This manual provides comprehensive instructions for the Nescafe Gold Blend Barista Style Instant Coffee, 180g. This premium instant coffee is crafted to deliver a rich and full-bodied coffee experience, combining the convenience of instant preparation with the quality of finely ground roasted coffee beans.

Key Features:

- **Barista Style Blend:** A unique blend of instant coffee and 6% finely ground roasted coffee beans for a rich aroma and deep flavor.
- **Convenient Preparation:** Easily prepare a delicious cup of coffee by simply adding hot water and milk.
- **Dietary Suitability:** Suitable for vegetarians.
- **Sustainable Packaging:** The product packaging is designed to be recyclable.

2. PREPARATION AND SERVING

Follow these simple steps to prepare your Nescafe Gold Blend Barista Style coffee for an optimal taste experience:

1. Step 1: Measure Coffee

Add 1 to 2 teaspoons of Nescafe Gold Blend Barista Style instant coffee into your favorite mug. Adjust the quantity based on your desired coffee strength.

2. Step 2: Add Hot Water

Pour approximately 200ml of hot (but not boiling) water into the mug. Using water that is too hot can affect the coffee's flavor.

3. Step 3: Stir Thoroughly

Stir the mixture well until all coffee granules are completely dissolved, ensuring a smooth consistency.

4. Step 4: Add Milk (Optional)

For a creamier and richer taste, add milk or a non-dairy alternative to your preference. Stir again to combine.

5. Step 5: Enjoy

Your perfectly prepared barista-style instant coffee is now ready to be savored.

3. STORAGE AND CARE

Proper storage is crucial to maintain the freshness, aroma, and quality of your Nescafe Gold Blend Barista Style instant coffee.

- Storage Conditions:** Always store the product in a cool, dry place. Avoid exposure to direct sunlight, high temperatures, and humidity, as these can degrade the coffee's quality.
- Sealing:** After each use, ensure the lid is securely closed to prevent air and moisture from entering the container, which can cause the coffee to clump or lose flavor.
- Packaging Disposal:** The packaging is designed for recycling. Please check your local recycling guidelines for proper disposal of the can.

4. TROUBLESHOOTING

If you encounter any issues while preparing your coffee, consider the following common solutions:

- **Coffee Not Dissolving Completely:**

- Ensure the water is hot enough (ideally between 80-90°C or 175-195°F) but not boiling.
- Stir vigorously for at least 15-20 seconds to ensure all granules are fully incorporated.

- **Weak or Bland Taste:**

- Increase the amount of coffee granules used per cup.
- Verify that the product has been stored correctly in a cool, dry place to preserve its freshness.

- **Bitter Taste:**

- Reduce the amount of coffee granules.
- Ensure the water is not boiling, as excessively hot water can over-extract the coffee and lead to bitterness.
