SETUP AND INSTALLATION

Follow these steps to safely install your Royal Oak Tree Swing Strap:

1. **Select a Suitable Tree Branch or Pole:** Choose a strong, healthy branch or sturdy pole that can safely support the weight of the swing and its users. Ensure the branch is free from cracks or damage.
2. **Wrap the Strap:** Loop the 2-inch wide nylon strap around the chosen tree branch or pole. The wide strap design helps prevent damage to the tree bark.
3. **Secure the Carabiner:** Insert the attached heavy-duty carabiner through the loop of the strap. Pull the strap tight so it is snug against the branch or pole.
4. **Tighten the Screw Lock:** Ensure the carabiner's screw lock is fully tightened to prevent accidental detachment during use.
5. **Attach Your Swing:** Connect your desired swing (tire swing, saucer swing, hammock, etc.) to the carabiner. If using the bonus spinner, attach it between the carabiner and your swing for 360-degree rotation.
6. **Test for Security:** Before allowing anyone to use the swing, thoroughly test the installation by applying weight to the swing to ensure all connections are secure and stable.

OPERATING INSTRUCTIONS

Once installed, the Royal Oak Tree Swing Strap is ready for use with various swing types. Always ensure the carabiner's screw lock is fully engaged before use.

- **Versatile Use:** Compatible with classic tree swings, garden swings, toddler swings, porch and patio swings, saucer swings, and hammocks.
- **Spinner Functionality:** If using the bonus spinner, it allows for 360-degree rotation, adding an extra dimension to swinging.
- **Safety Check:** Regularly inspect the strap, carabiner, and swing for any signs of wear, damage, or loosening before each use.

MAINTENANCE

To ensure the longevity and safety of your Royal Oak Tree Swing Strap, follow these maintenance guidelines:

- **Regular Inspection:** Periodically check the nylon strap for fraying, cuts, or excessive wear. Inspect the carabiner and spinner for rust, deformation, or any signs of damage.
- **Cleaning:** Clean the strap with mild soap and water as needed. Avoid harsh chemicals that could degrade the nylon material.
- **Storage:** While designed to withstand various weather conditions, storing the strap indoors during prolonged periods of extreme weather (e.g., heavy snow, intense heat) can extend its lifespan.
- **Tree Health:** Monitor the tree branch for any signs of stress or damage caused by the strap. Although the wide strap is designed to be tree-friendly, continuous heavy use can affect tree health over many years.

TROUBLESHOOTING

Most issues can be resolved by ensuring correct installation and regular inspection. If you encounter problems, consider the following:

- **Swing feels unstable:** Re-check that the strap is tightly secured around the branch/pole and the carabiner's screw lock is fully engaged. Ensure the branch itself is stable and strong.
- **Strap appears worn:** If the strap shows significant fraying, cuts, or thinning, discontinue use immediately and replace the strap to prevent accidents.

- **Carabiner or spinner issues:** If the carabiner or spinner is stiff, rusted, or damaged, do not force it. Replace any compromised metal components.

SPECIFICATIONS

Size	4 Feet Single
Material	Nylon (Strap), Stainless Steel (Fasteners)
Color	Black
Brand	Royal Oak
Load Capacity	2200 pounds
Fastener Type	Carabiner Clip
Number of Pieces	1 (Strap)
Product Dimensions	48"L x 2"W
