Cigar Oasis Plus

Cigar Oasis Plus/XL-Plus Refill Cartridge Instruction Manual

Model: Plus

1. PRODUCT OVERVIEW

This manual provides instructions for the proper use and maintenance of the Cigar Oasis Plus/XL-Plus Refill Cartridge. This cartridge is designed exclusively for the Cigar Oasis Plus (2.0/3.0) Humidification System.

The refill cartridge is pre-treated and shipped without fluid. Distilled water must be added before use.

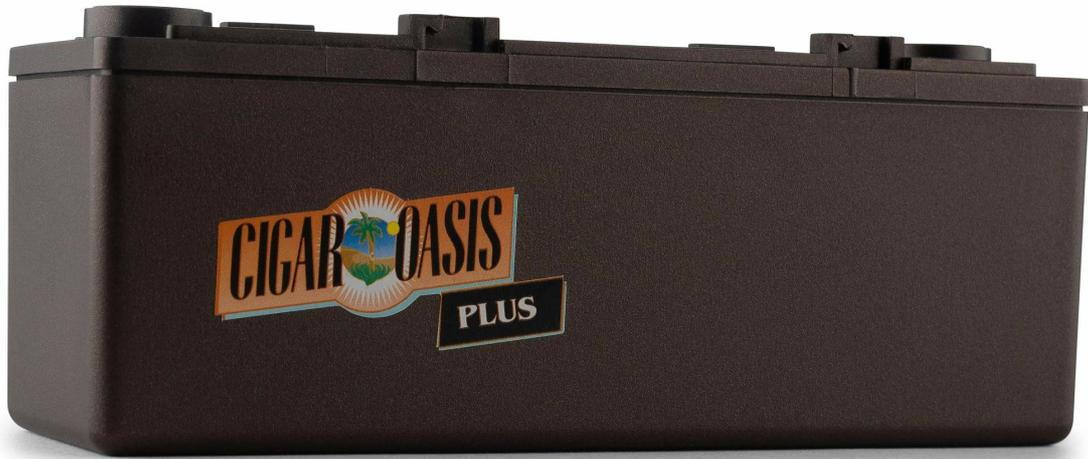

Image 1: The Cigar Oasis Plus Refill Cartridge. This image shows the dark brown rectangular cartridge with the "Cigar Oasis Plus" logo prominently displayed on its side.

2. SETUP AND ASSEMBLY

2.1 Cartridge Refill Instructions

The refill cartridge is supplied dry and requires distilled water before initial use or refilling.

1. **Pour distilled water:** Carefully pour distilled water into the large opening located in the center of the cartridge. Allow time for the water to absorb. Repeat this process until the cartridge no longer absorbs water.
2. **Empty excess water:** After absorption, empty all remaining water out of the cartridge. Only damp foam should remain inside. **Important:** No water should drip out when the cartridge is held upside down.
3. **Dry and reassemble:** Thoroughly dry the exterior of the cartridge before reassembling the unit.

2.2 Assembling Your Cigar Oasis Unit

Once the water cartridge is properly filled with distilled water, proceed with assembling it into your Cigar Oasis unit:

1. **Position the cartridge:** Place the filled water cartridge on a stable surface with the "Cigar

Oasis" sticker facing towards you.

2. **Align the control top:** Take the control top (the part with the screen) and position it on top of the cartridge. Ensure the screen side is on the left and align the notches present on both the cartridge and the control top.
3. **Lock into place:** While holding the cartridge steady, slide the control top to the left (push from the side with the logo) until it securely locks into its designated position.

The Refill Cartridge is pre-treated and ships without fluid ("Dry") Follow the instructions below.

Cartridge Refill Instructions

1. Pour distilled water only into large opening in the center of the cartridge and wait for water to absorb. Repeat until cartridge stops absorbing water.
2. Empty all remaining water out of the cartridge so only damp foam remains. ****No water should drip out when the cartridge is held upside down**.**
3. Dry off the cartridge and put the unit back together.

Assembling your Cigar Oasis

Locate the water cartridge which must be filled with distilled water only (see refill instructions below).

1. Place the cartridge on a table with the Cigar Oasis sticker facing you.
2. Place the control top with the screen on the left side on top of the cartridge while aligning the notches on both pieces.
3. Hold the cartridge in place while sliding the control top left (push from the logo side) until it locks into place.

Image 2: Diagram illustrating the refill and assembly steps for the Cigar Oasis cartridge. This image shows a visual guide for pouring water into the cartridge and then attaching the control unit.

3. OPERATING INSTRUCTIONS

Once the refill cartridge is properly filled and assembled into your Cigar Oasis humidification system, the unit is ready for operation. Refer to your main Cigar Oasis humidification system manual for specific operating instructions, humidity settings, and placement within your humidior. The refill cartridge's primary function is to provide the necessary moisture for the humidification system to maintain optimal humidity levels.

4. MAINTENANCE

Regular maintenance of your refill cartridge ensures optimal performance of your Cigar Oasis humidification system.

- **Refilling:** Refill the cartridge with distilled water as needed, following the instructions in Section 2.1. The frequency of refilling depends on the humidor's size, seal, and ambient conditions.
- **Cartridge Replacement:** It is recommended to replace the water cartridge approximately once a year. Over time, the foam inside the cartridge may become less absorbent, reducing its efficiency.
- **Cleaning:** Periodically inspect the cartridge for any signs of mold or residue. If cleaning is necessary, use only distilled water and a soft cloth. Avoid harsh chemicals.

5. TROUBLESHOOTING

If you experience issues with your Cigar Oasis humidification system after refilling or replacing the cartridge, consider the following:

- **Low Humidity:** Ensure the cartridge is adequately filled with distilled water and that no excess water is present. Check the seal of your humidor.
- **Unit Not Functioning:** Verify that the control top is correctly assembled and locked onto the cartridge as described in Section 2.2. Ensure the main Cigar Oasis unit is receiving power.
- **Unusual Odors:** If any unusual odors are detected, immediately remove the cartridge and inspect it. Ensure only distilled water is used. If the issue persists, replace the cartridge.

For further assistance, please refer to the main Cigar Oasis humidification system manual or contact Cigar Oasis customer support.

6. SPECIFICATIONS

Feature	Detail
Product Dimensions	6 inches (Length) x 3 inches (Width) x 2.5 inches (Height)
Item Weight	3.2 ounces
Capacity	177 Milliliters
Compatibility	Cigar Oasis Plus (2.0/3.0) Humidification System

7. WARRANTY AND SUPPORT
