1. Remove all attached weapons from the figure.
2. Fold the robot's hands into the forearms.
3. Rotate the waist 180 degrees.
4. Collapse the legs and feet, aligning them to form the rear section of the jet.
5. Fold the robot's chest and head section down, tucking the head away.
6. Extend the wings from the back of the figure and lock them into place.
7. Align and secure all panels to form a cohesive jet fuselage.
8. Attach the blaster weapons to the designated ports under the wings or fuselage in jet mode.

4. MAINTENANCE

To maintain the condition of your Skywarp action figure:

- **Cleaning:** Use a soft, dry cloth to gently wipe away dust. For stubborn dirt, a slightly damp cloth with mild soap can be used, followed by immediate drying. Avoid harsh chemicals or abrasive materials.
- **Storage:** Store the figure away from direct sunlight, extreme temperatures, and high humidity to prevent discoloration or material degradation.
- **Handling:** Handle the figure by its main body parts. Avoid excessive force on joints or thin plastic components during transformation.

5. TROUBLESHOOTING

If you encounter difficulties during transformation or with the figure's articulation, consider the following:

- **Stiff Joints:** Some joints may be stiff initially. Gently work them back and forth to loosen them. Do not apply excessive force.
- **Parts Not Aligning:** Review the transformation steps carefully. Ensure all previous steps are completed correctly and that parts are oriented as shown in the instructions. Sometimes, a small adjustment can resolve alignment issues.
- **Loose Parts:** If a part feels loose, check if it is meant to be detachable or if it needs to be re-secured into a specific slot or peg.
