## SETUP GUIDE

---

Follow these steps to properly set up your ThrustMaster T150 RS Racing Wheel:

1. **Mounting the Racing Wheel:**

Place the racing wheel on a stable, flat surface such as a desk or a racing cockpit. Secure the wheel using the integrated clamping system. Tighten the clamp firmly to prevent movement during use.

### 5. **Platform Selection (for PS3/PS4/PS5):**

On the racing wheel base, locate the PS3/PS4 switch and set it to the appropriate position for your console. For PS5 compatibility, ensure the switch is set to PS4 mode, as PS5 compatibility has been tested and endorsed by Thrustmaster.

## OPERATING INSTRUCTIONS

Once set up, you can begin using your T150 RS Racing Wheel for an enhanced gaming experience.

### Force Feedback

The T150 RS features a powerful Force Feedback system that simulates realistic sensations such as road texture, impacts, and loss of grip. This system is responsive, precise, and silent, thanks to its belt-pulley mechanism.

### Wheel Rotation

The wheel offers up to 1080 degrees of rotation, allowing for optimal precision in various racing simulations. The optical reading system provides 12-bit resolution (4,096 values on the steering axis) for accurate in-game mirroring of your movements.

### Paddle Shifters

The 100% metal sequential paddle shifters provide smooth and distinct gear changes, ensuring optimal accuracy during gameplay.

Pedal Set

The included 2-pedal set (accelerator and brake) allows for precise control over your vehicle's speed and braking. Ensure the pedal set is placed on a non-slip surface or secured to prevent movement during intense racing.

MAINTENANCE

Proper maintenance will ensure the longevity and optimal performance of your ThrustMaster T150 RS Racing Wheel.

- **Cleaning:** Use a soft, dry cloth to clean the wheel and pedal surfaces. Avoid using abrasive cleaners or solvents, as they may damage the finish.
- **Storage:** When not in use, store the racing wheel and pedals in a clean, dry environment away from direct sunlight and extreme temperatures.
- **Cable Management:** Ensure all cables are neatly organized and not tangled or pinched to prevent damage.

TROUBLESHOOTING

If you encounter issues with your T150 RS Racing Wheel, refer to the following common solutions:

Problem	Possible Cause	Solution
Wheel not recognized by console/PC	Incorrect platform switch setting, loose USB connection, outdated drivers (PC)	Check PS3/PS4 switch position. Ensure USB cable is securely connected. For PC, download and install the latest drivers from the Thrustmaster support website.
No Force Feedback or weak Force Feedback	Game settings, power issue, driver issue (PC)	Verify Force Feedback settings within the game. Ensure the power adapter is correctly connected and receiving power. For PC, reinstall drivers and calibrate the wheel.
Pedals not responding	Loose pedal connection, calibration issue	Check the connection between the pedal set and the wheel base. Recalibrate the pedals through the game or driver settings.
