### Blending

1. After setup, press and hold the desired speed button:

- **LOW:** Ideal for softer ingredients like fruits (e.g., bananas, peaches) and general mixing.
- **HIGH:** Recommended for harder ingredients, ice, and frozen fruits to achieve a smoother consistency.

2. Blend in short bursts (e.g., 10-15 seconds) rather than continuously. This helps prevent overheating and ensures thorough blending.
3. Do not operate the blender for more than 1 minute at a time. If more blending is required, allow the motor to rest for at least 2 minutes before resuming.
4. Once blending is complete, release the button. The blender will stop.
5. Unplug the blender from the power outlet.
6. Carefully remove the container from the motor base by twisting counter-clockwise.
7. Remove the lid and pour out your blended mixture.
