Bestway 56432

Bestway Steel Pro Round Kids Pool with UV Canopy (Model 56432)

Instruction Manual

INTRODUCTION

This manual provides essential information for the safe assembly, operation, and maintenance of your Bestway Steel Pro Round Kids Pool with UV Canopy, Model 56432. Please read all instructions carefully before setting up and using the product. Retain this manual for future reference.

Image: The Bestway Steel Pro Round Kids Pool, fully assembled with its UV canopy, showing children enjoying the water. The pool features a colorful fruit design on its exterior.

IMPORTANT SAFETY INFORMATION

- Adult supervision is required at all times when children are in or near the pool.
- Do not dive or jump into the pool.
- Ensure the pool is set up on a level, stable surface.
- Keep children away from the pool when not in use.
- Empty the pool completely when not in use for extended periods.
- Follow all local regulations regarding pool safety and fencing.

PACKAGE CONTENTS

Before assembly, verify that all components listed below are present and undamaged. If any parts are missing or damaged, do not proceed with assembly and contact Bestway customer service.

- Pool Liner (PVC material with colorful fruit design)
- Steel Frame Structure (Alloy steel poles and connectors)
- UV Protection Canopy
- Rain-effect Water Connection
- Drain Valve
- Filter Pump Assembly Connection (Filter pump sold separately)

SETUP INSTRUCTIONS

Assembly is straightforward and requires no special tools. It is recommended that two adults perform the setup.

1. **Site Selection:** Choose a firm, level surface free of sharp objects, debris, and overhead obstructions. The area should be large enough to accommodate the pool (2.44m diameter) and provide safe access.
2. **Unpack Components:** Carefully remove all parts from the packaging. Spread out the pool liner in the chosen area.
3. **Assemble Frame:** Connect the steel poles according to the diagrams provided in the separate assembly guide (refer to the box for visual steps). Ensure all connections are secure.

Image: Detail of the steel frame connection, showing how the horizontal and vertical poles interlock securely.

4. **Attach Pool Liner:** Carefully thread the frame poles through the sleeves on the pool liner. Ensure the drain valve is positioned correctly for easy access.
5. **Install Canopy:** Assemble the canopy frame and attach it to the main pool structure. The canopy provides UV protection.

Image: Product packaging illustrating the step-by-step process for assembling and attaching the UV protection canopy to the pool frame.

6. **Connect Rain-effect Sprayer:** Attach a standard garden hose to the rain-effect water connection located on the canopy.
7. **Final Check:** Before filling, ensure all connections are tight and the pool structure is stable. Smooth out any wrinkles in the pool liner.

OPERATING INSTRUCTIONS

1. **Filling the Pool:** Begin filling the pool with water. As the water level rises, gently pull the outer edges of the liner to ensure it is evenly distributed and seated correctly within the frame. Fill to approximately 90% capacity (1,688 liters / 446 gallons), which is indicated by the fill line on the liner.
2. **Using the Integrated Sprayer:** Once the pool is filled, turn on the water supply to the garden hose connected to the canopy. The integrated sprayer will create a gentle rain effect, adding to the fun.

Image: Children enjoying the integrated rain-effect sprayer feature of the pool's UV canopy, with water gently falling into the pool.

3. **UV Protection:** The canopy provides UPF 40+ UV protection, shielding users from direct sunlight.

MAINTENANCE

- **Water Quality:** Regularly check and maintain water quality using appropriate pool chemicals (not included).
- **Cleaning:** Clean the pool liner and frame periodically with a soft brush and mild soap. Rinse thoroughly.
- **Draining:** To drain the pool, connect a garden hose to the drain valve located at the bottom of the pool. Open the valve to allow water to flow out. Direct the water to a suitable drainage area.
- **Storage:** When not in use for an extended period, drain the pool completely, clean all components, and allow them to dry thoroughly. Disassemble the frame and canopy, then fold the liner. Store all parts in a dry, cool place, away from direct sunlight and extreme temperatures.
- **Filter Pump Connection:** The pool includes an assembly connection for a filter pump (sold separately). If using a filter pump, follow its specific instructions for installation and maintenance to ensure proper water

circulation and filtration.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Water is leaking from the pool.	Small puncture in liner, loose drain valve cap.	Locate the puncture and repair with a vinyl repair kit (not included). Ensure the drain valve cap is securely tightened.
Pool structure feels unstable.	Uneven ground, frame not fully assembled.	Ensure the pool is on a perfectly level surface. Recheck all frame connections to ensure they are securely locked.
Rain-effect sprayer not working.	Hose not connected, water supply off, clogged nozzle.	Verify garden hose is securely attached and water supply is on. Check sprayer nozzles for any blockages.

SPECIFICATIONS

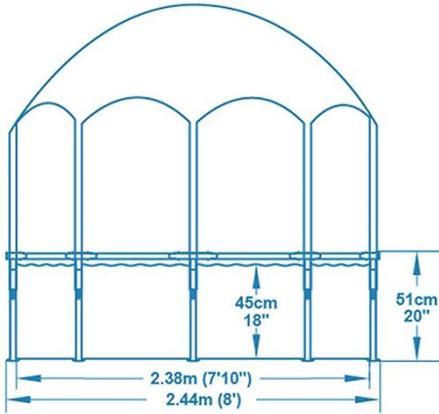

Feature	Detail
Model Number	56432
Dimensions (Diameter x Height)	2.44 m x 51 cm (8 ft x 20 in)
Water Capacity (90%)	1,688 Liters (446 Gallons)
Material (Liner)	High-strength Polyvinyl Chloride (PVC)
Frame Material	Alloy Steel
Shape	Round
