Beautyrest BR54-0417

Beautyrest Heated Blanket User Manual

Model: BR54-0417

INTRODUCTION

Thank you for choosing the Beautyrest Heated Blanket. This manual provides essential information for the safe and effective use of your new heated blanket. Please read all instructions carefully before use and retain this manual for future reference.

This heated blanket is designed to provide warmth and comfort with features such as Secure Comfort Technology, 20 heat settings, and an auto shut-off timer. It is made from soft microlight plush fabric reversing to a cozy sherpa.

IMPORTANT SAFETY INFORMATION

- Always ensure the blanket is laid flat and untucked when in use to prevent overheating.
- Do not use with infants, incapacitated persons, or persons insensitive to heat.
- Do not use with pets.
- Avoid pinching or folding the heating wires.
- Disconnect the power cord from the outlet when not in use.
- The blanket features Secure Comfort Technology designed to virtually eliminate ElectroMagnetic Field (EMF) emissions.
- UL Certified for safety standards.
- OEKO-TEX certified, ensuring it does not contain harmful substances or chemicals.

SETUP INSTRUCTIONS

1. **Unpack the Blanket:** Carefully remove the heated blanket and controller(s) from the packaging.
2. **Inspect for Damage:** Before first use, inspect the blanket and cords for any signs of damage. Do not use if damaged.

3. **Position the Blanket:** Lay the heated blanket flat on your bed, ensuring it is not bunched, folded, or tucked under the mattress.
4. **Connect the Controller:** Locate the connector on the blanket and firmly plug in the controller cord. Ensure a secure connection. For Queen and King sizes, there are two controllers for dual-zone heating.
5. **Plug into Power:** Plug the power cord into a standard 110V-120V @ 60HZ electrical outlet.

The grey Beautyrest heated blanket spread across a bed, illustrating its full coverage and the two controllers for independent temperature adjustment on larger sizes.

OPERATING INSTRUCTIONS

Your Beautyrest Heated Blanket controller allows you to customize your warmth experience.

1. **Power On/Off:** Press the power button (**U**) to turn the blanket on or off. The LCD display will illuminate.
2. **Adjust Heat Settings:** Use the up (**^**) and down (**v**) arrow buttons to select your desired heat level from 1 to 20. Level 1 is the lowest, and 20 is the highest.

3. **Set Timer:** Press the timer button (T) to cycle through the auto shut-off timer settings, from 1 to 10 hours. The blanket will automatically turn off after the selected time. If no timer is set, the blanket will default to a 10-hour auto shut-off for safety.
4. **Pre-Heat Function:** Some models may feature a quick heat option for rapid warming. Refer to your controller for specific pre-heat button functionality.

Note: Do not cover the controller while in use to avoid overheating.

CARE AND MAINTENANCE

Proper care ensures the longevity and performance of your heated blanket.

1. **Disconnect Controller:** Always unplug the blanket from the wall outlet and detach the controller(s) from the blanket before washing.
2. **Machine Wash:** Machine wash on a gentle cycle in cold water. Do not bleach.

3. **Rinse Thoroughly:** Ensure all soap is rinsed out.
4. **Tumble Dry:** Tumble dry on low heat or line dry. Ensure the blanket is completely dry before reconnecting the controller or storing. Do not iron.
5. **Storage:** Store the blanket loosely folded in a cool, dry place. Avoid tightly folding or placing heavy objects on the blanket, which could damage the internal wiring.

An image showing the process of detaching the controller from the blanket before placing it into a washing machine for cleaning.

TROUBLESHOOTING

If you encounter any issues with your heated blanket, please refer to the following common solutions:

- **Q: Why is my light blinking?**

A: Unplug the blanket from the wall outlet and reconnect, ensuring the controller is properly connected to the blanket. If the issue persists, contact customer support.

- **Q: Why does my blanket not heat well?**

A: Ensure the blanket is powered on and set to the maximum heat level. Allow sufficient time for it to heat up,

as initial warming may take a few minutes.

- **Q: Only parts of my blanket are getting warm.**

A: This is usually caused by a bunched or pinched heating element. Lay the blanket flat, untucked, and free from heavy objects. Straighten the heating wires as needed to restore function. Lay the blanket flat and run your fingers along the wire, paying special attention to the top and bottom of the blanket where the wire bends. If any portion of the wire is twisted on itself, manually twist it back.

SPECIFICATIONS

Feature	Detail
Model Number	BR54-0417
Material	100% Polyester (Plush & Sherpa)
Dimensions (Full Size)	80"L x 84"W
Heat Settings	20 Levels
Auto Shut-Off Timer	1-10 Hours (Default 10 hours)
