Please read these instructions carefully before using the tool and retain them for future reference. Proper use and maintenance will ensure optimal performance and extend the life of your tool.

## IMPORTANT SAFETY INSTRUCTIONS

---

Always follow basic safety precautions to reduce the risk of fire, electric shock, and personal injury when using power tools. Familiarize yourself with all warnings and instructions.

- **Work Area Safety:** Keep the work area clean and well-lit. Cluttered or dark areas invite accidents. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases, or dust.
- **Electrical Safety:** Power tool plugs must match the outlet. Never modify the plug in any way. Avoid body contact with earthed or grounded surfaces. Do not expose power tools to rain or wet conditions.
- **Personal Safety:** Always wear eye protection. Use hearing protection when operating for extended periods. Wear a dust mask if operations create dust. Dress properly; avoid loose clothing or jewelry.
- **Power Tool Use and Care:** Do not force the power tool. Use the correct power tool for your application. Disconnect the plug from the power source before making any adjustments, changing accessories, or storing power tools.
- **Specific Grinder Safety:** Always ensure the guard is properly positioned and secured. Use only discs rated for the grinder's speed and diameter. Never use a damaged or incorrect disc.

## SETUP

---

Follow these steps to prepare your angle grinder for use:

- 1. Attaching the Protective Guard:**

Loosen the screw on the protective guard. Position the guard over the spindle housing so that it covers the disc and directs sparks away from you. Tighten the screw securely. Ensure the guard is firmly in place and cannot rotate freely.

**2. Attaching the Side Handle:**

Screw the side handle into one of the threaded holes on the gear housing. The handle can be positioned on either the left or right side, depending on your preference and the application. Ensure it is tightened firmly.

### 3. **Mounting the Grinding/Cutting Disc:**

Press and hold the spindle lock button. Place the inner flange onto the spindle. Position the grinding or cutting disc onto the inner flange, ensuring it sits flat. Place the outer flange over the disc. Use the provided spanner to tighten the outer flange nut securely. Release the spindle lock button.

## **OPERATING INSTRUCTIONS**

---

Before starting, ensure you are wearing appropriate personal protective equipment (PPE) including safety glasses, hearing protection, gloves, and a dust mask.

1. **Power Connection:** Plug the power cord into a suitable electrical outlet.
2. **Starting the Grinder:** Hold the grinder firmly with both hands, one on the main body and one on the side handle. Press the On/Off switch to start the tool. Allow the disc to reach full speed before contacting the workpiece.
3. **Grinding/Cutting:** Apply light, even pressure to the workpiece. Do not force the tool. For grinding, maintain a small angle (typically 15-30 degrees) between the disc and the workpiece. For cutting, hold the disc perpendicular to the workpiece and make straight cuts.
4. **Stopping the Grinder:** Release the On/Off switch to turn off the tool. Wait for the disc to come to a complete stop before setting the tool down.
