HOLMES HAP9425B

Holmes aer1 Tower Slim HEPA Air Purifier

Model: HAP9425B

INTRODUCTION

The Holmes HAP9425B aer1 Tower Slim HEPA Air Purifier is designed to improve indoor air quality by capturing dust and smoke particles. It features an optional ionizer to enhance particle capture and a Visipure filter window for easy monitoring of filter condition. This unit is suitable for small and medium-sized rooms up to 220 square feet.

SAFETY INFORMATION

- Always unplug the air purifier before cleaning or performing any maintenance.
- Do not operate the unit with a damaged cord or plug.
- Keep the air purifier away from water or damp areas.
- Ensure proper ventilation around the unit; do not block air inlets or outlets.
- This appliance has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

PACKAGE CONTENTS

Please check the box for the following items:

- Holmes HAP9425B aer1 Tower Slim HEPA Air Purifier Unit
- aer1 HEPA-Type Filter (pre-installed)

SETUP

1. **Unpack the Unit:** Carefully remove the air purifier from its packaging.
2. **Remove Protective Packaging:** Open the front cover of the air purifier by gently pulling the top edge. Remove any plastic bags or protective materials from around the filter.
3. **Install Filter:** Ensure the aer1 HEPA-Type filter is properly seated inside the unit. The filter is designed for easy installation and removal.

The air purifier with its front cover open, showing the filter compartment.

4. **Close Front Cover:** Securely close the front cover until it clicks into place.
5. **Placement:** Place the air purifier on a firm, level surface. For optimal performance, position the unit in a location where air can circulate freely around it, away from walls or furniture that might obstruct airflow.

Example of the air purifier placed in a room for effective air circulation.

6. **Connect Power:** Plug the power cord into a 120V AC electrical outlet.

OPERATING INSTRUCTIONS

The Holmes HAP9425B features a simple control dial on the top of the unit.

Top control panel with the fan speed dial and ionizer switch.

- Power On/Off:** Rotate the control dial clockwise from the 'OFF' position to select a fan speed. To turn the unit off, rotate the dial counter-clockwise back to the 'OFF' position.
- Fan Speed Selection:** The unit offers three fan speed settings:
 - **Setting 1 (Low):** For quiet operation and continuous air purification.
 - **Setting 2 (Medium):** For general daily use and moderate air purification.
 - **Setting 3 (High):** For maximum air purification and quick odor removal.
- Ionizer Function:** The air purifier includes an optional ionizer. To activate the ionizer, slide the ionizer switch to the 'ON' position. The ionizer helps to bind smaller airborne particles together, making them easier for the filter to capture.
- Filter Life Indicator Dial:** The manual filter life indicator dial on the top panel helps you track when to replace the filter. Rotate the dial to set the current month after installing a new filter.

MAINTENANCE

Regular maintenance ensures optimal performance and extends the life of your air purifier.

- 1. Filter Replacement:** The aer1 HEPA-Type filter should be replaced approximately every 3 months, or sooner depending on usage and air quality. The Visipure filter viewing window allows you to visually inspect the filter for excessive dirt buildup.

- To replace the filter: Open the front cover, remove the old filter, insert a new aer1 filter, and close the cover.
- After replacing the filter, reset the filter life indicator dial to the current month.

Diagram illustrating how air passes through the aer1 filter for purification.

- 2. Cleaning the Unit:** Wipe the exterior of the air purifier with a soft, damp cloth. Do not use abrasive cleaners or solvents. Ensure the unit is unplugged before cleaning.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Unit does not turn on	Not plugged in; Power outlet not working; Control dial not set to a speed.	Ensure unit is securely plugged in; Check power outlet with another device; Rotate control dial to desired fan speed (1, 2, or 3).
Reduced airflow or poor purification	Filter is dirty or clogged; Air inlets/outlets are blocked.	Replace the filter; Ensure nothing is obstructing the air vents.
Unusual noise	Filter not installed correctly; Foreign object inside unit.	Check filter installation; Unplug unit and carefully inspect for any foreign objects.

SPECIFICATIONS

Feature	Detail
Brand	HOLMES
Model Number	HAP9425B
Color	Black
Product Dimensions	10"D x 8.7"W x 27.9"H
Item Weight	9 pounds
Recommended Room Size (CADR)	Up to 220 sq ft (130 CADR)
Filter Type	aer1 HEPA-Type Filter
Particle Retention Size	2 Micron
Controller Type	Button Control (Dial)
Wattage	90 watts
AHAM Certified	Yes
Batteries Required	No
