Hermex CA-65Q

Hermex CA-65Q Round Padlock User Manual

Model: CA-65Q

PRODUCT OVERVIEW

The Hermex CA-65Q is a robust 65mm round padlock designed for maximum security. It features a short hook, a point key mechanism, and is constructed with a steel body and chrome-matt finish. This padlock is engineered to resist various forms of vandalism, making it suitable for applications requiring a high level of protection.

Key Features:

- **Security Level:** Maximum (Level 10)
- **Body Material:** Steel body with chrome-matt finish
- **Shackle:** Chrome steel short hook, anti-theft with special coating
- **Cylinder:** Solid brass with 5 combination bolts
- **Keys:** Brass point keys (3 included)
- **Corrosion Resistance:** Internal corrosion resistant mechanism
- **Vandalism Resistance:** Designed to resist hacksaw cuts, bolt cutters, and drilling

SETUP

The Hermex CA-65Q padlock is designed for immediate use. No assembly is required.

1. **Unpacking:** Carefully remove the padlock and its keys from the packaging. Ensure all three keys are present.
2. **Initial Inspection:** Inspect the padlock for any visible damage. Ensure the shackle moves freely when unlocked and locks securely when closed.
3. **Key Identification:** Keep one key in a safe, accessible location and store the other two as backups. Avoid storing all keys with the padlock itself.

OPERATING INSTRUCTIONS

Follow these steps to properly operate your Hermex CA-65Q padlock:

1. To Unlock:

- Insert one of the provided keys into the keyway at the bottom of the padlock.
- Turn the key clockwise approximately 90 degrees.
- The shackle will spring open. Pull the shackle upwards to fully disengage it from the padlock body.

2. To Lock:

- Align the open shackle with the locking holes on the padlock body.
- Push the shackle firmly downwards until it clicks into place.
- Remove the key by turning it counter-clockwise back to its original position and pulling it out. The padlock is now locked.

MAINTENANCE

Proper maintenance ensures the longevity and reliable operation of your Hermex CA-65Q padlock.

- **Lubrication:** The internal mechanism is corrosion resistant, but continuous lubrication is recommended. Apply a small amount of graphite lubricant or a silicone-based spray lubricant into the keyway and around the shackle entry points every 6-12 months, or more frequently in harsh environments. Avoid oil-based lubricants as they can attract dirt.
- **Cleaning:** Wipe the padlock body and shackle with a clean, dry cloth to remove dirt and grime. For stubborn dirt, a damp cloth with mild soap can be used, followed by thorough drying.
- **Key Care:** Keep keys clean and free of debris. Do not force a key into the lock if it feels stiff; apply lubricant first.

TROUBLESHOOTING

If you encounter issues with your padlock, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Key is difficult to insert or turn.	Dirt/debris in keyway, lack of lubrication, bent key.	Apply graphite lubricant to keyway. Clean key. Do not force a bent key; use a spare.
Shackle does not open or close smoothly.	Corrosion, dirt, or lack of lubrication on shackle mechanism.	Lubricate shackle entry points. Clean shackle and body.
Padlock feels loose or rattles.	Normal wear, or internal components may be slightly misaligned.	This is usually not a functional issue unless security is compromised. If security is compromised, replace the padlock.

If the problem persists after attempting these solutions, contact Hermex customer support.

SPECIFICATIONS

Detailed specifications for the Hermex CA-65Q Round Padlock:

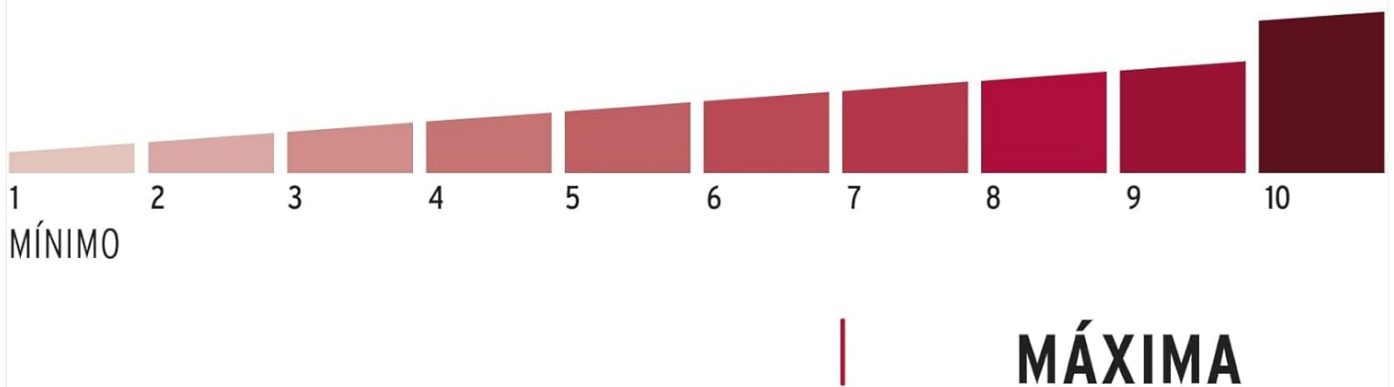

Attribute	Detail
Brand	Hermex
Model Name	CA-65Q
Lock Type	Key Lock
Special Feature	Key Lock
Material	Alloy Steel
Color	Chrome
Finish Type	Chrome
Shape	Round
Item Weight	0.68 Kilograms (approx. 1.5 pounds)
