ScentLok 83051

ScentLok Carbon Adsorber Instruction Manual

Model: 83051
Brand: ScentLok

1. PRODUCT OVERVIEW

The ScentLok Carbon Adsorber is designed to enhance the storage of your hunting clothing and gear by effectively trapping and controlling unwanted odors. Proper storage is a crucial component of a comprehensive scent-control system for hunters.

Key Features:

- **Odor Elimination:** Helps improve storage by trapping odors that accumulate on hunting clothing and gear.
- **Universal Replacement:** Can be used as an original replacement for ScentTote products or to upgrade other scent-control storage containers.
- **No Reactivation Needed:** The carbon inside is designed to last at least one season without requiring reactivation in a dryer.

- **Patented Technology:** Utilizes ScentLok's patented activated carbon technology for superior odor adsorption.
- **Dimensions:** Measures 12 inches by 14 inches.

2. SETUP AND INSTALLATION

The ScentLok Carbon Adsorber is designed for straightforward use. Follow these steps to integrate it into your scent-control storage system:

1. **Unpack:** Carefully remove the Carbon Adsorber from its plastic packaging.
2. **Placement:** Place the adsorber inside your chosen scent-control storage system. This includes ScenTote storage systems, garment bags, duffles, or footlockers. Ensure it is positioned to allow for free distribution of carbon within the container.

3. OPERATING INSTRUCTIONS

The ScentLok Carbon Adsorber functions by continuously adsorbing odors within your sealed storage container. Its design ensures optimal performance throughout a typical hunting season.

- **Continuous Odor Control:** Once placed in a sealed container, the adsorber actively works to pull in and trap odors from your gear.
- **No Reactivation Required:** Unlike some carbon-based products, this adsorber does not need to be reactivated in a dryer. Reactivating it in a dryer can unnaturally break loose carbon particles, potentially reducing its adsorptive capacity. The amount of carbon is sufficient for at least one season of use.

4. MAINTENANCE AND CARE

To ensure the longevity and effectiveness of your ScentLok Carbon Adsorber, follow these simple care guidelines:

- **Cleaning:** The manufacturer recommends **Hand Wash** for this product. Avoid machine washing or harsh

detergents.

- **Replacement:** For maximum benefit and consistent odor control, it is recommended to replace your Carbon Adsorber every season.
- **Storage:** When not in use, store the adsorber in a clean, dry environment, preferably within a sealed container to preserve its adsorptive properties.

5. SPECIFICATIONS

Item Model Number	83051
Product Dimensions	14.25 x 13 x 0.5 inches
Item Weight	4.16 ounces
Manufacturer	ALS Enterprises
Date First Available	July 14, 2015
Care Instructions	Hand Wash

6. TROUBLESHOOTING

The ScentLok Carbon Adsorber is a passive odor control device and typically does not require troubleshooting. If you observe a decrease in odor control effectiveness, consider the following:

- **Sealing:** Ensure your storage container is properly sealed. Leaks can compromise the adsorber's effectiveness.
- **Age:** If the adsorber has been in use for more than one season, its carbon may be saturated. Replace it with a new ScentLok Carbon Adsorber.
- **Overload:** Extremely strong or persistent odors may require additional odor control measures or more frequent replacement.

7. WARRANTY AND SUPPORT

For specific warranty information and customer support, please refer to the official ScentLok website or contact their customer service department. Keep your purchase receipt as proof of purchase.
