## Humminbird 10

# Humminbird IMDK H5 In-Dash Mounting Kit User Manual

Model: 10

### PRODUCT OVERVIEW

The Humminbird IMDK H5 In-Dash Mounting Kit is designed to provide a secure and integrated mounting solution for your Humminbird HELIX 5 Series fish finder. This kit allows for a clean, flush installation directly into your boat's dashboard, offering a professional appearance and protecting your device.

**Figure 1:** Humminbird IMDK H5 In-Dash Mounting Kit. This image shows the rectangular plastic bezel with a black border, designed for flush mounting a HELIX 5 Series unit into a dashboard.

## SETUP AND INSTALLATION

---

Proper installation of the IMDK H5 kit is crucial for the stability and longevity of your HELIX 5 unit. Follow these steps carefully:

1. **Prepare the Mounting Surface:** Identify a flat, stable area on your boat's dashboard that can accommodate the dimensions of the mounting kit and the HELIX 5 unit. Ensure there is sufficient clearance behind the dash for wiring and the depth of the unit.
2. **Trace the Cutout:** Use the provided template (if included, or measure precisely according to the HELIX 5 unit's dimensions) to trace the required cutout shape onto the dashboard. Double-check measurements before cutting.
3. **Cut the Opening:** Carefully cut the traced opening using appropriate tools (e.g., jigsaw, rotary tool). Ensure the edges are clean and smooth. File or sand any rough edges.
4. **Test Fit:** Insert the IMDK H5 mounting kit into the cutout to ensure a snug fit. It should fit without excessive force but also without significant gaps.
5. **Install the Mounting Kit:** Secure the IMDK H5 bezel into the dashboard opening. Depending on the kit design, this may involve screws, clips, or an adhesive gasket. Ensure it is flush and stable.
6. **Mount the HELIX 5 Unit:** Once the mounting kit is secured, slide your Humminbird HELIX 5 Series unit into the bezel. The unit should click or fasten securely into place.
7. **Connect Wiring:** Route and connect all necessary power, transducer, and accessory cables to your HELIX 5 unit. Ensure connections are secure and protected from moisture.
8. **Final Check:** Verify that the HELIX 5 unit is firmly seated in the mounting kit and that all connections are correct.

*Note:* Always refer to the specific installation instructions provided with your Humminbird HELIX 5 Series unit for detailed wiring and operational guidelines.

## OPERATION

---

Once installed, the Humminbird IMDK H5 In-Dash Mounting Kit provides a stable and integrated platform for your HELIX 5 Series fish finder. The kit itself does not have operational controls; its function is to securely hold the device. Ensure the HELIX 5 unit is properly seated and locked into the bezel to prevent movement during operation of your vessel.

## MAINTENANCE

---

The IMDK H5 mounting kit requires minimal maintenance. Regular cleaning and inspection will ensure its longevity and continued performance:

- **Cleaning:** Wipe the surface of the mounting kit with a soft, damp cloth to remove dust, dirt, or salt residue. Avoid abrasive cleaners or solvents that could damage the plastic material.
- **Inspection:** Periodically check the mounting kit for any signs of wear, cracks, or loosening. Ensure all screws (if applicable) are tight and the unit remains securely seated.
- **Environmental Protection:** While designed for marine environments, prolonged exposure to extreme UV light or harsh chemicals can degrade the material over time. Consider covering your unit when not in use for extended periods.

## TROUBLESHOOTING

---

Most issues related to the mounting kit are installation-dependent. Here are some common concerns:

- **Unit is Loose in the Mount:**

- Ensure the HELIX 5 unit is fully pushed into the bezel until it locks into place.
- Verify that the cutout dimensions match the kit's specifications precisely. An oversized cutout will result in a loose fit.
- Check if any internal clips or securing mechanisms within the kit are damaged or not engaged.

- **Mounting Kit Does Not Fit Cutout:**

- Re-measure the cutout and compare it to the kit's dimensions. The cutout may be too small.
- Carefully trim or file the edges of the cutout to achieve the correct size. Do not force the kit into an undersized opening.

- **Gaps Around the Bezel:**

- Ensure the mounting surface is flat and even. Uneven surfaces can cause gaps.
- Verify that the cutout is not oversized.
- If minor gaps persist, a marine-grade sealant can be used around the perimeter for a watertight seal, but this should not be necessary if the fit is correct.

## SPECIFICATIONS

Feature	Detail
Product Name	IMDK H5 In-Dash Mounting Kit
Brand	Humminbird
Model Number	10
Compatible Devices	Humminbird HELIX 5 Series Fish Finders
Mounting Type	Dashboard (In-Dash)
Material	Plastic
Color	Black
Product Dimensions	10 x 0.01 x 10 inches
Item Weight	0.16 ounces

## WARRANTY AND SUPPORT

For warranty information and technical support regarding your Humminbird IMDK H5 In-Dash Mounting Kit, please refer to the documentation included with your original purchase or visit the official Humminbird website. You can also contact Humminbird customer service directly for assistance.
