- Perfect for individuals with arthritis or hand pain, requiring no strenuous gripping and squeezing.

How to Use Your 3-in-1 Opener

Opening Cans:

1. **Position the Opener:** Place the can opener flat on top of the can, aligning the cutting wheel with the outer rim of the can.
2. **Engage the Mechanism:** Turn the large knob clockwise until the cutting mechanism firmly grips the can. You will feel it lock into place.
3. **Cut the Lid:** Continue turning the knob clockwise, moving the opener around the entire circumference of the can. The opener will cut the can just below the rim, creating a smooth, safe edge.
4. **Release the Lid:** Once you have completed a full rotation and the cutting feels easy, turn the knob counter-clockwise a half turn to release the tension. The lid will be detached from the can.
5. **Remove the Lid:** Use the small beak-like lever on the side of the opener to gently lift the lid off the can. The lid will have a smooth edge and can be placed back on the can for temporary covering.

2. **Grip the Lid:** Place the jar opener firmly over the jar lid. Ensure a secure grip.
3. **Twist to Open:** Twist the jar opener counter-clockwise to loosen the lid. Apply steady pressure until the seal breaks and the lid can be easily removed.
