Peavey PV-1 Dual Receiver Rack Mount Kit Instruction Manual

INTRODUCTION

This instruction manual provides guidance for the proper installation and use of the Peavey Rack Mount Kit for PV-1 Dual Receivers. This kit is designed to securely mount two single half-rack Peavey PV-1 wireless microphone receivers into a standard EIA equipment rack, optimizing space and organization within your audio setup.

PACKAGE CONTENTS

Please verify that all components listed below are present in your package:

- Two (2) L-shaped rack ears
- Two (2) flat connecting plates
- Necessary mounting screws (not explicitly shown but implied for assembly)

SETUP AND INSTALLATION

Follow these steps to properly install your Peavey PV-1 wireless microphone receivers into a standard EIA rack using this kit:

1. **Prepare Receivers:** Ensure both Peavey PV-1 wireless receivers are powered off and disconnected from any cables.
2. **Attach Connecting Plates:** Secure one flat connecting plate to the side of the first PV-1 receiver using the provided screws. Repeat this for the second PV-1 receiver, attaching the other flat connecting plate to its opposite side. These plates will join the two receivers together.
3. **Join Receivers:** Align the two PV-1 receivers side-by-side. Use the remaining screws to connect the two flat plates,

effectively joining the two receivers into a single unit.

- 4. **Attach Rack Ears:** Secure one L-shaped rack ear to each outer side of the now-joined receiver unit. The longer flange of the L-bracket should face forward, with its holes aligning with the rack's mounting points.
- 5. **Mount in Rack:** Carefully slide the assembled unit into your standard EIA equipment rack. Secure the L-shaped rack ears to the rack rails using appropriate rack screws (typically not included with this kit, but standard for rack mounting).
- 6. **Connect Cables:** Once securely mounted, reconnect all necessary audio and power cables to your PV-1 receivers.

Ensure all screws are tightened securely to prevent movement or vibration during operation.

OPERATING INSTRUCTIONS

This rack mount kit is a passive accessory designed to house your Peavey PV-1 wireless receivers. It does not have any operational functions itself. Once the receivers are securely mounted, refer to the individual instruction manuals for your Peavey PV-1 wireless receivers for their specific operating procedures.

MAINTENANCE

The rack mount kit requires minimal maintenance. Periodically inspect all mounting screws to ensure they remain tight. Clean the metal surfaces with a soft, dry cloth as needed to remove dust. Avoid using abrasive cleaners or solvents, as these may damage the finish.

TROUBLESHOOTING

- **Receivers not fitting:** Ensure you are attempting to mount two single half-rack Peavey PV-1 wireless receivers. This kit is specifically designed for these models.
- **Loose in rack:** Verify that all screws connecting the rack ears to the receivers and the rack ears to the equipment rack are securely tightened.
- **Missing parts:** Refer to the "Package Contents" section. If any parts are missing, contact Peavey customer support.
