Windhager 03483

Windhager Fiberglass Mosquito Net User Manual

Model: 03483

PRODUCT OVERVIEW

The Windhager Fiberglass Mosquito Net (Model 03483) provides effective protection against insects for your home. Made from high-quality, fine-mesh fiberglass fabric, this net is UV resistant and designed for durability. It can be individually cut to size to fit various window types and is easily installed and removed.

INSTALLATION GUIDE

Preparation:

1. Ensure the window frame surface is clean and dry before installation.
2. Measure the exact dimensions of the window opening where the net will be installed.
3. Unroll the Windhager Fiberglass Mosquito Net.

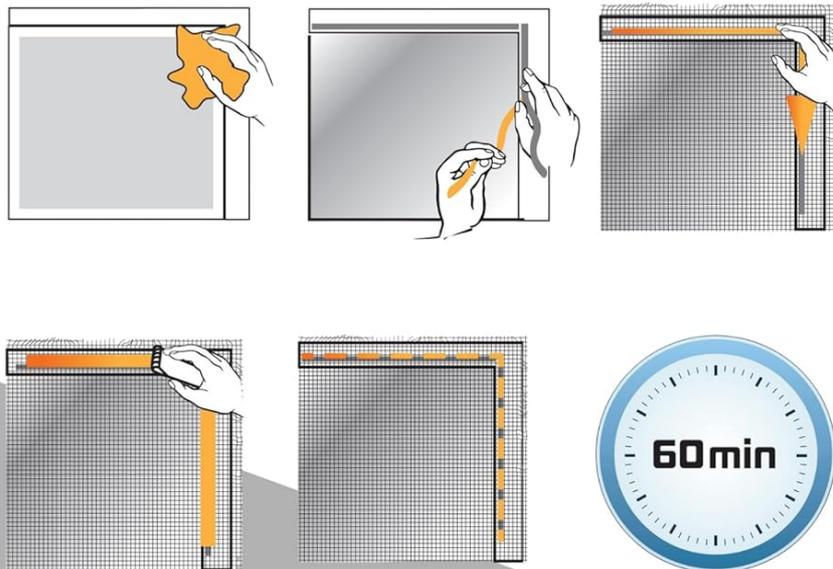

Cutting and Attachment:

1. Carefully cut the mosquito net to the measured dimensions using scissors. Ensure straight cuts for a neat fit.
2. Apply hook-and-loop tape (velcro, sold separately) around the inside perimeter of your window frame. Ensure the tape adheres firmly to the frame.
3. Press the cut mosquito net onto the hook-and-loop tape on the window frame, starting from one corner and smoothing it out to avoid wrinkles.
4. Ensure the net is taut and securely attached around all edges to prevent gaps where insects could enter.

The net can be installed within minutes and removed easily when not needed.

MAINTENANCE

To maintain the effectiveness and appearance of your Windhager Fiberglass Mosquito Net, follow these simple cleaning instructions:

- The net is washable at 30 °C. It is recommended to hand wash or use a gentle machine cycle.
- Use mild soap and water. Avoid harsh chemicals or abrasive cleaners that could damage the fiberglass material.
- Allow the net to air dry completely before re-installing it.
- For light cleaning, simply wipe the net with a damp cloth to remove dust and debris.

TROUBLESHOOTING

| Problem | Possible Cause / Solution |
|---------|---------------------------|
|---------|---------------------------|

| Problem | Possible Cause / Solution |
|---------------------------------|--|
| Net detaches from window frame. | Ensure the window frame surface is clean and dry before applying hook-and-loop tape. Use high-quality, strong adhesive hook-and-loop tape. Apply firm pressure when attaching the net to the tape. |
| Insects are still entering. | Check for any gaps between the net and the window frame. Ensure the net is cut to the correct size and is tautly attached around all edges. Inspect the net for any tears or holes. |
| Net appears wrinkled or saggy. | Ensure the net is stretched tautly when applying it to the hook-and-loop tape. Re-adjust if necessary to remove wrinkles. |

SPECIFICATIONS

Brand: Windhager

Model Number: 03483

Material: Fiberglass

Color: Anthracite (Grey)

Dimensions (as per current product): 150 x 300 cm (59 x 118 inches)

Product Dimensions (packaged): 7 x 9 x 18 cm; 150 grams

Installation Depth: 0 mm (no additional space required)

Washable: Yes, at 30 °C

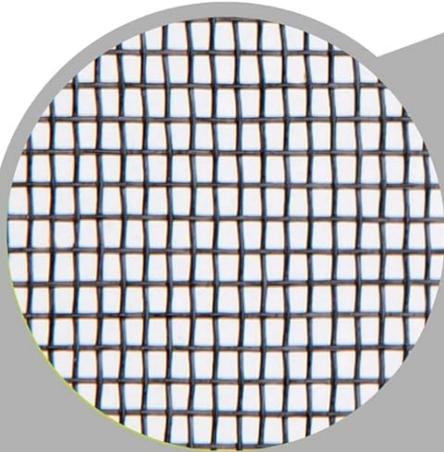

UV Resistant: Yes
