Your luggage is equipped with a side-mounted TSA lock to secure your belongings. This lock allows only you or a TSA agent to access your luggage without damage. To set your personal combination:

1. Ensure the lock is set to the default combination (usually 0-0-0).
2. Locate the small reset button (often recessed and requires a pen tip to press).
3. Press and hold the reset button while setting your desired 3-digit combination.
4. Release the reset button. Your new combination is now set.
5. To lock the zippers, insert the zipper pullers into the lock slots and scramble the numbers.

Internal Organization and Expansion

The interior of the luggage is designed for efficient packing. It features cross-straps to secure your clothes and a zippered mesh divider on one side to keep items organized. For additional capacity, the luggage includes an expansion zipper. Unzip this outer zipper to increase the depth of the main compartment, providing more space for your belongings.

MAINTENANCE

Hardside Care

To clean the hardside exterior of your luggage, we recommend using a gentle soap and warm water, rinsing well. If you wish to wax the case after cleaning, any good silicone-based automobile or furniture polish will help preserve the luster and add resistance to the covering. We do NOT recommend using a combination cleaner-polish product.

TROUBLESHOOTING

If you encounter any issues with your Samsonite Omni PC luggage, please refer to the following general advice:

- **Stuck Wheels:** Check for any debris or foreign objects lodged in the spinner wheels. Clean the wheels regularly to ensure smooth operation.
- **Zipper Issues:** Ensure zippers are aligned correctly. Avoid overpacking, which can strain zippers. If a zipper is stiff, a small amount of lubricant (like zipper wax or silicone spray) can help.

- **Handle Malfunction:** Ensure the handle release button is fully depressed when extending or retracting. Check for any obstructions in the handle mechanism.
