TRIXIE 12684

Trixie 12684 Flash Light Band USB Instruction Manual

Model: 12684 | Brand: TRIXIE

1. PRODUCT OVERVIEW

The Trixie 12684 Flash Light Band USB is a rechargeable silicone light band designed to enhance the visibility of your dog in low-light conditions. It features both flashing and continuous light modes and is adjustable to fit various dog sizes.

Image 1.1: The Trixie Flash Light Band USB in green. This flexible silicone band provides illumination for increased visibility.

2. PACKAGE CONTENTS

- 1 x Trixie Flash Light Band (Green, M/L: 50 cm/18 mm)

- 1 x USB Charging Cable

Image 2.1: The included USB charging cable, used to recharge the light band's internal battery.

3. SETUP AND FIRST USE

3.1 Initial Charging

1. Locate the charging port on the light band. This is typically covered by a small silicone flap.
2. Connect the small end of the provided USB cable to the light band's charging port.
3. Connect the larger end of the USB cable to a standard USB power source (e.g., computer USB port, USB wall adapter).
4. Allow the device to charge fully before first use. An indicator light will typically change color or turn off when charging is complete.

3.2 Sizing and Adjustment

The Trixie Flash Light Band can be individually adjusted by cutting it to the required length. This ensures a comfortable and secure fit for your dog.

1. Measure your dog's neck circumference to determine the appropriate length.
2. Carefully cut the silicone band to the desired size using sharp scissors. Ensure you cut only the non-illuminated sections and avoid cutting near the LED components or the control unit.
3. Test the fit on your dog, ensuring it is snug but not too tight, allowing two fingers to comfortably fit between the band and your dog's neck.

3.3 Attaching to Your Dog

Once sized, the light band can be placed directly around your dog's neck. It is designed to be worn in addition to, or instead of, a regular collar, depending on your preference and local regulations.

Image 3.1: The light band is rechargeable via USB, protected from splashes, and suitable for all dog sizes after adjustment.

4. OPERATING INSTRUCTIONS

4.1 Power On/Off

To turn the light band on or off, press the power button located on the control unit. The button is typically integrated into the silicone band.

4.2 Changing Light Modes

The light band offers multiple illumination modes: flashing and continuous light. Press the power button repeatedly to cycle through the available modes:

- **First Press:** Activates continuous light mode.
- **Second Press:** Activates flashing light mode.
- **Third Press:** Turns the light band off.

4.3 Usage Tips

- Always ensure the light band is fully charged before extended use.
- Use the light band during dawn, dusk, or night walks to significantly improve your dog's visibility to pedestrians, cyclists, and motorists.
- While the band is splash-protected, avoid prolonged submersion in water to prevent damage to the electronic components.
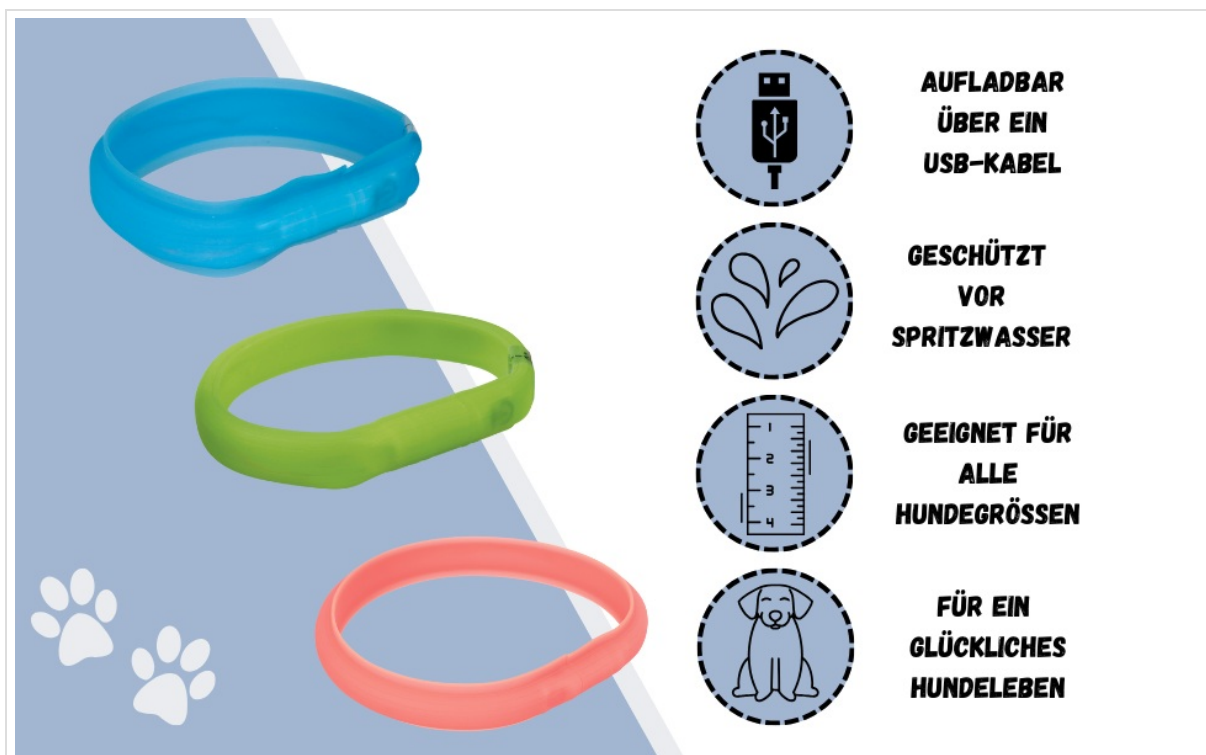

Image 4.1: The light band ensures your dog is clearly visible in the dark, enhancing safety.

5. MAINTENANCE

5.1 Cleaning

To clean the light band, wipe it with a damp cloth. Do not use harsh chemicals or abrasive cleaners, as these may damage the silicone material or electronic components. Ensure the charging port flap is securely closed before cleaning.

5.2 Charging

Recharge the light band via the USB cable when the light appears dim or stops functioning. Regular charging helps maintain battery health. The battery is rechargeable via USB cable.

5.3 Storage

Store the light band in a cool, dry place away from direct sunlight and extreme temperatures when not in use. Ensure it is clean and fully charged before storing for extended periods.

6. TROUBLESHOOTING

- **Light band does not turn on:**
  Ensure the battery is charged. Connect the light band to a USB power source and allow it to charge for at least 30 minutes. Press the power button firmly.

- **Light is dim or flickers:**
  The battery may be low. Recharge the light band fully.

- **Light band does not hold a charge:**
  The internal battery may have reached the end of its lifespan. Contact TRIXIE customer support for assistance.

- **Light band does not respond to button presses:**
  Ensure the battery is charged. If the issue persists, try resetting by fully discharging and then

recharging the unit. If the problem continues, contact customer support.

7. SPECIFICATIONS

Feature	Detail
Model Number	12684
Material	Silicone
Color	Green
Dimensions (M/L)	50 cm length / 18 mm width (adjustable)
Battery	1 Lithium-ion battery (included, rechargeable via USB)
