HANDLING AND CARE

To maintain the pristine condition of your photograph, adhere to the following guidelines:

- **Clean Hands:** Always handle the photograph with clean, dry hands. Ideally, wear lint-free cotton gloves to prevent transferring oils and dirt from your skin to the photo surface.
- **Edge Handling:** Hold the photograph by its edges to avoid touching the image area.
- **Flat Surface:** When not being handled, place the photograph on a clean, flat, and stable surface.
- **Avoid Bending:** Do not bend, fold, or crease the photograph, as this can cause irreversible damage.

DISPLAY RECOMMENDATIONS

To showcase your collectible while protecting it, consider the following display methods:

- **Framing:** Frame the photograph using archival-quality, acid-free materials. This includes acid-free matting, backing board, and UV-protective glass or acrylic to prevent fading from light exposure.
- **Location:** Display the framed photograph in a location that avoids direct sunlight, fluorescent lights, or spotlights, which can accelerate degradation.
- **Temperature and Humidity:** Choose a display area with stable temperature and humidity levels. Avoid bathrooms, basements, or attics where conditions can fluctuate significantly.

STORAGE

For long-term preservation, proper storage is crucial:

- **Archival Sleeves:** Store the photograph in individual archival-quality, acid-free, and lignin-free polypropylene or polyester sleeves.
- **Storage Boxes:** Place sleeved photographs in archival-quality, acid-free storage boxes.
- **Environment:** Store boxes in a cool, dark, dry, and stable environment, such as a climate-controlled closet, away from exterior walls, windows, and vents.
