Key Features:

- **Removes Residue Easily:** Softens sticky substances for quick and easy removal.
- **Gentle on Surfaces:** Can be used on painted surfaces, vinyl, and fabric when properly used. Always test on an inconspicuous area first.
- **Versatile Application:** Ideal for auto repair and detailing shops to keep vehicles clean from residue.
- **Non-Corrosive:** Safe for use on metal parts.

4. SETUP

1. Ensure the work area is well-ventilated.
2. Wear protective gloves and eyewear.
3. Identify the adhesive or residue to be removed.
4. Test the cleaner on a small, inconspicuous area of the surface to ensure compatibility and prevent damage.

5. OPERATING INSTRUCTIONS

General Adhesive Removal:

1. Apply a small amount of 3M General Purpose Adhesive Cleaner directly onto the adhesive residue.
2. Allow the cleaner to soak for a few seconds to soften the adhesive. The duration may vary depending on the type and age of the adhesive.
3. Using a clean, soft cloth or a plastic scraper, gently wipe or scrape away the softened adhesive.
4. Repeat the process if necessary for stubborn residue.
5. Wipe the area clean with a fresh cloth to remove any remaining cleaner or residue.

6. MAINTENANCE

- Store the 3M General Purpose Adhesive Cleaner in its original container, tightly closed, in a cool, dry, well-ventilated area away from direct sunlight and heat sources.
- Ensure all tools used for application and removal (e.g., cloths, scrapers) are cleaned thoroughly after each use or disposed of properly according to local regulations.
- Avoid prolonged exposure of the product to air to prevent evaporation and maintain effectiveness.

7. TROUBLESHOOTING

Common Issues and Solutions:

- **Issue:** Adhesive residue is not softening or removing easily.
Solution: Ensure sufficient product is applied and allowed adequate dwell time. For very old or stubborn adhesives, a second application or longer soaking time may be required. Use a plastic

scraper for gentle agitation.

- **Issue:** Product is leaking from the container cap.

Solution: Ensure the cap is securely tightened. If the cap is damaged or does not seal properly, contact the manufacturer for a replacement or transfer the product to a suitable, tightly sealable container, ensuring proper labeling.

- **Issue:** Surface discoloration or damage after use.

Solution: This indicates the product may not be compatible with the surface material. Always perform a patch test on an inconspicuous area before full application. Discontinue use if adverse reactions occur.
