

Surtek PMM45

Surtek PMM45 Foldable Handle Hose Reel 45m User Manual

Model: PMM45 | Brand: Surtek

INTRODUCTION

Thank you for choosing the Surtek PMM45 Foldable Handle Hose Reel. This manual provides essential information for the safe and efficient assembly, operation, and maintenance of your new hose reel. Please read these instructions carefully before use and retain them for future reference.

PRODUCT OVERVIEW

The Surtek PMM45 hose reel is designed to facilitate the winding and storage of garden hoses, keeping your outdoor space organized. It features a durable plastic construction and a foldable handle for compact storage.

Key Features:

- Can be fixed to any flat surface (floor-standing design).
- Facilitates hose rewinding and storage.
- Hose capacity: 30m - 45m (depending on hose diameter).
- Compact style with a foldable handle.

Components:

The hose reel consists of a main reel body, a foldable winding handle, and a sturdy frame. It includes necessary connections for hose attachment.

Figure 1: Front view of the Surtek PMM45 Foldable Handle Hose Reel, showing the main reel and frame.

Figure 2: Side view of the hose reel, highlighting the winding mechanism and connection points.

Careful assembly and connection are crucial for optimal performance and to prevent leaks. The hose reel is designed for floor use and can be placed on any flat surface.

1. Unpacking and Initial Inspection:

1. Remove all components from the packaging.
2. Verify that all parts are present and undamaged. The package should include the hose reel with a foldable handle and this user manual.

Figure 3: The Surtek PMM45 hose reel as packaged, showing the product and its box.

2. Assembling the Handle and Frame:

1. Attach the foldable winding handle to the side of the reel. Ensure it clicks securely into place for proper operation.
2. The main frame is typically pre-assembled with the reel. Ensure all connections are tight.

Figure 4: Close-up of the winding mechanism and handle attachment point on the hose reel.

3. Connecting Your Garden Hose:

1. **Internal Connection:** Locate the short internal hose connection point on the side of the reel (often a small elbow fitting). Connect one end of your main garden hose to this fitting. Ensure a tight, leak-free connection. *Note: You may need an additional hose connector or adapter depending on your hose type.*
2. **Feeder Hose Connection:** To connect the reel to your water source (e.g., a spigot), you will need a separate, short feeder hose (not included). Connect one end of this feeder hose to the external inlet on the reel (usually opposite the winding handle) and the other end to your water spigot. *Note: Quick connectors and additional adapters may be required for a secure setup.*
3. **Hose Winding:** Begin winding your garden hose onto the reel. Ensure the hose is evenly distributed to prevent kinking and maximize capacity.

Figure 5: Detail of the internal connection point where the main garden hose attaches to the reel's water path.

Figure 6: Close-up of the winding handle and the external inlet connection for the feeder hose.

OPERATING INSTRUCTIONS

Winding the Hose:

- Ensure the hose is free of kinks and obstructions.
- Turn the winding handle clockwise to retract the hose onto the reel.
- Guide the hose evenly across the reel to prevent tangling and ensure maximum capacity.
- Once fully wound, the foldable handle can be collapsed for compact storage.

Unwinding the Hose:

- Pull the hose gently from the reel to unwind it.
- The reel will rotate freely as the hose is pulled.
- Avoid pulling too forcefully to prevent damage to the hose or reel.

MAINTENANCE

- **Cleaning:** Clean the hose reel periodically with mild soap and water. Rinse thoroughly and allow to dry. Avoid abrasive cleaners.
- **Storage:** Store the hose reel in a shaded area when not in use, especially during extreme weather conditions, to prolong its lifespan.
- **Leak Checks:** Regularly inspect all hose connections for leaks. Tighten connections or replace washers as needed.
- **Hose Condition:** Periodically check your garden hose for cracks, punctures, or wear. Replace damaged hoses to ensure efficient watering.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Water leaks from connections.	Loose connections, worn washers, incompatible connectors.	Tighten all connections. Replace old or damaged rubber washers. Ensure all connectors are compatible with your hose and the reel's fittings. You may need additional quick connectors or adapters.
Hose kinks when winding/unwinding.	Uneven winding, hose material stiffness.	Guide the hose evenly across the reel during winding. Ensure the hose is fully extended and free of twists before winding.
Difficulty winding the hose.	Hose is too heavy/long for capacity, internal obstruction.	Ensure your hose length and diameter are within the reel's specified capacity (30m-45m). Check for any debris or kinks preventing smooth winding.

SPECIFICATIONS

- Model Number:** PMM45
- Brand:** Surtek
- Material:** Plastic
- Color:** Black with yellow
- Dimensions (L x W x H):** 30.5 x 44.5 x 45 cm (12 x 17.5 x 17.7 inches)
- Hose Capacity:** 30m - 45m (depending on hose diameter)
- Operation:** Manual
- Item Weight:** 1.5 Kilograms
- UPC:** 660731202373

WARRANTY AND SUPPORT

The Surtek PMM45 Foldable Handle Hose Reel comes with a **10-year warranty** against manufacturing defects. For warranty claims, technical support, or replacement parts, please contact Surtek customer service through your retailer or the official Surtek website.
