Your American Flyer luggage set is designed for convenient storage and may arrive nested. Follow these steps for initial setup:

1. **Unpacking:** Carefully remove all pieces from the packaging. The smaller uprights and duffels are typically stored inside the larger uprights.
2. **Expand Handles:** For the upright luggage pieces and wheeled duffel, locate the button on the top of the handle. Press the button and pull the handle upwards to extend it to its full height. Ensure it locks securely into place.
3. **Inspect Components:** Before first use, visually inspect all zippers, wheels, and handles for any signs of damage from shipping. If any issues are found, refer to the "Support" section.

## OPERATING INSTRUCTIONS

---

### Using Spinner Wheels:

The upright luggage pieces feature multi-directional spinner wheels, allowing for 360-degree rotation and effortless maneuverability. To use, simply push or pull the luggage in any direction. For optimal stability, especially on uneven surfaces, you may tilt the luggage and pull it on two wheels.

### Extending and Retracting Handles:

The telescopic handles on the uprights and wheeled duffel can be adjusted to multiple heights. Press the release button located on the handle grip and extend or retract the handle to your desired length. Ensure the handle clicks into place at each height setting for secure use.

### Packing and Organization:

- Utilize the various zippered compartments and pockets for organized packing.
- Place heavier items at the bottom of the upright luggage to maintain balance.
- For the wheeled duffel and personal bag, distribute weight evenly to prevent tipping.

## MAINTENANCE AND CARE

---

### Cleaning Instructions:

- **Fabric Surfaces:** For light dirt, wipe with a damp cloth and mild soap. For tougher stains, use a fabric cleaner specifically designed for luggage or upholstery, testing on an inconspicuous area first. Do not machine wash.
- **Wheels:** Periodically check wheels for debris (hair, lint, etc.) and clean as needed. A small brush or toothpick can help remove lodged particles.
- **Handles:** Wipe telescopic handles with a damp cloth. Ensure no dirt or grit accumulates in the telescoping mechanism.
- **Zippers:** If zippers become stiff, apply a small amount of zipper lubricant or wax. Avoid forcing stuck zippers.

### Storage:

When not in use, store your luggage set in a cool, dry place away from direct sunlight. The pieces are designed to nest within each other for compact storage, saving space.

## TROUBLESHOOTING

---

- **Stuck Telescopic Handle:** Ensure the release button is fully depressed. Check for any obstructions (e.g., fabric, debris) in the handle mechanism. Gently wiggle the handle while pressing the button. Do not force.
- **Wheels Not Rolling Smoothly:** Inspect wheels for tangled hair, lint, or other debris. Clean thoroughly. If a wheel is damaged, contact customer support for potential replacement options.
- **Zipper Issues:** If a zipper is difficult to move, try rubbing a pencil lead or a small amount of wax along the teeth. Ensure the fabric is not caught in the zipper pull.

- **Luggage Tipping:** Ensure weight is evenly distributed when packing. For upright luggage, place heavier items towards the bottom.
