GE Lighting 92119 3-Way LED A21 Bulb User Manual

Model: 92119

INTRODUCTION

This manual provides essential instructions for the safe and efficient use of your GE Lighting 92119 3-Way LED A21 Bulb. This LED bulb is designed as a 50/100/150-watt incandescent replacement, offering energy efficiency and long-lasting performance. It features a standard A21 shape and a soft white light output, suitable for various indoor lighting applications.

SAFETY INFORMATION

- Always turn off power to the fixture before installing, removing, or inspecting the bulb.
- Do not use with dimmers unless explicitly stated as compatible. This bulb is designed for 3-way functionality, not standard dimming.
- Ensure the bulb is securely screwed into the socket.
- Do not disassemble the bulb. There are no user-serviceable parts inside.
- Avoid exposing the bulb to water or excessive moisture. For indoor use only.
- If the bulb or fixture is damaged, discontinue use immediately and consult a qualified electrician.

SETUP AND INSTALLATION

1. **Power Off:** Before installation, ensure the power supply to the lamp or fixture is completely turned off at the wall switch or circuit breaker.
2. **Remove Old Bulb:** Carefully unscrew the existing bulb from the socket. Allow it to cool if it was recently in use.
3. **Install New Bulb:** Screw the GE Lighting 92119 3-Way LED A21 Bulb into a standard E26 medium base socket. Turn clockwise until it is finger-tight. Do not overtighten.
4. **Restore Power:** Turn the power back on at the wall switch or circuit breaker.

This bulb is designed for fixtures that support 3-way functionality. Ensure your lamp or fixture has a compatible 3-way socket.

OPERATING INSTRUCTIONS

The GE Lighting 92119 3-Way LED A21 Bulb provides three distinct light levels. Unlike traditional incandescent 3-way bulbs, this LED bulb features a specific switching sequence:

- **First Click:** Activates the low light setting (equivalent to 50 watts incandescent).
- **Second Click:** Activates the high light setting (equivalent to 150 watts incandescent). This is the brightest output.
- **Third Click:** Activates the medium light setting (equivalent to 100 watts incandescent).
- **Fourth Click:** Turns the bulb off.

This unique "low-high-medium" sequence allows the bulb to function at its brightest setting when used in a standard one-way fixture, providing maximum versatility.

Image: Visual representation of the 3-way lighting functionality, demonstrating low, bright, and general purpose light levels with each click.

MAINTENANCE

- **Cleaning:** Ensure the power is off and the bulb is cool before cleaning. Wipe the bulb with a soft, dry cloth. Do not use liquid cleaners or abrasive materials.
- **Storage:** If storing the bulb, keep it in its original packaging in a cool, dry place away from direct sunlight and extreme temperatures.
- **Disposal:** Dispose of LED bulbs according to local regulations for electronic waste. Do not dispose of in regular household trash.

TROUBLESHOOTING

Bulb does not light up:

- Ensure the power to the fixture is on.
- Check that the bulb is screwed in securely into the socket.
- Verify that the lamp or fixture is receiving power by testing with another working bulb.
- Inspect the bulb for any visible damage. If damaged, replace it.

Bulb flickers or cycles incorrectly:

- Ensure the bulb is used in a compatible 3-way fixture.
- Confirm the bulb is not connected to a standard dimmer switch, as this can cause flickering or improper operation.
- Try the bulb in a different 3-way fixture to rule out an issue with the lamp itself.

SPECIFICATIONS

Brand	GE
Model Number	92119
Light Type	LED
Special Feature	3-Way
Wattage (Actual)	6/15/22 Watts
Incandescent Equivalent	50/100/150 Watts
Bulb Shape Size	A21
Bulb Base	E26 (Medium)
Light Color	Soft White (2700K)
Brightness	700/1600/2155 Lumens
Voltage	120 Volts
Indoor/Outdoor Usage	Indoor
Estimated Life	22.8 years (based on 3 hrs/day)
GTIN/UPC	043168921190
