SETUP AND INSTALLATION

Before You Begin

- Unpack all components and inspect for any damage. Report any damage immediately to your retailer.
- Ensure you have all necessary tools and additional plumbing supplies (e.g., sealant, supply lines) not included.
- Turn off the main water supply to the installation area.

Tools Required (Example)

- Phillips head screwdriver
- Adjustable wrench
- Level
- Drill
- Measuring tape
- Sealant (silicone)

Installation Steps

1. **Prepare the Installation Area:** Clear the area where the vanity will be installed. Ensure plumbing rough-ins are correctly positioned.
2. **Assemble the Vanity Base:** Follow the included assembly instructions for the cabinet structure. This typically involves attaching legs and securing cabinet panels.
3. **Position the Vanity:** Carefully move the assembled vanity base into its final position. Use a level to ensure it is perfectly horizontal. Adjust the leg levelers if necessary.
4. **Install the Countertop:** Apply a bead of silicone sealant along the top edges of the vanity cabinet where the countertop will rest. Carefully place the countertop onto the cabinet, ensuring proper alignment. Allow the sealant to cure as per manufacturer instructions.
5. **Install the Vessel Sink:** Place the vessel sink onto the designated area on the countertop. Apply a thin bead of silicone sealant around the base of the sink to secure it and prevent water leakage. Connect the pop-up drain assembly to the sink.
6. **Connect Plumbing:** Connect the P-trap to the pop-up drain and the wall drainpipe. Connect the hot and cold water supply lines to the faucet (faucet not included) and then to the wall supply valves. Ensure all connections are tight to prevent leaks.
7. **Install Mirror (if applicable):** If a mirror is included or being installed, mount it securely to the wall above the vanity using appropriate hardware for your wall type.
8. **Final Checks:** Turn on the water supply and check all plumbing connections for leaks. Test the faucet and drain. Ensure all drawers and doors operate smoothly.

- **Ceramic Sink:** Clean the ceramic vessel sink with a mild, non-abrasive bathroom cleaner and a soft sponge or cloth. Rinse thoroughly with water and dry to prevent water spots.
- **Glass Panels:** Use a standard glass cleaner and a lint-free cloth for the frosted glass panels.
