WMF Water Filter Instruction Manual for Fully Automatic Coffee Machines

Models: WMF 1000 Pro, WMF 1000, WMF 800

INTRODUCTION

This manual provides essential information for the proper installation, usage, and maintenance of your WMF Water Filter. Designed for WMF fully automatic coffee machines, this filter is crucial for maintaining optimal coffee quality and extending the lifespan of your appliance by reducing limescale buildup.

PRODUCT OVERVIEW

The WMF Water Filter is specifically engineered to enhance your coffee experience and protect your WMF fully automatic coffee machine. It effectively filters water, reducing impurities and limescale, which can negatively impact taste and machine performance.

Key Benefits:

- Ensures an even quality of coffee in taste and aroma.
- Provides safe and effective protection against deposits and limescale.
- Extends the life of your high-quality coffee machine technology.
- Each filter is sufficient for approximately 100 liters of water or three months of machine use.

SETUP AND INSTALLATION

Proper installation of the WMF Water Filter is essential for its effective operation. Please refer to your specific WMF fully automatic coffee machine's instruction manual for detailed, model-specific installation steps. The general procedure involves:

- 1. Preparation:** Remove the new water filter from its packaging.
- 2. Priming the Filter:** Before inserting, immerse the filter in cold water for a few minutes to allow any air bubbles to escape.
- 3. Accessing the Water Tank:** Open the water tank of your WMF coffee machine.
- 4. Inserting the Filter:** Carefully insert the water filter into the designated holder within the water tank. Ensure it is securely seated according to your machine's instructions.
- 5. Filling the Tank:** Fill the water tank with fresh, cold water.
- 6. Activating the Filter:** Follow your coffee machine's menu prompts to indicate that a new water filter has been installed. This step is crucial for the machine to track filter usage and prompt for replacement.

Always ensure the water tank is clean before installing a new filter.

USAGE AND REPLACEMENT

For optimal performance and coffee quality, the WMF Water Filter requires regular replacement. The filter's effectiveness is rated for approximately 100 liters of water or a maximum of three months of use, whichever comes first.

- **Monitoring Usage:** Your WMF fully automatic coffee machine is designed to monitor filter usage and will typically notify you when a replacement is due.
- **Timely Replacement:** Replace the filter promptly when indicated by your machine or after three months, even if the machine has not prompted a replacement, to ensure continuous protection against limescale and consistent coffee taste.
- **Disposal:** Dispose of used filters according to local environmental regulations.

MAINTENANCE

The WMF Water Filter significantly reduces the need for frequent descaling of your coffee machine. However, it does not eliminate the need for all maintenance. Always adhere to the cleaning and maintenance schedule recommended in your WMF coffee machine's instruction manual.

- Regularly clean the water tank and other removable parts of your coffee machine.
- Even with a filter, occasional descaling may still be required, depending on your local water hardness and machine usage. Your machine will typically indicate when descaling is necessary.

TROUBLESHOOTING

If you encounter issues related to water quality or machine performance after installing the filter, consider the following:

- **Poor Coffee Taste:** Ensure the filter is correctly installed and has not exceeded its usage capacity (100 liters or 3 months). Replace the filter if it's overdue.
- **Limescale Buildup:** If limescale still appears, verify the filter was activated correctly in the machine's settings. If the filter is old, replace it.
- **Water Flow Issues:** Check for proper filter seating in the water tank. Refer to your coffee machine's manual for general water flow troubleshooting.

For persistent issues, consult your WMF coffee machine's comprehensive instruction manual or contact WMF customer support.

SPECIFICATIONS

| Feature | Detail |
|--------------------------------|--|
| Product Type | Water Filter for Fully Automatic Coffee Machines |
| Compatibility | WMF 1000 Pro, WMF 1000, WMF 800 |
| Material | Plastic |
| Filter Capacity | Approx. 100 liters or 3 months |
| External Testing Certification | WQA |
| Product Benefits | Improved Flavour, Limescale Protection |
| Unit Count | 6.0 Count (as per product listing) |
| Usage | Coffee maker |

WARRANTY AND SUPPORT
