

TURBOSOUND iQ15

Turbosound iQ15 Powered Loudspeaker Instruction Manual

Model: **iQ15** | Brand: **TURBOSOUND**

1. INTRODUCTION

The Turbosound iQ15 is a high-performance, 2500 Watt, 2-way 15-inch powered loudspeaker designed for portable PA and fixed installation applications. It incorporates advanced Klark Teknik DSP technology, speaker modeling, and ULTRANET networking capabilities to provide exceptional sound quality and system control.

Figure 1: Front view of the Turbosound iQ15 powered loudspeaker. This image shows the speaker's protective grille and the Turbosound logo at the bottom.

Key Features:

- 2-way full range loudspeaker for portable PA and installation applications.
- 2,500 Watt power featuring Klark Teknik Class-D technology.
- Klark Teknik Digital Signal Processing (DSP) for total system control.
- Speaker modelling includes accurate models of industry standard speakers.
- SCC (Spatial Contour Control) compensates frequency response in relation to physical speaker placement.

2. SAFETY INSTRUCTIONS

Before operating your iQ15 loudspeaker, please read and understand all safety instructions. Retain these instructions for future reference.

- **Electrical Safety:** Always connect the loudspeaker to a grounded power outlet. Do not expose the unit to rain

or moisture. Do not open the enclosure; there are no user-serviceable parts inside.

- **Placement:** Ensure the loudspeaker is placed on a stable, level surface or securely mounted using appropriate hardware. Avoid placing it near heat sources or in direct sunlight.
- **Hearing Protection:** This product is capable of producing high sound pressure levels. Prolonged exposure to high SPLs can cause permanent hearing damage. Use hearing protection when operating at high volumes.
- **Ventilation:** Ensure adequate ventilation around the unit. Do not block ventilation openings.
- **Cleaning:** Disconnect from power before cleaning. Use a dry cloth only.

3. UNPACKING AND INITIAL INSPECTION

Upon receiving your Turbosound iQ15 loudspeaker, carefully unpack it and inspect for any signs of damage that may have occurred during transit. If damage is found, notify your dealer immediately.

Included Components:

- 1 x Turbosound iQ15 2500W 2-Way 15" Speaker
- Power Cable (region specific)
- Quick Start Guide (not included in this manual)

4. SETUP AND CONNECTIONS

Proper setup is crucial for optimal performance and safety of your iQ15 loudspeaker.

4.1 Physical Placement

The iQ15 can be used as a floor monitor, pole-mounted, or flown. Ensure the speaker is stable and secure in its chosen position.

Figure 2: Side view of the Turbosound iQ15, highlighting the integrated handle for easy transport and positioning.

4.2 Power Connection

1. Ensure the loudspeaker's power switch is in the OFF position.
2. Connect the supplied power cable to the AC input on the rear panel of the iQ15.
3. Plug the other end of the power cable into a suitable grounded electrical outlet. The iQ15 operates on Corded Electric power.

4.3 Audio Input Connections

The iQ15 features XLR connectivity for audio input. Connect your audio source (mixer, instrument, etc.) to the XLR input on the rear panel.

- Use high-quality balanced XLR cables for optimal signal integrity.
- Ensure all connections are secure before powering on the system.

5. OPERATION

The Turbosound iQ15 incorporates advanced Klark Teknik DSP technology for comprehensive control over its audio characteristics.

5.1 Powering On/Off

1. Before powering on, ensure all volume controls on the iQ15 and connected audio sources are set to minimum.
2. Flip the power switch to the ON position. The power indicator LED will illuminate.
3. Gradually increase the volume to the desired listening level.
4. To power off, reduce volume to minimum, then flip the power switch to the OFF position.

5.2 Klark Teknik DSP Control

The integrated Klark Teknik DSP provides access to various settings, including:

- **Speaker Modelling:** Select from accurate models of industry-standard speakers to emulate their sonic characteristics. Refer to the full user manual (not this document) for a list of available models and their applications.
- **Spatial Contour Control (SCC):** This feature allows you to compensate the frequency response based on the physical placement of the speaker (e.g., wall-mounted, corner, free-standing). Adjust SCC settings to optimize sound clarity and balance in different environments.
- **ULTRANET Networking:** The iQ15 supports ULTRANET, allowing for digital audio networking and remote control with compatible devices. Consult the ULTRANET documentation for detailed setup and operation.

Access and adjust these settings via the rear panel display and controls. Detailed navigation instructions are typically found in the comprehensive product manual.

6. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your Turbosound iQ15 loudspeaker.

- **Cleaning:** Disconnect the speaker from power before cleaning. Use a soft, dry, lint-free cloth to wipe down the exterior. Do not use abrasive cleaners, solvents, or waxes.
- **Grille Cleaning:** The front grille can be gently vacuumed to remove dust and debris.
- **Storage:** When not in use for extended periods, store the loudspeaker in a dry, temperature-controlled environment, ideally in its original packaging or a protective cover.
- **Inspection:** Periodically check cables and connections for wear or damage.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your iQ15 loudspeaker. For more complex problems, contact customer support.

Problem	Possible Cause	Solution
No power	Power cable disconnected; outlet not working; power switch off.	Check power cable connection; test outlet with another device; ensure power switch is ON.

Problem	Possible Cause	Solution
No sound output	Input cable disconnected/faulty; volume too low; incorrect DSP settings; source device issue.	Check XLR input cable; increase volume on speaker and source; verify DSP input/output settings; test source device.
Distorted sound	Input signal too high (clipping); speaker overloaded; faulty cable.	Reduce input level from source; reduce speaker volume; check cables for damage.
Humming or buzzing noise	Ground loop; faulty cable; interference from other electronics.	Ensure proper grounding; try different cables; move speaker away from other electronics.

8. SPECIFICATIONS

Detailed technical specifications for the Turbosound iQ15 powered loudspeaker.

Figure 3: This image illustrates the dimensions of the TurboSound iQ15 loudspeaker, indicating a height of 10.92 inches, a width of 6.91 inches, and a depth of 5.85 inches.

Feature	Detail
Model Name	iQ15
Speaker Type	2-Way Full Range Loudspeaker
Speaker Size	15 Inches (Woofer Diameter)
Maximum Output Power	2500 Watts

Feature	Detail
Connectivity Technology	XLR
Power Source	Corded Electric
Product Dimensions (D x W x H)	6.98"D x 5.91"W x 11.02"H
Item Weight	23.1 Pounds
Color	Black
Manufacturer	Music Tribe US
UPC	748252143945
Mounting Type	Freestanding
Warranty Type	Limited

9. WARRANTY AND SUPPORT

Your Turbosound iQ15 loudspeaker comes with a Limited Warranty. For specific terms and conditions, please refer to the warranty card included with your product or visit the official Turbosound website.

Customer Support:

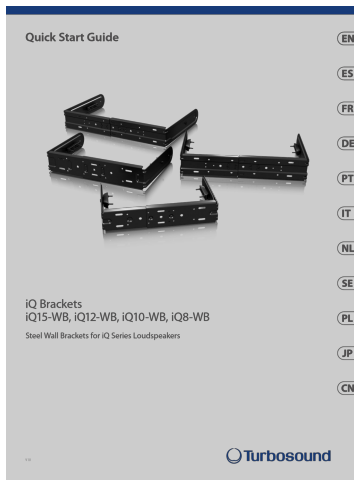

For technical assistance, service, or warranty claims, please contact Music Tribe US, the manufacturer of Turbosound products.

- **Manufacturer:** Music Tribe US
- **Online Support:** Visit the [TURBOSOUND Store on Amazon](#) or the official Turbosound website for support resources, FAQs, and contact information.

Accessories

IQ TS-PC15-1

Deluxe Matte Redwood Protection Cover for
17" Laptops, including Q15 and Q15i

- Deluxe water resistant protective cover for 17" laptops
- Rugged black mesh nylon ripstop cover with reinforced perimeter system of 200 denier
- Thick shock foam padding provides superior protection in transit
- Operating in over 4000 acres to bank and riparian habitats
- Used by TUBESPOON Q15, Q15i and 10" laptops
- Maximum capacity: 20 lbs. (9.1 kg)
- 28" x 18" x 3.0" (71.1 x 45.7 x 7.6 cm)
- Designed and engineered in the U.S.

Your IQ/S15K15 laptopcase is a finely-crafted, audio instrument that delivers the highest degree of protection, so we designed the perfect solution – the TS-PC15-1 deluxe cover. Made of super-tough black nylon, the TS-PC15-1 is a "must have" accessory for your TUBESPOON 17" laptopcase.

Protection Against the Elements

Black nylon, just put all other materials to rest. The TS-PC15-1 is constructed of multiple layers of rugged nylon fabric to leave nothing to chance and keep afflicting your laptopcase unaffected. The TS-PC15-1 protects your precious device from rain and from the sun. And if the sun's rays make you nervous, you can always bring the cover back and protect it from sunburnt spots or other environmental irritants.

iQ15

2500 Watt 2 Way
15" Powered Loudspeaker with
KLARK TEKNIK DSP Technology,
Speaker Modelling and
ULTRANET Networking

■ 2 way full range loudspeaker for portable PA and installation applications

■ 2,500 Watt power featuring KLARK TEKNIK Class-D technology

■ KLARK TEKNIK Digital Signal Processing for total system control

■ Speaker modelling includes accurate models of industry standard speakers

■ SCC (Spatial Control Control) compensates frequency response to enable physical speaker placement

■ ULTRANET digital audio networking connects to mains and other sources

■ 15" low frequency driver with low mass voice coil for improved transient response

■ High temperature 7" compression driver with copper clad aluminium voice coil for extended high frequency reproduction

■ Fully featured user interface with LCD display for easy navigation

■ PC remote control software downloadable at [turbosound.com](#)

■ Lightweight film glass reinforced composite enclosure

■ Rugged powder coated perforated steel mesh grille

■ Dual angle pole mount for accurate audience coverage

The 2,500-Watt iQ15 is a powered two-way loudspeaker ideally suited for a wide range of portable and fixed installation, music and speech reinforcement applications. The driver complement includes an 15" low frequency driver with a low mass voice coil for improved transient response, and a high temperature 7" compression driver with copper-clad aluminium voice coil for extended high frequency reproduction.

Equipped with a very efficient and lightweight two channel KLARK TEKNIK Class-D power amplifier, the iQ15 provides an impressive 2,500 Watts of output power. A high degree of control over the loudspeaker system's performance is managed by a sophisticated, but easy to use KLARK TEKNIK Digital Signal Processor (DSP), which provides dynamic EQ for removable full range response at low volume levels, and transparent limiting for the utmost clarity at high output levels - and long term reliability. iQ15's advanced DSP speaker modelling prevents include detailed and accurate models of some of the audio industry's most-respected loudspeakers.

KLARK TEKNIK also developed a highly versatile Spatial Control Control (SCC) DSP function, which allows the user to easily optimise the iQ15's frequency response for the physical speaker placement. This advanced functionality provides frequency compensation for stand, floor, wall or ceiling placement, much like the adjustments commonly found on studio reference monitors.

Loudspeaker Accessories

TS-PC15-1

Deluxe Water Resistant Protective Cover for 15" Loudspeakers, including iQ15 and iX15

- Deluxe water resistant protective cover for 15" loudspeakers
- Rugged black multi-layer nylon outer covering prevents ingress of dirt and dust
- Thick inner foam padding provides superior protection in transit
- Opening in cover allows access to built-in cabinet handle
- Ideal for TURBOSOUND Q15, iQ15 and other 15" loudspeakers
- Maximum speaker size 17 1/2" x 16 1/2" x 15 1/2" (203 x 416 x 393 mm)
- 3 Year Warranty Program*
- Designed and engineered in England

Your iQ15/iX15 loudspeaker is a beautifully crafted audio instrument that deserves the highest degree of protection, even designed for the perfect solution – the TS-PC15-1 deluxe cover. Made of super tough black nylon, the TS-PC15-1 is a "trust-have" accessory for your Turbosound 15" loudspeaker.

Protection Against the Elements

Much more than just an attractive covering, the TS-PC15-1 is constructed of multiple layers of rugged nylon fabric to keep water, dirt and dirt from affecting your loudspeaker components. The TS-PC15-1 protects your enclosure during transit and from the rig – and if the rig is water-tight for more than one night, giving the cover back an all-around it from moisture spills or other environmental damage.

iQ15-WB

Steel Wall Bracket for iQ15 Loudspeakers

- Steel wall bracket for iQ15 loudspeakers
- Mounts 1 speaker horizontally or vertically to a wall
- Adjustable angle for optimum audience coverage
- Hard wearing semi-matt black powder coat finish
- 3 Year Warranty Program*
- Designed and engineered in England

The iQ15-WB is a matt black, powder coated wall bracket specifically designed to hang the iQ15 in standalone applications, such as wall or ceiling mounting in bars or clubs, or as an under-balcony fit. The iQ15-WB consists of two yoke-plates, two spike brackets, and a bracket spacer; plus all the fixings required for assembly. After the iQ15 is securely mounted and adjusted for the desired coverage, the screws attaching the enclosure to the bracket should be fully tightened to finish the installation.

You Are Covered

We strive to provide the best possible Customer Experience. Our products are made in our own MMC Group factory using some of the most advanced, intelligent production, workflow and quality assurance tools with the most experienced and trained engineers available in the world.

As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a genuine 3 Year Warranty program.

Speaker Tote Bag

15"

UPC 716408543215

MODEL GPA-TOTE15

COLOR	Black
WEIGHT	-
HINGES	-
WHEELS	-
ATA RATED	-
LOCKABLE	No
HANDLES	Nylon Carry Handles
LATCHES	Zipper
WATER RESISTANCE	-

FEATURES

Designed to fit most popular 15" speaker cabinets including DDG-K15, TurboSound D115, and Yamaha DX115

Rugged water resistant polyester construction

360 degree protective padded interior with soft lining

Interior Dimensions

Length 28.5"

Width 18.5"

Product Overview Brochure

Portable Speakers

iQ15

2500 Watt 3-Way
15" Powered Loudspeaker with
KLARK TEKNIK DSP Technology,
Speaker Modeling and
ULTRANET Networking

- 2-way full-range loudspeaker for portable and installation applications
- 2,500 Watt power handling, KLARK TEKNIK Class-D technology
- KLARK TEKNIK Digital Signal Processing for real-time control
- Speaker modeling includes accurate modeling of industry standard drivers
- SCC (Spatial Control) compensates for frequency response variation to physical speaker placement
- ULTRANET digital audio networking connects to mixers and other sources
- 15" low frequency driver with low mass voice coil for improved transient response
- High temperature T-temperature driver with copper coil and distributed voice coil for extended high frequency reproduction
- Fully featured user interface with LCD display for ease of operation
- PC remote control software downloadable at turbosound.com
- Lightweight flow-flow reinforced composite enclosure
- Rugged powder coated perforated steel mesh grill
- Dual angle pole mount for accurate audience coverage

The 2,500-Watt iQ15 is a powered two-way loudspeaker ideally suited for a wide range of portable and fixed installation, music and speech sound reinforcement applications. The driver complement includes an 15" low frequency driver with a low mass voice coil for improved transient response, and a high temperature 1" compression driver with copper coil and distributed voice coil for extended high frequency reproduction.

Equipped with a very efficient and lightweight two-channel KLARK TEKNIK Class-D power amplifier, the iQ15 provides an impressive 2,500 Watts of output power. A high degree of control over the loudspeaker system's performance is managed by sophisticated, but easy-to-use KLARK TEKNIK Digital Signal Processor (DSP), which provides dynamic EQ for remarkable full range response at low volume levels, and transparent boosting for the utmost clarity at high output levels - and long-term reliability. iQ15's advanced DSP speaker modeling features include detailed and accurate models of some of the audio industry's most respected loudspeakers.

KLARK TEKNIK also developed a highly versatile Spatial Control (SCC) DSP function, which allows the user to easily optimize the iQ15's frequency response for the physical speaker placement. This advanced functionality provides frequency compensation for stand, floor, wall or ceiling placement, much like the adjustments commonly found on studio reference monitors.
