Valcom V-2006A One Way 6 Zone Page Control User Manual

Model: V-2006A | Brand: Valcom

1. PRODUCT OVERVIEW

The Valcom V-2006A is a sophisticated one-way 6-zone page control unit designed for efficient communication systems. It integrates seamlessly with various telephone systems, offering features such as pulse dial and tone dial background music input, automatic muting in the paged zone, and programmable features per zone. This unit includes a built-in tone generator, three group zones for night ring functionality, time clock tone, doorbell, and page override capabilities for priority announcements. It also supports battery back-up input (VPB-260) and features built-in power, ensuring reliable operation. The V-2006A is UL Listed, affirming its safety and quality standards.

Figure 1: Front view of the Valcom V-2006A One Way 6 Zone Page Control unit. This image shows the compact, grey enclosure with the Valcom logo and model number clearly visible on the front panel.

2. SETUP AND INSTALLATION

Proper setup of the Valcom V-2006A is crucial for optimal performance. This unit is designed for integration with existing telephone systems.

2.1. Power Connection

The V-2006A has built-in power. Connect the unit to a standard electrical outlet. Ensure the power requirements match your local supply (230 Vac/.1A or 120 Vac/2A for V-2003A, which is similar in power requirements).

2.2. Audio and Control Connections

- **Page Port Access:** Connect to a page port on selected telephone systems, a PBX loop start or ground-start trunk port, an electronic or 1A2 line key (requires a line card), or a dedicated single line phone set.
- **Background Music Input:** Connect your background music source to the designated input. The unit accepts music sources with an impedance of 4 to 600 ohm and a nominal input level of -10 dBm.
- **Zone Outputs:** Connect the unit's zone outputs to the respective paging speakers or amplifiers for each of the 6 zones.
- **Battery Back-Up:** For uninterrupted operation during power outages, connect a compatible battery back-up unit (e.g., VPB-260) to the dedicated input.

2.3. Initial Configuration

Refer to the detailed wiring diagrams provided in the full installation guide for specific connection points. Ensure all connections are secure before applying power.

3. OPERATING INSTRUCTIONS

The Valcom V-2006A offers intuitive operation for paging and system control.

3.1. Paging Operation

- **Initiating a Page:** Access the page control unit via the connected telephone system. Dial the appropriate code or access the dedicated line to initiate a page.
- **Zone Selection:** Select the desired zone(s) for your announcement. The unit supports 6 individual zones and 3 group zones (V-2006A only) for night ring.
- **Automatic Muting:** Background music will automatically mute in the zone(s) being paged, ensuring clarity of announcements.
- **Page Override:** Utilize the page override feature for special or priority announcements, ensuring they are heard even if other audio is present.

3.2. Programmable Features

Many features of the V-2006A are programmable per zone. Consult the full programming guide for detailed instructions on customizing settings such as:

- Tone generator settings
- Night ring group zone assignments
- Time clock tone activation
- Doorbell integration

4. MAINTENANCE

The Valcom V-2006A is designed for reliable, long-term operation with minimal maintenance. Follow these general

guidelines:

- **Cleaning:** Periodically wipe the exterior of the unit with a soft, dry cloth. Do not use liquid cleaners or abrasive materials.
- **Ventilation:** Ensure the unit has adequate ventilation to prevent overheating. Do not block any vents.
- **Connections:** Periodically check all cable connections to ensure they are secure and free from corrosion.
- **Firmware Updates:** Consult Valcom's official website for any available firmware updates that may enhance performance or add features.

5. TROUBLESHOOTING

If you encounter issues with your Valcom V-2006A, refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
No audio during page.	Incorrect wiring; no power; telephone system issue; speaker fault.	Verify all connections; check power indicator; test telephone system; inspect speakers.
Background music not muting.	Incorrect programming; faulty music input connection.	Review programmable features for automatic muting; check music input cable.
Unit not powering on.	No power supply; faulty power cable; internal fault.	Ensure power outlet is active; test power cable; contact support if issue persists.
Distorted audio.	Impedance mismatch; faulty cabling; overloaded system.	Verify input/output impedance; replace faulty cables; reduce system load if applicable.

If the problem persists after attempting these solutions, please contact Valcom technical support.
