6. TROUBLESHOOTING

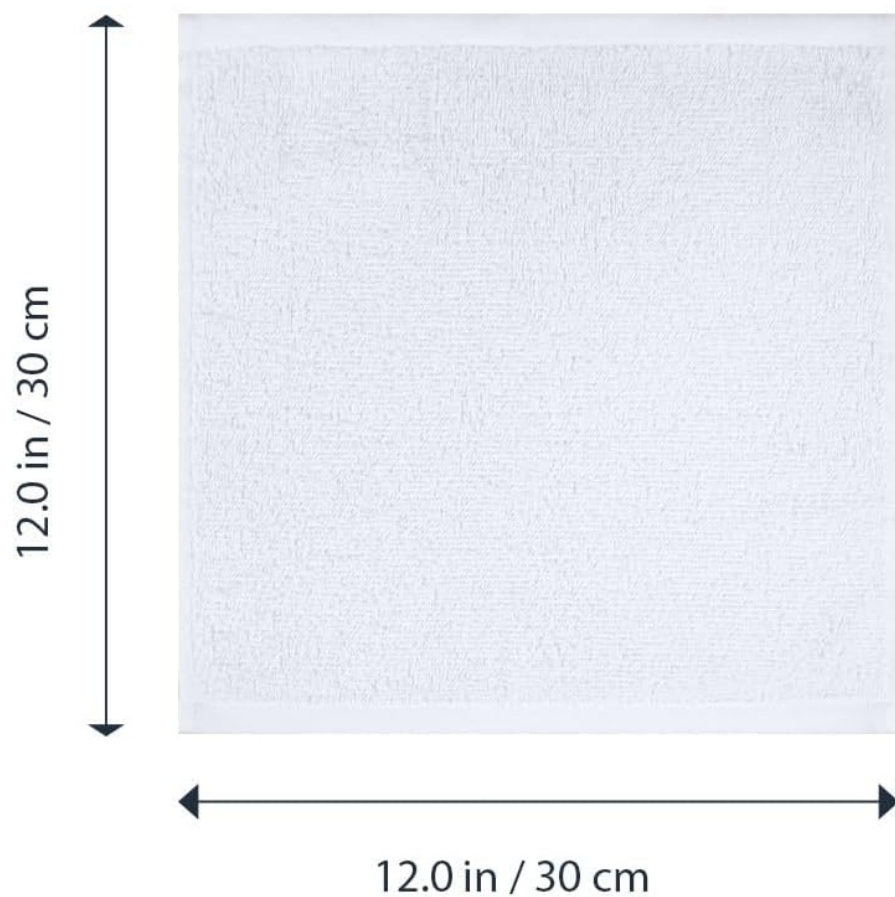

This section addresses common concerns regarding the washcloths.

Problem	Possible Cause	Solution
Washcloths feel stiff after washing.	Hard water, overuse of detergent, or air drying without agitation.	Use less detergent. Consider adding white vinegar to the rinse cycle. Tumble dry on low heat to restore softness.
Fraying edges.	Excessive wear or improper washing/drying.	The washcloths feature reinforced edges to minimize fraying. Ensure care instructions are followed. If fraying occurs, trim loose threads carefully.
Reduced absorbency.	Fabric softener buildup or natural wear over time.	Avoid using fabric softeners, as they can coat fibers and reduce absorbency. Wash with white vinegar periodically to remove buildup.
