securely with wing nuts.
4. Gradually build up the frame section by section, ensuring each part is correctly oriented and securely fastened.

Image: A close-up view demonstrating the secure bolted connection of the galvanized steel frame components.

2.3 Tarpaulin Installation

1. Once the frame is complete, carefully drape the roof tarpaulin over the frame. Ensure it is centered and evenly distributed.
2. Attach the roof tarpaulin to the frame using the provided bungee cords or ties, starting from the corners and working towards the center. Ensure it is taut to prevent water pooling.
3. Install the gable ends (front and back panels) and side panels. The side panels are modular and can be installed individually or in sections, allowing for various configurations.
4. Secure all tarpaulins to the frame and to each other using the integrated fastening systems (e.g., Velcro, zippers, bungee loops).

2.4 Anchoring the Marquee

1. Securely anchor the marquee to the ground using the provided ground pegs/stakes and guy ropes. This is critical for stability, especially in windy conditions.
2. Ensure all guy ropes are properly tensioned and evenly distributed to provide maximum stability.

3. Operating Instructions

The TOOLPORT reception marquee is designed for temporary outdoor use, providing shelter and space for various events.

3.1 Usage Considerations

- **Event Hosting:** Utilize the spacious interior for parties, gatherings, market stalls, or as a temporary shelter.
- **Weather Protection:** The PVC tarpaulins offer excellent protection against rain and harmful UV rays.
- **Ventilation:** The modular side panels can be partially or fully removed to allow for optimal air circulation and temperature regulation, especially on warm days.
- **Entry/Exit:** The gable ends typically feature zippered doors for easy access.

3.2 Disassembly

Disassembly should be performed carefully and in reverse order of assembly to prevent damage to the components.

1. Remove all side panels and gable ends.
2. Carefully remove the roof tarpaulin.
3. Disassemble the frame, starting from the roof structure and working downwards to the base.
4. Clean and dry all components before packing them away.

4. Maintenance

Proper maintenance will extend the life of your TOOLPORT reception marquee and ensure its continued performance.

4.1 Cleaning

- **Tarpaulins:** Clean PVC tarpaulins with mild soap and water. Avoid harsh chemicals or abrasive cleaners, as these can damage the material and its protective coatings. Rinse thoroughly and allow to air dry completely before storage.
- **Frame:** Wipe down the galvanized steel frame with a damp cloth to remove dirt and debris. Inspect for any signs of rust or damage.

4.2 Inspection and Storage

- **Regular Inspection:** Before and after each use, inspect all components (frame tubes, connectors, tarpaulins, ropes, pegs) for wear, damage, or corrosion. Replace any damaged parts immediately.
- **Secure Anchoring:** Always ensure the tent is securely anchored, especially in anticipation of changing weather conditions.
- **Storage:** When not in use, disassemble the marquee and store all components in a dry, cool place, away from direct sunlight and extreme temperatures. Ensure tarpaulins are completely dry to prevent mold and mildew growth.

5. Troubleshooting

This section addresses common issues you might encounter with your reception marquee.

5.1 Tent Instability

- **Issue:** The tent feels wobbly or unstable.
- **Solution:** Ensure all frame connections are securely bolted and tightened. Verify that the tent is properly anchored to the ground using all provided ground pegs and guy ropes. Check that the guy ropes are taut and evenly distributed.

5.2 Water Pooling on Roof

- **Issue:** Water collects on the roof tarpaulin.
- **Solution:** This indicates the roof tarpaulin is not sufficiently taut. Re-tension the roof tarpaulin, ensuring it is evenly stretched across the frame. Check that the frame is assembled correctly, maintaining the intended pitch for water runoff.

5.3 Difficulty Assembling Frame

- **Issue:** Frame tubes or connectors do not fit together easily.
- **Solution:** Double-check the assembly instructions to ensure you are using the correct numbered parts for each section. Sometimes, a slight rotation of a tube or connector can help it fit. Ensure no parts are bent or damaged.

5.4 Tarpaulin Damage

- **Issue:** Small tears or holes in the PVC tarpaulin.
- **Solution:** For minor damage, use a PVC repair kit (not included) to patch the affected area. For significant damage, contact TOOLPORT customer service for replacement parts.

6. Specifications

Detailed technical specifications for the TOOLPORT 4x10 m Reception Marquee.

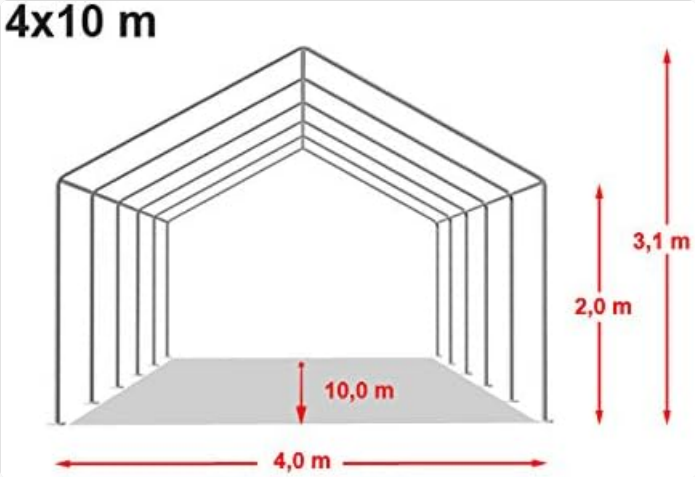

Image: A technical diagram illustrating the 4x10m footprint, 2.0m side height, and 3.1m ridge height of the marquee.

Feature	Detail
Model Number	PRO Smart (Reference: 6111)
Dimensions (L x W x H)	1000 x 400 x 200 cm (10m x 4m x 2m)
Ridge Height	Approx. 3.1 m
Side Height	Approx. 2.0 m
Item Weight	124.2 kg
Color	Grey-White
Tarpaulin Material	Polyvinyl Chloride (PVC) 700 N
Frame Material	Galvanized Steel
Frame Tube Diameter	Approx. 38 mm
Frame Connector Diameter	Approx. 42 mm
Water Resistance Level	Waterproof
UV Protection	UV 80+
Number of Tension Ropes	4
Recommended Use	Parties, Events
Country of Origin	Germany

7. Warranty Information

Specific warranty details for the TOOLPORT 4x10 m Reception Marquee are not provided in the product information. Please refer to the seller's terms and conditions at the time of purchase or contact TOOLPORT directly for warranty inquiries.

8. Support

For further assistance, technical support, or inquiries regarding spare parts, please contact the seller or TOOLPORT

customer service directly. You can often find contact information on the seller's page or the official TOOLPORT website.
When contacting support, please have your product model (PRO Smart) and ASIN (B00WGSJ1KO) readily available.
