## Summer Infant 12554Z

# Summer Infant Double Safety Bedrail (Model 12554Z)

Instruction Manual

## INTRODUCTION

The Summer Infant Double Safety Bedrail (Model 12554Z) is designed to assist in the transition of your child from a crib to an adult bed. This bedrail set, featuring a sturdy metal frame with a breathable fabric and mesh cover, provides a secure barrier to prevent accidental falls. It is suitable for use on both sides of adult twin, full, or queen-sized beds and is compatible with mattress and box spring sets, as well as platform beds with a solid base. One side of the bedrail is designed to fold down for convenient access.

## IMPORTANT SAFETY INFORMATION

- This product meets current ASTM F2085 bedrail standards.
- Intended for children aged 2 to 5 years.
- Not intended for use by adults.
- Not compatible with cribs, toddler beds, bunk beds, water beds, inflatable mattresses, or beds with slats.
- Ensure proper installation to prevent entrapment hazards. Always follow all assembly and installation instructions carefully.
- Regularly check that the bedrail is securely attached and that all components are in good condition.

## PARTS LIST

Before assembly, ensure all parts are present:

- 2 x Bedrail Panels (Metal frame with fabric/mesh cover)
- 2 x Support Bars (connects the two panels under the mattress)
- 4 x Adjustable Straps with Buckles (for securing to bed frame/box spring)
- Instruction Manual

## SETUP AND INSTALLATION

Assembly is quick and easy, requiring no tools. The bedrail set can be installed on both sides of the bed.

1. **Assemble Bedrail Panels:** Connect the metal frame pieces for each bedrail panel. Ensure they snap securely into place.
2. **Attach Fabric Cover:** Slide the fabric and mesh cover over the assembled metal frames. Zip up the cover to ensure a snug fit.
3. **Position Bedrails:** Place one bedrail panel on each side of the bed, against the mattress.
4. **Connect Support Bars:** Lift the mattress. Connect the two support bars to the bottom of each bedrail panel. These bars will extend across the bed, underneath the mattress.
5. **Secure with Straps:** Thread the adjustable straps through the designated slots on the bedrail base and around the bed frame or box spring. Tighten the straps firmly to ensure the bedrails are snug against the mattress and cannot be easily moved.
6. **Lower Mattress:** Carefully lower the mattress back onto the bed, ensuring it rests on the support bars and securely holds the bedrails in place.

Figure 1: Assembled Summer Infant Double Safety Bedrail. This image shows the two gray bedrail panels with white mesh, connected by a strap system underneath, ready for installation on a bed.

Figure 2: Close-up of the bedrail's base and adjustable straps. The image highlights the white adjustable straps and buckles used to secure the bedrail firmly to the bed frame or box spring, ensuring stability.

## OPERATING INSTRUCTIONS

The Summer Infant Double Safety Bedrail features a convenient fold-down mechanism on one side, allowing for easy access to your child or for changing bed linens.

- To fold down one side of the bedrail, locate the hinges at the base of the panel.
- Press the release buttons or levers on the hinges (refer to specific product design for exact mechanism).
- Gently lower the bedrail panel until it lies flat or hangs down, providing an open side for access.
- To raise the bedrail, simply lift the panel until it clicks securely back into the upright position.

Figure 3: Bedrail with one side folded down. This image demonstrates the bedrail's fold-down capability, allowing a parent to sit beside the child or easily change bedding without removing the entire rail.

## MAINTENANCE

---

To keep your Summer Infant Double Safety Bedrail clean, wipe the fabric and mesh cover with a damp cloth. Avoid using harsh chemicals or abrasive cleaners that could damage the material.

## TROUBLESHOOTING

---

- **Bedrail feels loose:** Ensure the adjustable straps are pulled tight and securely fastened around the bed frame or box spring. Verify that the mattress is properly seated on the support bars.
- **Bedrail does not fold down smoothly:** Check for any obstructions around the hinges. Ensure the release buttons/levers are fully engaged.
- **Child attempting to climb over:** This bedrail is designed as a deterrent. If your child consistently attempts to climb over, they may be ready to transition out of a bedrail. Always supervise your child.

## SPECIFICATIONS

---

<b>Brand</b>	Summer Infant
<b>Model Number</b>	12554Z
<b>Size</b>	Full (also fits Twin, Queen)
<b>Color</b>	Grey
<b>Style</b>	Metal
<b>Product Dimensions</b>	42.5"W x 21"H
<b>Material Type</b>	Polyester
<b>Item Weight</b>	9 pounds
