# TEK Large Rectangular Ash Wood Brush Instruction Manual

Model: SG\_B01451DUI8\_US

## 1. INTRODUCTION

---

Thank you for choosing the TEK Large Rectangular Ash Wood Brush. This brush is meticulously handmade in Italy, reflecting a commitment to quality craftsmanship and environmental sustainability. Designed with a short tooth and a pure natural rubber pneumatic base, it is particularly suitable for fine or straight hair of medium to long length.

TEK products are crafted from FSC 100% certified natural wood and are VeganOK certified, ensuring every component adheres to eco-sustainability principles. This manual provides essential information for the proper setup, operation, and maintenance of your new hairbrush.

## 2. SETUP

---

Upon receiving your TEK brush, please follow these steps for initial setup:

1. **Unboxing:** Carefully remove the brush from its recyclable cardboard packaging. Your brush may also come with a 100% cotton bag for storage or travel.
2. **Initial Inspection:** Examine the brush for any signs of damage during transit. The ash wood handle and hornbeam wood pins are designed for durability.
3. **Understanding the Air Cushion:** You may notice a missing pin in the pneumatic base of the brush. This is an intentional design feature, not a defect. This small hole serves as an air vent, allowing air to circulate within the rubber cushion. This ensures the brush remains flexible and adapts to the shape of your head, providing a gentle and effective brushing experience. It also helps prevent moisture buildup within the base.

**BE CAREFUL: Only by purchasing from **Tek Amazon Retailer**, you'll receive our official recycle pack & 100% cotton bag.**

### 3. OPERATING INSTRUCTIONS

---

For optimal hair health and detangling, follow these guidelines:

- **Detangling Technique:** Always begin detangling your hair from the ends and gradually work your way up towards the roots. Use gentle, slow strokes to avoid unnecessary pulling or breakage. This method minimizes stress on your hair and scalp.
- **Sectioning for Thicker Hair:** If you have particularly thick or long hair, consider working in smaller sections. This allows for more thorough and gentle detangling, preventing knots from tightening.
- **Benefits of Wooden Brushes:** Wooden pins are inherently gentle on the hair and scalp. They help to distribute the natural oils from your scalp throughout your hair, promoting moisture and shine. Unlike plastic brushes, wooden brushes and combs significantly reduce static and frizz, leaving your hair smoother and healthier. They are also hypoallergenic and can help reactivate blood circulation in the scalp.

## 4. MAINTENANCE

---

Proper care will extend the life of your TEK brush:

- **Regular Cleaning:** After each use, gently remove any accumulated hair from the pins. For a deeper clean, use a fine-tooth comb or another brush to carefully lift out trapped hair and debris from between the pins.
- **Washing:** If necessary, you can gently wipe the pins and rubber base with a damp cloth. Avoid submerging the brush in water or using harsh chemical cleaners, as this can damage the natural wood and rubber components. Allow the brush to air dry completely, ideally with the pins facing down, to prevent moisture from collecting in the pneumatic base.
- **Storage:** Store your brush in a dry place, away from direct sunlight or extreme temperatures, which can cause the wood to warp or crack. The provided cotton bag is ideal for protective storage.

## 5. TROUBLESHOOTING

---

- **Excessive Hair Accumulation:** While TEK brushes are designed to minimize hair pulling, some hair accumulation is natural. If you notice more hair than expected, ensure you are detangling from the ends first and working in smaller sections, especially if your hair is prone to tangles.
- **"Missing" Pin:** As explained in the Setup section, the absence of one pin in the pneumatic base is intentional. It is an air

cushion hole that allows for flexibility and proper air circulation, preventing moisture buildup. This is a design feature, not a defect.

- **Static or Frizz:** Wooden brushes are known for their anti-static properties. If you experience static, ensure your hair is not excessively dry. The brush helps distribute natural oils, which can reduce static over time.

## 6. SPECIFICATIONS

---

<b>Product Name</b>	TEK Large Rectangular Ash Wood Brush
<b>Model Number</b>	SG_B01451DUI8_US
<b>Dimensions</b>	22 x 6.5 cm (8.66 x 2.56 inches) Package Dimensions: 9.29 x 2.91 x 1.89 inches
<b>Weight</b>	2.88 ounces
