5. MAINTENANCE

5.1 Cleaning

To clean the remote control, use a soft, dry cloth. For stubborn dirt, slightly dampen the cloth with water or a mild cleaning solution. Avoid using harsh chemicals or abrasive materials, as these can damage the remote's surface or internal components.

5.2 Battery Replacement

Replace batteries when the remote's response becomes sluggish or stops working. Always replace both batteries at the same time with new ones of the same type (AAA). Do not mix old and new batteries, or different types of batteries, as this can lead to leakage or malfunction.

5.3 Storage

Store the remote control in a dry place, away from direct sunlight and extreme temperatures. If the remote will not be used for an extended period, it is advisable to remove the batteries to prevent leakage.

6. TROUBLESHOOTING

- **Remote not responding:**

  - Ensure batteries are inserted correctly with the correct polarity.
  - Replace old batteries with new ones.
  - Check for any obstructions between the remote and the TV's infrared sensor.
  - Make sure you are within the effective range of the TV's IR receiver.

- **Specific buttons not working:**

  - Clean the remote's surface, especially around the non-working buttons, to remove any dirt or debris that might be interfering.
  - If the remote has a "REMOTE MODE" button, ensure it is set to the correct mode (e.g., TV for TV functions, BD for Blu-ray player functions).

- **Remote works intermittently:**

  - This often indicates low battery power. Replace the batteries.
  - Ensure a clear line of sight to the TV.
