Windhager 03487

Windhager Fiberglass Mosquito Net

Model: 03487 | Size: 100 x 130 cm | Color: White

INTRODUCTION

Thank you for choosing the Windhager Fiberglass Mosquito Net. This product is designed to provide effective and reliable protection against insects for your windows and doors. Made from high-quality, UV-resistant fiberglass fabric with a welded mesh, it ensures durability and clear visibility while keeping pests out. Please read this manual carefully before installation and use to ensure optimal performance and longevity of your mosquito net.

A white fiberglass mosquito net, folded, with a roll of white adhesive tape, indicating its easy installation.

PRODUCT FEATURES

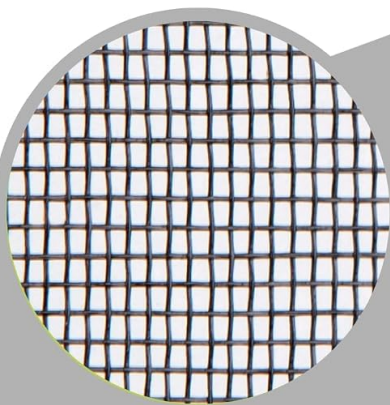

- **High-Quality Fiberglass Fabric:** Durable and tear-resistant welded mesh.
- **UV Resistant:** Designed for long-lasting outdoor use without degradation.
- **Effective Insect Protection:** Keeps out flies, mosquitoes, and other crawling or flying insects.
- **Suitable for Windows and Doors:** Versatile application for various openings.
- **Fine Mesh Size:** 1.26 x 1.44 mm, allowing sufficient fresh air and light.

A detailed view of the fine mesh fiberglass fabric, highlighting its high quality. The image also specifies the dimensions (100x130 cm) and advises cleaning with a damp cloth. It notes the mesh is almost invisible, allowing fresh air and light.

SETUP AND INSTALLATION

The Windhager Fiberglass Mosquito Net is designed for quick and easy installation using a velcro fastening system (velcro tape is included with the product). The entire process typically takes about 60 minutes.

Required Tools (Not Included):

- Measuring tape
- Scissors or utility knife
- Cleaning cloth and mild detergent

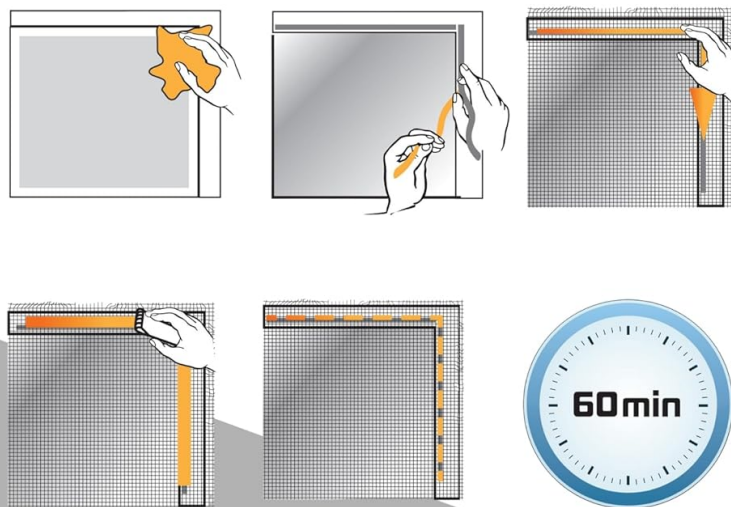

Installation Steps:

1. **Clean the Window Frame:** Ensure the window frame where the velcro will be applied is clean, dry, and free of dust or grease. Use a cleaning cloth and mild detergent if necessary, then dry thoroughly.
2. **Measure and Cut Velcro Tape:** Measure the perimeter of the inner window frame. Cut the adhesive velcro tape to match these measurements.

3. **Attach Velcro to Frame:** Carefully peel the backing from the adhesive velcro tape and firmly press it onto the inner perimeter of your window frame. Ensure it adheres smoothly and securely.
4. **Position the Mosquito Net:** Unroll the mosquito net. Hold it against the window frame, aligning one edge with the attached velcro.
5. **Attach the Net:** Starting from one corner, press the mosquito net firmly onto the velcro tape around the entire perimeter of the window frame. Ensure the net is taut and wrinkle-free.
6. **Trim Excess Net:** Once the net is securely attached, use scissors or a utility knife to carefully trim any excess material around the edges for a neat finish.

RAPIDO

Fissaggio

da fissare all'interno del telaio della
finestra tramite velcro

A visual guide demonstrating the quick installation of the mosquito net. It shows six steps, from cleaning the window frame to attaching the net with velcro, with a timer indicating a 60-minute installation.

The net can be removed at any time, offering a space-saving solution for insect protection.

This image shows the mosquito net folded, accompanied by a roll of velcro tape. It emphasizes the net's reliability, ease of removal, space-saving storage, and suitability for windows to protect against crawling and flying insects.

OPERATING INSTRUCTIONS

Once installed, the Windhager Fiberglass Mosquito Net operates passively, providing continuous insect protection. Simply open your window or door as usual, and the net will prevent insects from entering your living space. The fine mesh allows for natural ventilation and light transmission without obstruction.

HOME & GARDEN

This image illustrates the primary benefit of the mosquito net: protecting the home from insects. It shows a woman installing the net, and smaller insets depict a child waking up refreshed, a bright kitchen, and a person sleeping, emphasizing undisturbed living.

MAINTENANCE

To ensure the longevity and effectiveness of your Windhager Fiberglass Mosquito Net, follow these simple maintenance guidelines:

- **Cleaning:** Regularly clean the net with a damp cloth to remove dust, pollen, and other debris. For stubborn dirt, a mild soap solution can be used, followed by rinsing with a damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Inspection:** Periodically inspect the net for any signs of damage, such as tears or loose threads. Small damages can often be repaired with a repair kit (not included).
- **Storage:** If removing the net for the off-season, clean it thoroughly, allow it to dry completely, and then fold or roll it neatly. Store it in a dry, protected area away from direct sunlight to prevent material degradation.

TROUBLESHOOTING

If you encounter any issues with your Windhager Fiberglass Mosquito Net, consider the following:

- **Net not adhering to frame:** Ensure the window frame surface is clean and dry before applying the velcro. Press the velcro firmly along its entire length. If the adhesive has lost its strength, replace the velcro tape.
- **Insects entering:** Check for any gaps between the net and the frame, or tears in the net itself. Re-secure the net to the velcro or repair any damage.
- **Net sagging or wrinkling:** Ensure the net is pulled taut during installation. If it sags over time, gently re-stretch and re-attach it to the velcro.

For further assistance, please contact Windhager customer support.
