1. Introduction

The Sun Joe SPX-25H 25-Foot Pressure Washer Extension Hose is designed to extend the reach of your pressure washing tasks. This hose is weather and abrasion-resistant, providing reliable performance for various cleaning applications. It is compatible with most Sun Joe SPX series pressure washer models, excluding SPX1500 and SPX1501, and features standard M22-15 mm connections.

2. Safety Information

Always read and understand the safety instructions provided with your pressure washer before connecting or using this extension hose. Ensure all connections are secure to prevent leaks and potential injury from high-pressure water. Do not use this hose if it appears damaged or worn. Always wear appropriate personal protective equipment, including eye protection, when operating a pressure washer.

- Ensure the pressure washer is turned off and depressurized before connecting or disconnecting the hose.
- Do not point the spray gun at people, pets, or electrical equipment.
- Verify compatibility with your pressure washer model (fits most Sun Joe SPX series except SPX1500 and SPX1501).
- Avoid sharp bends or kinks in the hose during operation and storage.

3. Setup

To set up your Sun Joe SPX-25H extension hose, follow these steps:

1. **Prepare the Pressure Washer:** Ensure your pressure washer is turned off and disconnected from the power source and water supply. Depressurize the system by squeezing the trigger on the spray gun.
2. **Identify Connections:** The SPX-25H hose features standard M22-15 mm connectors. One end will connect to your existing pressure washer hose or the pressure washer's high-pressure outlet, and the other end will connect to your spray gun or another extension hose.
3. **Connect the Hose:**
 - Align the M22-15 mm connector of the extension hose with the corresponding port on your pressure washer or existing hose.
 - Thread the connector clockwise until it is hand-tight.
 - Use a wrench to gently tighten the connection further, ensuring it is secure but do not overtighten. Overtightening can damage the threads or O-rings.
4. **Connect to Spray Gun:** Repeat the connection process for the other end of the extension hose to your spray gun or desired accessory.
5. **Check for Compatibility:** This hose is designed for Sun Joe SPX series pressure washers, except models SPX1500 and SPX1501. Verify your model number before use.

STANDARD M22 CONNECTIONS

DESIGNED TO FIT MOST ELECTRIC AND GAS PRESSURE WASHERS

Image: A close-up view of the standard M22-15 mm connectors, highlighting their design for compatibility with most electric and gas pressure washers.

Image: Hands demonstrating the secure and sturdy connection of the extension hose to a pressure washer unit, ensuring a reliable fit.

4. Operating Instructions

Once the extension hose is securely connected, you can begin your pressure washing tasks. The added length allows for greater mobility and reach, reducing the need to frequently reposition your pressure washer unit.

- **Extend the Hose:** Before turning on the pressure washer, fully uncoil and straighten the extension hose to prevent kinks and ensure smooth water flow.
- **Start Pressure Washer:** Follow your pressure washer's instructions to turn it on and prime the pump.
- **Begin Cleaning:** Direct the spray gun at the surface to be cleaned, maintaining a safe distance. The hose is rated for pressures up to 2,300 PSI, suitable for various cleaning jobs.
- **Utilize Extended Reach:** Take advantage of the 25-foot extension to clean larger areas like driveways, decks, or siding without moving the main unit.

FLEXIBLE DESIGN

KINK-FREE, WEATHER AND ABRASION RESISTANT

5. Maintenance

Proper maintenance will prolong the life of your Sun Joe SPX-25H extension hose.

- **Cleaning:** After each use, flush the hose with clean water to remove any detergent or debris.
- **Inspection:** Regularly inspect the hose for any signs of wear, cuts, abrasions, or damage to the connectors. Replace the hose immediately if any damage is found.
- **Storage:** Coil the hose neatly after use, avoiding sharp kinks. Store it in a cool, dry place, away from direct sunlight and extreme temperatures. Protect it from freezing temperatures, as ice expansion can damage the hose.
- **O-Rings:** Check the O-rings in the connectors periodically. If they appear worn or cracked, replace them to prevent leaks.

6. Troubleshooting

If you encounter issues with your extension hose, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Water Leaking from Connections	Loose connection, damaged O-ring, or incorrect fitting.	Ensure connections are hand-tightened and then gently secured with a wrench. Inspect O-rings for damage and replace if necessary. Confirm M22-15 mm compatibility.
Hose Kinking During Use	Hose not fully uncoiled or straightened before use.	Always uncoil the entire length of the hose and remove any twists or kinks before turning on the pressure washer.
Reduced Pressure	Kink in the hose, partial blockage, or issue with the pressure washer itself.	Check the hose for kinks or obstructions. If the hose is clear, refer to your pressure washer's manual for troubleshooting pressure issues.

7. Specifications

Key technical specifications for the Sun Joe SPX-25H Pressure Washer Extension Hose:

Feature	Detail
Model	SPX-25H
Brand	Sun Joe
Hose Length	25 Feet (300 inches)
Material	Rubber
Color	Black
Connectors	M22-15 mm
Maximum Pressure Rating	2,300 PSI (up to 5800 burst PSI)
Product Dimensions	300"L x 0.8"W
Item Weight	1.45 Pounds
Compatibility	Most Sun Joe SPX series pressure washers (except SPX1500 and SPX1501)

8. Warranty & Support

For detailed warranty information and customer support, please refer to the official Sun Joe website or the documentation included with your original pressure washer purchase. You can also download the full user guide for this product in PDF format:
