### PACKAGE CONTENTS

- 2 x Geekria Replacement Ear Pads (Black)
- 1 x Installation Tool (plastic stick)

Image: The package contents, including two black replacement ear pads and a blue plastic installation tool, laid out on a wooden table.

## INSTALLATION INSTRUCTIONS

---

Follow these steps to replace your old ear pads with the new Geekria ear pads:

1. **Remove Existing Earpad:** Gently tear off or peel away the worn-out earpad from your headphone cup.
2. **Align New Earpad:** Position the new Geekria ear pad over the headphone cup, ensuring the edges align with the groove.
3. **Slip Edge into Gap:** Carefully slip one section of the ear pad's edge into the gap or groove on the headphone cup.
4. **Secure the Earpad:** Using the provided installation tool or your finger, draw the remaining edge of the ear pad around the headphone cup, pushing the entire edge firmly into the gap until it is fully seated and secure.

# Installation

**1** Tear off the existing earpad

**2** Slip the edge into the gap

**3** Draw the edge with stick/your finger

**4** Push the whole edge into the gap

## USAGE AND COMFORT

Once installed, your new Geekria ear pads will provide enhanced comfort and improved sound isolation. The memory foam conforms to the shape of your ears, offering a personalized fit, while the protein leather ensures a soft touch. Allow a short period for the memory foam to fully adapt to your ear shape for optimal comfort.

## CARE AND MAINTENANCE

To ensure the longevity of your replacement ear pads, follow these care guidelines:

- **Cleaning:** Wipe the protein leather surface gently with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the material.
- **Storage:** When not in use, store your headphones in a clean, dry place away from direct sunlight and extreme temperatures.
- **Avoid Punctures:** Be careful not to puncture or tear the protein leather, as this can compromise the integrity of the ear pads.

## TROUBLESHOOTING

| Issue                              | Possible Cause                                                | Solution                                                                                                                                                 |
|------------------------------------|---------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Ear pads do not fit                | Incorrect headphone model or improper installation.           | Verify your headphone model is <b>Sennheiser Momentum Over-Ear</b> . Re-attempt installation, ensuring the entire edge is securely seated in the groove. |
| Reduced sound quality or isolation | Ear pads not fully sealed or improperly installed.            | Ensure the ear pads are completely and evenly seated around the headphone cups to create a proper seal.                                                  |
| Discomfort during use              | New ear pads require break-in period or improper positioning. | Allow a few hours of use for the memory foam to adapt to your ear shape. Adjust headphone positioning for optimal comfort.                               |
