## simplehuman Code H

# simplehuman Code H Custom Fit Liners Instruction Manual

Model: Code H

### INTRODUCTION

The simplehuman Code H Custom Fit Liners are specifically designed to perfectly fit simplehuman trash cans, ensuring a neat appearance and efficient waste management. These liners are engineered for durability and convenience, preventing rips and leaks while offering easy dispensing and handling. This manual provides essential information for the proper use and maintenance of your simplehuman Code H liners.

### KEY FEATURES

- **Perfect Fit:** Custom tailored to fit simplehuman cans, preventing messy bag overhang or bunching and staying neatly hidden when the lid is closed.
- **No Rips, No Punctures:** Constructed with extra-durable plastic and thick double seams to withstand heavy loads without tearing or leaking.
- **One-by-One Dispensing:** Quick-dispense packs allow for easy retrieval of liners individually, eliminating the hassle of hard-to-find perforations or messy unraveling.
- **Convenient Drawstring Handles:** Designed for easy lifting, tying, and carrying, simplifying the process of trash removal.
- **Integrated Storage:** Dispenser packs are designed to fit perfectly in the liner pocket found inside simplehuman sensor and step cans, ensuring a fresh liner is always accessible for faster changes.

### SETUP & INSTALLATION

1. **Loading the Dispenser Pack:** Locate the liner pocket inside your simplehuman trash can (typically on the side or back of the inner bucket). Open the dispenser pack of Code H liners and insert the entire pack into the liner pocket. Ensure the opening of the pack aligns with the dispenser slot for easy access.
2. **Inserting a New Liner:** Pull the first liner from the dispenser pack. Drape the liner over the rim of the inner bucket of your simplehuman trash can. Smooth out any wrinkles to ensure a snug fit. The custom design will

prevent slippage and keep the liner neatly tucked away.

## COMPLETE THE TRASH SYSTEM

### Liner Pocket Trash Cans

Our liner pocket makes it easy to store our custom fit liner dispenser packs right inside our sensor and step cans, so a fresh liner is always at your fingertips for a faster liner change.

Video: This video demonstrates the simplehuman custom fit liners, showcasing their perfect fit within the trash can, the strong double seams, and the convenient one-by-one dispensing from the integrated liner pocket. It highlights the ease of changing bags and the overall durability.

## OPERATING INSTRUCTIONS

- 1. Filling the Liner:** Dispose of waste into the liner as usual. The durable plastic and double seams are designed to hold a significant amount of trash without ripping or puncturing.
- 2. Tying the Drawstring:** Once the liner is full, pull the drawstring handles upwards to cinch the bag closed. Tie the handles together securely to contain the contents and odors.
- 3. Removing the Liner:** Lift the tied liner out of the trash can. The strong drawstring handles make it easy to carry the bag to your outdoor waste bin.

Image: A hand securely holds the drawstring of a simplehuman Code H trash bag, demonstrating the ease of lifting and carrying a full bag without spills.

## MAINTENANCE

- **Cleaning the Trash Can:** The stainless steel construction of simplehuman trash cans makes them easy to

clean. Wipe down the exterior and interior of the can with a damp cloth and mild detergent as needed. Avoid abrasive cleaners that could damage the finish.

- **Replacing Odorsorb Pods:** If your simplehuman trash can is equipped with an Odorsorb Pod, replace it every 45 days to effectively neutralize trash odors. Refer to your trash can's specific instructions for Odorsorb Pod replacement.

Image: A simplehuman Odorsorb Pod, which neutralizes trash odors for up to 45 days, is shown in its designated slot under the trash can lid.

Video: This video provides a review of a simplehuman dual trash and recycling bin, highlighting its features including the Odorsorb pod for odor control and the convenient liner pocket. It demonstrates the ease of use and maintenance for a clean and organized home.

## TROUBLESHOOTING

- **Liner Rips or Punctures:** Ensure the liner is not overfilled beyond its capacity. Avoid placing sharp objects directly into the liner without proper cushioning. If rips persist, verify you are using genuine simplehuman custom fit liners, which are designed for strength.
- **Liner Slipping:** Confirm that the correct Code H liner size is being used for your simplehuman trash can. The custom fit design should prevent slippage. Ensure the liner is properly draped over the inner bucket's rim.
- **Difficulty Dispensing:** Check that the liner pack is correctly inserted into the liner pocket with the dispensing opening facing outwards. Gently pull the next liner to ensure it separates cleanly.

## SPECIFICATIONS

<b>Brand</b>	simplehuman
<b>Model</b>	Code H
<b>Capacity</b>	30-35 Liters / 8-9.2 Gallons
<b>Unit Count</b>	60 Count (Pack of 1)
