Invicta 8932OB

Invicta Men's 8932OB Pro Diver Quartz Watch User Manual

MODEL: 8932OB

[Overview](#) [Setup](#) [Operation](#) [Introduction](#) [Maintenance](#) [Safety Precautions](#) [Troubleshooting](#) [Product Specifications](#) [Warranty & Support](#)

1. Introduction

Welcome to the user manual for your Invicta Men's 8932OB Pro Diver Quartz Watch. This guide provides essential information on the proper setup, operation, maintenance, and care of your timepiece. Please read this manual thoroughly to ensure optimal performance and longevity of your watch.

2. Safety Precautions

This manual contains important instructions that must be strictly followed at all times not only for optimal use, but to prevent any injuries to yourself, other persons, or property. We encourage you to read the entire booklet and understand the meaning of the following symbols:

DANGER: Indicates a highly likely risk of death or serious injury.

WARNING: Indicates a potential risk of serious injury.

CAUTION: Indicates a potential risk of minor or moderate injury or damage.

Button Cell Battery Warnings

- **INGESTION HAZARD:** This product contains a button cell or coin battery. Death or serious injury can occur if ingested.
- A swallowed button cell or coin battery can cause Internal Chemical Burns in as little as **2 hours**.
- Keep new and used batteries **OUT OF REACH OF CHILDREN**.

- Seek immediate medical attention if a battery is suspected to be swallowed or inserted inside any part of the body.
- This product is intended to be opened only by professionals.
- Remove and immediately recycle or dispose of used batteries according to local regulations and keep away from children.
- Do NOT dispose of batteries in household trash or incinerate.
- Even used batteries may cause severe injury or death.
- Non-rechargeable batteries are not to be recharged.
- Do not force discharge, recharge, disassemble, heat above (manufacturer's specified temperature rating) or incinerate. Doing so may result in injury due to venting, leakage or explosion resulting in chemical burns.

When Storing the Watch

Avoid placing your watch in areas with strong magnetism when storing it, as this can affect the accuracy of the quartz movement.

Water Resistance

Refer to the watch dial and/or the case back for the indication of the water resistance of your watch. The following chart provides examples of use for reference to ensure that your watch is used properly. The unit "1 bar" is roughly equal to 10 meters.

WARNING: Water resistant watches are only water resistant when the crown is fully pushed in and, if applicable, screwed down. Do not operate the crown or pushers underwater.

Figure 2: Water Resistance Guidelines. The 8932OB is rated for 200 meters, suitable for professional marine activity and surface water sports, including diving.

3. Product Overview

The Invicta 8932OB Pro Diver is a robust timepiece designed for reliability and functionality. Key features include:

- **Case:** Stainless steel, 37.5mm diameter x 11mm thick.
- **Dial:** Black, with luminous hands and hour markers for visibility in low light.
- **Movement:** Japanese quartz movement, PC32A Caliber, assembled in Japan.
- **Battery:** SR626SW (included).
- **Band:** Stainless steel, 215mm L x 18mm W, adjustable with a fold-over safety clasp.
- **Crystal:** Mineral crystal for scratch resistance.
- **Crown:** Push/pull type.
- **Bezel:** Unidirectional stainless steel coin edge bezel with a black top ring.
- **Water Resistance:** 200 meters (660 feet).

Figure 5: Quartz movement and date display.

4. Setup

4.1 Adjusting the Watch Band

The stainless steel band is designed to be adjustable. If the band is too large, links can be removed to achieve a comfortable fit. It is recommended to have a professional jeweler perform link removal to prevent damage to the band or watch. The clasp also features micro-adjustments for finer sizing, which can be changed using a small spring bar tool.

Figure 6: View of the watch back and open clasp, showing adjustment points.

4.2 Setting Time and Date

1. **Pull the Crown:** Gently pull the crown out to the first or second click position.
2. **Setting the Date:** If the crown is at the first click, rotate it clockwise or counter-clockwise (depending on the movement) to adjust the date.
3. **Setting the Time:** If the crown is at the second click, rotate it to move the hour and minute hands to the correct time.
4. **Push the Crown Back:** Once the time and date are set, push the crown firmly back into its original position to ensure water resistance.

Figure 7: Side view highlighting the crown for time and date adjustment.

5. Operating Instructions

5.1 Crown Functions

The crown is used for setting the time and date. Ensure it is always pushed in fully when not adjusting the watch to maintain its water resistance.

5.2 Unidirectional Bezel

The watch features a unidirectional rotating bezel. This bezel can be rotated counter-clockwise to mark

elapsed time. Align the triangle marker on the bezel with the minute hand at the start of an event to track its duration. The unidirectional design prevents accidental increases in recorded time, which is crucial for diving safety.

Figure 8: Side view highlighting the unidirectional rotating bezel.

5.3 Water Resistance

Your Invicta 8932OB watch is water resistant to 200 meters (660 feet). This makes it suitable for professional marine activity, surface water sports, and diving. Always ensure the crown is fully pushed in

before exposing the watch to water. Do not operate the crown or pushers while the watch is submerged.

6. Maintenance

6.1 Cleaning

To maintain the appearance of your watch, regularly wipe the case and band with a soft, dry cloth. For stainless steel bands, a damp cloth with mild soap can be used, followed by thorough drying. Avoid harsh chemicals or abrasive materials.

6.2 Battery Replacement

The watch is powered by an SR626SW battery. When the watch stops running, it indicates the battery needs replacement. It is highly recommended to have the battery replaced by a qualified watchmaker or an authorized service center to ensure proper sealing and maintain water resistance.

7. Troubleshooting

- **Watch Not Running:** Check if the crown is fully pushed in. If it is, the battery may need replacement.
- **Inaccurate Time:** This could be due to a low battery or exposure to strong magnetic fields. If the issue persists after battery replacement and avoiding magnetic fields, contact customer support.
- **Condensation Under Crystal:** If you notice moisture inside the watch, this indicates a loss of water resistance. Immediately contact an authorized service center to prevent further damage.

8. Specifications

Model Number	8932OB
Case Material	Stainless Steel
Case Diameter	37.5mm
Case Thickness	11mm
Movement	Japanese Quartz (PC32A Caliber)
Crystal Type	Mineral
Band Material	Stainless Steel
Band Length	215mm
Band Width	18mm
Water Resistance	200 meters (660 feet)
Battery Type	SR626SW (Lithium Metal)
Watch Weight	121 grams

9. Warranty and Support

Your Invicta watch comes with a standard warranty. For details regarding the warranty period and coverage, please refer to the documentation included with your purchase or visit the official Invicta website.

Extended Warranty Registration

You may be eligible to upgrade to an extended warranty. To register your watch and claim an extended warranty, please visit: www.invictawarranty.com/
